MONA MAGHRABY

Possible Protective Effects of Stem Cells Treatment on Ischemic/Reperfused Hearts in Hypertensive Rats Model

Thesis

*Submitted for partial fulfillment of master degree in
Basic Medical Science (Medical Physiology)*

By

Nahla Mohamed Hussien

M.B., B.Ch.

Under supervision of

Prof. Dr. Gehane Mahmoud Hamed

Professor of medical Physiology

Faculty of Medicine - Ain Shams University

Prof. Dr. Hanaa Ahmed Amer

Professor of Clinical Pathology

Faculty of Medicine - Ain Shams University

Assis.Prof.Dr. Manal Said Abd el Hamid

Assistant Professor of medical Physiology

Faculty of Medicine - Ain Shams University

Dr. Einas Mohamed Nagib

Lecturer of medical Physiology

Faculty of Medicine - Ain Shams University

Faculty of Medicine
Ain Shams University

2020

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

سبحانك لا علم لنا
إلا ما علمتنا إنك أنت
العليم العليم

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgments

First and foremost, I feel always indebted to Allah the Most Beneficent and Merciful.

I wish to express my deepest thanks, gratitude and appreciation to Prof. Dr. Gehane Mahmoud Hamed, Professor of medical Physiology, Faculty of Medicine-Ain Shams University, for her meticulous supervision, kind guidance, valuable instructions and generous help.

Special thanks are due to Prof. Dr. Hanana Ahmed Amer, Professor of Clinical Pathology, Faculty of Medicine-Ain Shams University, for her sincere efforts, fruitful encouragement.

I am deeply thankful to Assis.Prof.Dr. Manal Said Abdel Hamid, Assistant Professor of medical Physiology, Faculty of Medicine-Ain Shams University, for her great help, outstanding support, active participation and guidance.

I would like to express my deepest gratitude and appreciation to Dr. Einas Mohamed Magib, Lecturer of medical Physiology, Faculty of Medicine-Ain Shams University, for her precious help and beneficial advices throughout this thesis. It has been a great honor to work under her supervision.

The authors thank Dr. Sayed Abdel Raheem, Assistant professor of Histopathology at Al Azhar Faculty of Medicine, for scientific help in the histopathological assessment and Dr. Laila Rashed, Professor of Medical Biochemistry and Molecular Biology at Cairo University, faculty of medicine for scientific help in stem cell and biochemical studies.

Nahla Mohamed Hussien

List of Tables

Table No.	Title	Page No.
Table (1):	Initial Body Weight (IBW; gm), Final Body Weight (FBW; gm) and percent change in body weights (% change) in Control group.....	77
Table (2):	Initial Body Weight (IBW; gm), Final Body Weight (FBW; gm) and percent change in body weights (% change) in Ht-u group.....	78
Table (3):	Initial Body Weight (IBW; gm), Final Body Weight (FBW; gm) and percent change in body weights (% change) in Ht-SCs treated group.	79
Table (4):	Cumulative data Initial Body Weight (IBW; gm), Final Body Weight (FBW; gm) and percent change in body weights (% change) in Control, Ht-u and Ht-SCs treated groups.....	80
Table (5):	Right ventricular weight (RVW; mg), Right ventricular weight index (RVW/BW; mg/gm), Left ventricular weight (LVW; mg) and Left ventricular weight index (LVW/BW; mg/gm) in control group.	83
Table (6):	Right ventricular weight (RVW; mg), Right ventricular weight index (RVW/BW; mg/gm), Left ventricular weight (LVW; mg) and Left ventricular weight index (LVW /BW; mg/gm) in Ht-u group.	84
Table (7):	Right ventricular weight (RVW; mg), Right ventricular weight index (RVW/BW; mg/gm), Left ventricular weight (LVW; mg) and Left ventricular weight index (LVW /BW; mg/gm) in Ht- SCs treated group.	85
Table (8):	Cumulative data of Right ventricular weight (RVW; mg), Right ventricular weight index (RVW/BW; mg/gm), Left ventricular weight (LVW; gm) and Left ventricular weight index (LVW/BW; mg/gm) in Control, Ht-u and Ht-SCs treated groups.....	86
Table (9):	Changes in systolic blood pressure SBP (mmHg), diastolic blood pressure DBP (mmHg) and mean arterial blood pressure MAP (mmHg) recorded at the start of the study (initial), at 3 rd week and at 6 th week in control group.....	91
Table (10):	Changes in systolic blood pressure SBP (mmHg), diastolic blood pressure DBP (mmHg) and mean arterial blood pressure MAP (mmHg) recorded at the start of the study (Initial), at 3 rd week and at 6 th week in Ht-u group.....	92
Table (11):	Changes in systolic blood pressure SBP (mmHg), diastolic blood pressure DBP (mmHg) and mean arterial blood pressure MAP (mmHg) recorded at the start of the study (initial), at 3 rd week and at 6 th week in Ht- SCs treated group.....	93
Table (12):	Cumulative data of changes in systolic blood pressure SBP (mmHg) recorded at the start of the study (initial), at 3 rd week and at 6 th week in control, Ht-u and Ht- SCs treated groups.	94
Table (13):	Cumulative data of changes in diastolic blood pressure (DBP, mmHg) recorded at the start of the study (initial), at 3 rd week and at 6 th week in control, Ht-u and Ht- SCs treated groups.	95

List of Tables (Cont...)

Table No.	Title	Page No.
Table (14):	Cumulative data of changes in mean blood pressure (MAP, mmHg) recorded at the start of the study (initial), at 3 rd week and at 6 th week in control, Ht-u and Ht- SCs treated groups.	96
Table (15):	ECG records: Heart Rate (HR; bpm), PR interval duration (PR; msec), QRS complex duration (QRS; msec), R voltage (R; μ volt), QT interval observed duration (QT _o ; msec) and QT interval corrected duration (QT _c ; msec) in control group.	99
Table (16):	ECG records: Heart Rate (HR; bpm), PR interval duration (PR; msec), QRS complex duration (QRS; msec), R voltage (R; μ volt), QT interval observed duration (QT _o ; msec) and QT interval corrected duration (QT _c ; msec) in Ht-u group.	100
Table (17):	ECG records: Heart Rate (HR; bpm), PR interval duration (PR; msec), QRS complex duration (QRS; msec), R voltage (R; μ volt), QT interval observed duration (QT _o ; msec) and QT interval corrected duration (QT _c ; msec) in Ht- SCs treated group.	101
Table (18):	Cumulative data of ECG changes of Heart Rate (HR; bpm), PR interval duration (PR; msec), QRS complex duration (QRS; msec), R voltage (R; μ volt), QT interval observed duration (QT _o ; msec) and QT interval corrected duration (QT _c ; msec) in control, Ht-u and Ht- SCs treated groups.	102
Table (19):	Chronotropic activity (heart rate per minute; bpm) and percent change of heart rate (% change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in control group.	107
Table (20):	Chronotropic activity (heart rate per minute; bpm) and percent change of heart rate (% change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in Ht-u group.	108
Table (21):	Chronotropic activity (heart rate per minute; bpm) and percent change of heart rate (% change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in Ht- SCs treated group.	109
Table (22):	Cumulative data of chronotropic activity (heart rate per minute; bpm) and percent change of heart rate (% change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in control, Ht-u and Ht- SCs treated groups.	110
Table (23):	Peak Tension (PT; gm) and percent change of (PT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in control group.	114
Table (24):	Peak Tension/Left Ventricular Weight (PT/LVW; gm/100mg) and percent change of (PT/LVW; (% change) calculated from isolated hearts at pre ischemia, at 5min, at 15min and at 30min of reperfusion in control group.	115

List of Tables (Cont...)

Table No.	Title	Page No.
Table (25):	Peak Tension (PT; gm) and Percent change of (PT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in Ht-u group.	116
Table (26):	Peak Tension/Left Ventricular Weight (PT/LVW; gm/100mg) and percent change of (PT/LVW; % change) calculated from isolated hearts at pre ischemia, at 5min, at 15min and at 30 min of reperfusion in Ht-u group.	117
Table (27):	Peak Tension (PT; gm) and Percent change of (PT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in Ht-SCs treated group.	118
Table (28):	Peak Tension/Left Ventricular Weight (PT/LVW; gm/100mg) and Percent change of (PT/LVW; % change) calculated from isolated heart sat pre ischemia, at 5, at 15min and at 30 min of reperfusion in Ht-SCs treated group.....	119
Table (29):	Cumulative data of Peak Tension (PT; gm) and percent change of (PT;% change) calculated from isolated heart sat pre ischemia, at 5, at 15 and at 30 min of reperfusion in control, Ht-u and Ht- SCs treated groups.	120
Table (30):	Cumulative data of Peak Tension/Left Ventricular Weight (PT/LVW; gm/100mg)and percent change of (PT/LVW; % change) calculated from isolated heart sat pre ischemia, at 5, at 15 and at 30 min of reperfusion in control, Ht-u and Ht- SCs treated groups	121
Table (31):	Time to Peak Tension (TPT; msec) and percent change of (TPT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in control group.....	128
Table (32):	Half Relaxation Time (HRT; msec) and percent change of (HRT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated hearts in Control group.....	129
Table (33):	Time to Peak Tension (TPT; msec) and percent change of (TPT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht-u group.	130
Table (34):	Half Relaxation Time (HRT; msec) and percent change of (HRT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht-u group.....	131
Table (35):	Time to Peak Tension (TPT; msec) and percent change of (TPT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht- SCs treated group.	132
Table (36):	Half Relaxation Time (HRT; msec) and percent change of (HRT;% change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht- SCs treated group.	133

List of Tables (Cont...)

Table No.	Title	Page No.
Table (37):	Cumulative data of Time to Peak Tension (TPT; msec) and percent change of (TPT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in control. Ht-u and Ht- SCs treated groups.	134
Table (38):	Cumulative data of Half Relaxation Time (HRT; msec) and percent of change of (HRT; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in control, Ht-u and Ht- SCs treated groups.	135
Table (39):	Myocardial Flow Rate (MFR; ml/min) and percent change of (MFR; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in control group.	140
Table (40):	Myocardial Flow Rate/ Left Ventricular Weight (MFR/LVW; ml/min/100mg) and percent change of (MFRLVW; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in control group.	141
Table (41):	Myocardial Flow Rate (MFR; ml/min) and percent change of (MFR; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht-u group.	142
Table (42):	Myocardial Flow Rate/ Left Ventricular Weight (MFR/LVW; ml/min/100mg) and percent change of (MFRLVW; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht-u group.	143
Table (43):	Myocardial Flow Rate (MFR; ml/min) and percent change of (MFR; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht-SCs treated group.	144
Table (44):	Myocardial Flow Rate/ Left Ventricular Weight (MFR/LVW; ml/min/100mg) and percent change of (MFR/LVW; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in Ht-SCs treated group.	145
Table (45):	Cumulative data of myocardial Flow Rate (MFR; ml/min) and percent change of (MFR;% change)at pre ischemia, 5, 15 and 30 min of reperfusion calculated from isolated heart study in control, Ht-u and Ht-SCs treated groups	146
Table (46):	Cumulative data of myocardial Flow Rate/ Left Ventricular Weight (MFR/LVW; ml/min/100mg) and percent change of (MFR/LVW; % change) at pre ischemia, at 5, at 15 and at 30 min of reperfusion calculated from isolated heart study in control, Ht-u and Ht-SCs groups.	147
