The Effect Of Silver Diamine Fluoride On Bond Strength Of Universal Adhesive To Demineralized Dentin

(An In-Vitro Study)

Thesis

submitted to the Department of Operative Dentistry,
Faculty of Dentistry, Ain Shams University, in partial
fulfillment of the requirements for the Master's Degree in
Operative Dentistry.

By

Amany Yasser Radwan Mohamed

B.D.S., Ain Shams University (2014)

Demonstrator, Operative dentistry department,
Ain shams university.

2020

Supervisors

Dr. Khaled Aly Nour

Assistant Professor of Operative Dentistry Department
Faculty of Dentistry, Ain Shams University

Dr. Mohammed Nasser Mohammed Anwar

Lecturer of Operative Dentistry Department
Faculty of Dentistry, Ain Shams University

First of all, I am grateful to **Allah** for giving me the faith and patience to reach this point in my thesis.

I would like to express my deep gratitude to **Prof. Dr. Mokhtar Nagy Ibrahim**, I wish he was here with us today. May his soul rest in peace.

I would like to thank **Prof. Dr. Khaled Aly Nour** for his continuous support and guidance throughout the whole thesis.

I was honored to be one of master's candidates under supervision of **Dr. Mohammed Nasser Mohammed Anwar**, I really appreciate his endless help, support and efforts. I really owe you a lot.

Dedication

I dedicate this thesis to my dear parents whose affection, love and encouragement laid the foundation upon which this thesis came to reality and a special thanks to my brother and sister whom always encourage me when things seemed impossible.

Special thanks to my fiance Ramy El-adl for supporting me to complete this thesis and to reach such a success.

I would like to thank my dear friend Sarah Mohsen for the continuous support throughout the writing of this thesis.

I owe gratitude to my department and colleagues whose expertise and knowledge enriched this thesis and helped me on both the professional and personal levels.

List Of Content

List of Tables	III
List of Figures	IV
Introduction	1
Review of Literature	3
I-Features of demineralized dentin	5
II- Rational behind bonding to caries affected dentin.....	6
III- Challenges in bonding to demineralized dentin.....	7
IV- Remineralization strategy	8
V- Silver Diamine Fluoride (SDF) as a remineralizing agent.....	10
VI- The reaction of silver nitrate, sodium fluoride and silver diamine fluoride with hard dental tissues.....	11
VII- The advantages of SDF.....	15
VIII- The disadvantage of SDF.....	15
IX- The chemical reaction of SDF treated with KI.....	16
X- Application of Silver Diamine Fluoride.....	16
XI-Bonding to SDF treated surface.....	19
- Rinsing Versus Air-Drying Only.....	21
- Polishing the SDF-treated dentine surface.....	22
- adhesive protocol (Etch & rinse versus Self etch).....	22
Aim Of The Study	28
Materials And Methods	29
