**Ain Shams University
Faculty of Science
Chemistry Department**

**“Developing of Super-hydrophobic Nano Composite
Coatings for Energy Applications”**

Ph.D. Thesis

Submitted To

**Chemistry Department - Faculty of Science - Ain Shams
University for the degree of Doctor Philosophy (Ph.D.) in
Science (Chemistry)**

By

Mona Hasan Gomaa Ibrahim

Ass. Researcher at Corrosion Control and Surface
Protection Department-CMRDI

Supervisors

Prof. Dr.Sayed Sabet Abd El Rehim

Prof of physical chemistry-Chemistry Department-Faculty of
Science-Ain Shams University

Prof. Dr. Ahmed Zaki Ibrahim

Prof. of Material Engineering- Fermingdale University- United
States

Dr. Maamoun Abdelhamied Maamoun

Researcher at Corrosion Control and Surface
Protection Department-CMRDI

Approval sheet

Ph.D. Thesis

**“Developing of Super-hydrophobic Nano Composite
Coatings for Energy Applications”**

Submitted by

Mona Hasan Gomaa Ibrahim

M.Sc. in Chemistry (2014)

A Thesis for

Ph.D. Degree of Science in Chemistry

Thesis Supervisors

Approved

Prof. Dr. Sayed Sabet Abd El Rehim

.....

Prof. of physical chemistry-Chemistry Department-
Faculty of Science-Ain Shams University

Prof. Dr. Ahmed Zaki Ibrahim

.....

Prof. of Material Engineering- Fermingdale University
United States

Dr. Maamoun Abdelhamied Maamoun

.....

Researcher in Corrosion Control and Surface
Protection Department-CMRDI

Head of Chemistry Department

Prof. Dr. Ayman Ayuob Abdel-Shafi

Acknowledgement

Acknowledgment

First and foremost, praises and thanks to God, the Almighty, for His showers of blessings throughout my research work to complete the research successfully.

I would like to express my deep and sincere gratitude to my ideal, role model, inspiring and enduring encouragement ***Prof. Zeinab Abdel Hamid***, Head of Corrosion Control & Surface Protection Lab., Central Metallurgical Research & Development Institute (CMRDI), for her help, motivation, patience and encouragement and providing me with all the necessary facilities for the research, Without her precious support it would not be possible to conduct this research.

I wish to express my sincere thanks to ***Prof. Sayed Sabet Abdel Rehim***, (Professor of Physical Chemistry), Department of Chemistry, Faculty of Science, Ain Shams University for his valuable guidance, encouragement extended to me, valuable reviewing of this thesis.

I would like to express my sincere gratitude to ***Prof. Ahmed Zaki Ibrahim***, (Prof. of Material Engineering- Fermingdale University- United States), ***Dr. Maamoun Abdel Hamid***, (Doctor at Corrosion Control & Surface Protection Lab., Central Metallurgical Research & Development Institute (CMRDI), for their help, insightful comments and encouragement, but also for the hard question which incited me to widen my research from various perspectives.

I would like to express my sincere thanks to all of Corrosion Control & Surface Protection Lab. members especially ***Mr. Yehia Makhlouf Ali***, for his help and introducing all facilities and support.

A very special thanks to my family. Words cannot express how grateful I am to my dear husband (***Khaled El-Sayed***) for his encouragement, patience, non-stop help, and motivation, my lovely sons (***Omar&Ali***) for their spiritual encouragement. Great thanks to my mother, mother-in law, father-in-law, for their help and supporting. Also, I would like to thank my brother, sisters and sisters in-law for their continuous encouragement.

List of Contents

Contents

Chapter one “Introduction”

<i>1. Introduction</i>	<i>1</i>
------------------------	----------

Chapter Two “Literature Survey”

<i>2.1. Historical background</i>	<i>4</i>
<i>2.1.1. Lotus effect in plants</i>	<i>9</i>
<i>2.1.2. Lotus effect in animals and insects</i>	<i>11</i>
<i>2.2. Fundamental Principles of Superhydrophobicity</i>	<i>13</i>
<i>2.2.1. Wetting behavior on a solid surface</i>	<i>13</i>
<i>2.2.2. Wenzel Model</i>	<i>14</i>
<i>2.2.3. Cassie and Baxter model (CB model)</i>	<i>16</i>
<i>2.3. Main factors for SHS fabrication</i>	<i>18</i>
<i>2.3.1. Roughening a low surface energy material</i>	<i>19</i>
<i>2.3.1.1. Fluorocarbons</i>	<i>19</i>
<i>2.3.1.2. Organic materials</i>	<i>19</i>
<i>2.3.1.3. Inorganic materials</i>	<i>20</i>
<i>2.4. Deposition methods used to prepare the SHS</i>	<i>20</i>
<i>2.4.1. Sol-gel method</i>	<i>20</i>
<i>2.4.2. Electrospinning method</i>	<i>23</i>
<i>2.4.3. Spray method</i>	<i>25</i>
<i>2.4.4. Layer-by-layer method</i>	<i>26</i>
<i>2.4.5. Solution Immersion Method</i>	<i>28</i>
<i>2.4.6. Etching Technique</i>	<i>30</i>

<i>2.4.7. Chemical and physical Vapor deposition</i>	31
<i>2.5. Chemical and Electrochemical Deposition Techniques</i>	32
<i>2.5.1. Polyaniline films prepared by electrochemical method</i>	33
<i>2.5.2. Polypyrrole films prepared by electrochemical method</i>	35
<i>2.6. Factors affecting on the electrochemical synthesis of electroconducting polymers</i>	36
<i>2.6.1. Electrolyte composition</i>	37
<i>2.6.2. Electrode material</i>	38
<i>2.6.3. Electrochemical techniques</i>	39
<i>2.6.4. Doping anions</i>	42
<i>2.7. Mechanism of the electrochemical synthesis of polymers</i>	42
<i>2.7.1. Mechanism of the electrochemical polymerization of PANI</i>	42
<i>2.7.2. The mechanism of electrochemical synthesis of polypyrrole</i>	46
<i>2.8. Applications of SHS in different fields</i>	48
<i>2.8.1. Anti-biofouling applications</i>	49
<i>2.8.2. Self-cleaning</i>	50
<i>2.8.3. Anti-corrosion</i>	54
<i>2.8.4. Drag reduction</i>	55
<i>2.9. The stability of SHS</i>	56
<i>2.10. Challenges of superhydrophobic surface</i>	56

<i>2.11. Limitations of SHS using</i>	<i>57</i>
---------------------------------------	-----------

Chapter Three “Experimental Work”

<i>3.1. Chemicals and reagents</i>	<i>58</i>
<i>3.2. Synthesis of Nano particles (NPs)</i>	<i>58</i>
<i>3.2.1. Synthesis of TiO₂ NPs</i>	<i>58</i>
<i>3.2.2. Synthesis of ZnO NPs</i>	<i>60</i>
<i>3.2.3. Synthesis of GO nano sheets</i>	<i>62</i>
<i>3.3. Pre-treatment of electrode</i>	<i>63</i>
<i>3.4. Electrochemical polymerization Procedure</i>	<i>63</i>
<i>3.4.1. Electrochemical polymerization of aniline</i>	<i>63</i>
<i>3.4.2. Electrochemical polymerization of aniline / nanocomposites</i>	<i>64</i>
<i>3.4.3. Electrochemical polymerization of Pyrrole and its composites</i>	<i>65</i>
<i>3.5. Characterization Tools</i>	<i>67</i>
<i>3.5.1. X-Ray diffraction (XRD)</i>	<i>67</i>
<i>3.5.2. Field emission-scanning electron microscope (FE- SEM)</i>	<i>68</i>
<i>3.5.3. High resolution transmission Electron Microscopy (HR- TEM)</i>	<i>69</i>
<i>3.5.4. X-ray Photoelectron Spectrometer (XPS)</i>	<i>70</i>
<i>3.5.5. Fourier Transform Infrared Spectroscopy (FTIR) Analysis</i>	<i>71</i>
<i>3.5.6. Water Contact angle</i>	<i>72</i>

Chapter Four “ Results and Discussion”	
4.1. Nano powders Characterization	73
4.1.1. X-Ray Diffraction	73
4.1.2. HR-TEM Characterization	75
4.2. Electrochemical polymerization of PANI	76
4.2.1. Galvanostatic Mode	76
4.2.2. CV Technique and Electrochemical Polymerization	77
4.3. Effect of number of cycles in CV technique	78
4.4. Surface morphology of PANI film	81
4.5. XPS Analysis	84
4.6. Fourier Transform Infrared Spectroscopy (FTIR) of Pure PANI	87
4.7. Electrochemical polymerization of PANI/TiO₂ nanocomposites	88
4.7.1. Effect of TiO₂ content	88
4.7.2. Surface Morphology and WCA of PANI/ TiO₂ nanocomposites on ITO electrode	95
4.7.3. XPS of PANI/ TiO₂ nanocomposite	98
4.7.4. FTIR analysis of PANI/TiO₂ analysis	101
4.8. Electrochemical polymerization of PANI/ZnO nanocomposites	103
4.8.1. Effect of different contents of ZnO NPs	103
4.8.2. Surface Morphology and CA of PANI/ ZnO nanocomposites on ITO electrode	108
4.8.3. XPS of PANI/ ZnO nanocomposite	110
4.8.4. FTIR analysis of PANI/ZnO analysis	112
