Engineer's Name: Ahmed Hasan Sayed
Date of Birth: 29/9/1992
Nationality: Egyptian
E-mail: Ahmedhassan5674245@gmail.com
Phone: 01008701423
Address: 29-Al-Rahma Mosque Street- Giza-Egypt
Registration Date: 1/10/2016
Awarding Date:/....../2020
Degree: Master of Science
Department: Structural Engineering

Supervisors:

Prof. Dr. Mohamed Rabea Mahmoud

Examiners:

Prof .Dr. Mohamed Rabea Mahmoud (Thesis main advisor)
Prof. Dr. Mohamed Talat Mostafa (Internal examiner)
Prof. Dr. Gouda Mohamed Ghanem (External examiner)
(Professor of Concrete Structures, Helwan University)

Title of Thesis:

BEHAVIOR OF FLAT SLABS WITH SHEAR REINFORCEMENT IN PUNCHING

Key Words:

Shear reinforcement; Flat slab; Punching shear; Vertical stirrups; Punching shear capacity

Summary:

At this research, we have studied the effect of shear reinforcement in the shape of vertical stirrups on punching shear behavior of flat plates. In this regards eleven specimens were tested to study the effect of shear reinforcement on punching shear. Two specimens were the control specimens without vertical stirrups, the remnant specimens were reinforced with different arrangements of vertical stirrups. The variables which took into consideration at this research included stirrups spacing, slabs thickness, the width of stirrups, a cut-off distance of stirrups from column face, and the number of stirrups branches. The results indicated that there is a significant improvement in punching shear capacity of the slabs which were reinforced by vertical stirrups. As for, the theoretical part of the experimental results were analyzed and compared with the estimated values from guidelines of various global design codes as ECP, ACI, and BS code.

Disclaimer

I hereby declare that this thesis is my own original work and that no part of it has been submitted for a degree qualification at any other university or institute.

I further declare that I have appropriately acknowledged all sources used and have cited them in the references section.

ACKNOWLEDGMENTS

I would like to express my sincerest appreciation to my advisor (**Prof. Dr. Mohamed Rabea Mahmoud**) for his guidance, advice, support and valuable discussions review during my research, and his great efforts to achieve my objectives. His willingness to share his time and profound his insight into the subject matter contributed to making this study a positive learning experience.

I would like to present special thanks to (**Dr. Ahmed Afifi**) for his valuable help, guidance, continuous support, and encouragement in my life.

I want also to thank my father, especially my mother for her care and support all the time, and all my friends who always help me for success. I would not able to achieve this goal without their help and support.

Dedication

To my family, my brothers, my sister, and all my friends.
