**“Effect of Ionizing Radiation on Mechanical Properties of
Two Esthetic Restorative Materials and on Microhardness
and Surface Topography of Primary Teeth”**

A thesis submitted to the Department of Pediatric Dentistry and Dental
Public Health, Faculty of Dentistry, Ain Shams University

In

Partial fulfillment of the requirements for the Doctorate Degree in Pediatric
Dentistry

By

Basma Mahmoud Nashaat Nagi Ahmed

Assistant lecturer

Department of Pediatric Dentistry and Dental Public Health

Faculty of Dentistry, Ain Shams University

M.Sc, Faculty of Dentistry, Ain Shams University, 2015

B.D.S., Faculty of Dentistry, Ain Shams University, 2007

Faculty of Dentistry

Ain Shams University

2021

Supervisors

Dr. Amr Mahmoud Abdel-Aziz

Professor Emeritus of Department of Pediatric Dentistry and Dental Public Health

Faculty of Dentistry

Ain Shams University

Dr. Dalia Ibrahim El-Korashy

Professor and Head of Biomaterials Department

Faculty of Dentistry

Ain Shams University

Dr. Amin El Sayed Amin

Professor of Radiation Physics

Department of Radiation Oncology and Nuclear Medicine

Faculty of Medicine

Ain Shams University

Dr. Reham Khaled Elghazawy

Lecturer, Department of Pediatric Dentistry and Dental Public Health

Faculty of Dentistry

Ain Shams University

Dedicated to

My Father

Who taught me that Persistence and hard work are the essentials for a successful life.

My Mother

My first word, who always inspires me with her love, guidance and prayers.

My Husband

Without his love, encouragement, patience, tremendous support and help, this piece of work would have been a long lonely trip.

And last, but certainly not least, my beloved son and daughter

Ali & Nour

The joy of my life, whose smile always cheers me up, and pushes me forward.

Acknowledgment

First, I would like to express my greatest gratitude to the Almighty **ALLAH**, to whom I relate any success in achieving any work in my life.

I would like to express my sincere thanks and deepest gratitude to **Dr. Amr Abdel-Aziz**, Professor of Pediatric Dentistry and Dental Public Health Department, Ain-Shams University for his generous guidance and effort during my academic and clinical work.

I wish to extend appreciation to **Dr. Dalia El Korashy**, Professor and Head of Biomaterials Department, Ain-Shams University for her close supervision, great effort, support and generous advice through this work.

I deeply appreciate **Dr. Amin El Sayed Amin**, Professor of Radiation Physics, Department of radiation oncology and nuclear medicine, Faculty of Medicine, Ain Shams University for his support and advice

Dr. Reham Khaled Elghazawy Lecturer of Pediatric Dentistry and Dental Public Health, Faculty of Dentistry, Ain Shams University, for her patience, time, continuous education and sincere advice not only throughout the course of this work but ever since the first day I joined the department.

These acknowledgements would be incomplete without expressing my deepest appreciation to all my department staff and colleagues for their support and encouragement. And special thanks to ***Dr. Somaia Elsayed***, Fellow of medical physics and head of Radiation Physics unit, Department of radiation oncology and nuclear medicine, Faculty of Medicine, Ain Shams University for her valuable help.

List of Tables

Table NO.	Title	Page No.
1	Materials, compositions, and manufacturers.	36
2	Descriptive statistics for shear bond strength (MPa) of different groups	60
3	Three-way analysis of variance for the effect of different variables and their interactions on shear bond strength values (MPa)	61
4	Mean $\pm$ standard deviation (SD) of shear bond strength (MPa) for different groups	64
5	Descriptive statistics for flexural strength (MPa) of different groups	66
6	Two-way analysis of variance for the effect of irradiation condition, material, and their interactions on flexural strength values (MPa)	67
7	Mean $\pm$ standard deviation (SD) of flexural strength (MPa) for different groups	68
8	Descriptive statistics for microhardness of different restorative materials	70
9	Two-way analysis of variance for the effect of irradiation condition, material, and their interactions on microhardness.	71
10	Mean $\pm$ standard deviation (SD) of microhardness for different groups	72
11	Descriptive statistics for surface roughness of different groups	74

12	Two-way analysis of variance for the effect of irradiation condition, material, and their interactions on surface roughness.	75
13	Mean $\pm$ standard deviation (SD) of surface roughness for different groups.	76
14	Descriptive statistics for microhardness of different dental structures.	78
15	Two-way analysis of variance for the effect of irradiation condition, substrate, and their interactions on microhardness of dental structures	79
16	Mean $\pm$ standard deviation (SD) of microhardness in dental structures	80
17	Descriptive statistics for weight percentage (%) of different dental substrates	86
18	Mean $\pm$ standard deviation (SD) of weight percentage (%) in dental substrates	87

List of Figures

Figure NO.	Title	Page No.
1	X-tra fil composite	37
2	Ultra Etch	37
3	All bond universal	38
4	Equia Forte HT	38
5	Dentin conditioner	38
6	Equia forte coat	38
7	Flowchart of shear bond strength grouping	40
8	Prepared substrate for shear bond strength testing; a) Enamel, b) Dentin	42
9	LED 3M ESPE Elipar TM	43
10	Final specimen	44
11	Universal testing machine	45
12	Specimen setting in the universal testing machine	45
13	Specimen setting for irradiation	46
14	Flow chart showing the grouping of the flexural strength specimens	48
15	Spilt stainless steel mold for FS test	48
16	Digital micrometer	49
17	Flow chart showing the grouping of the microhardness specimens	52

18	Spilt stainless steel mold for microhardness and surface roughness test	52
19	Vicker's Microhardness Tester	54
20	Flow chart showing the grouping of the surface roughness specimens	55
21	Stereomicroscope	56
22	Scanning electron microscope	59
23	Bar chart showing average shear bond strength values (MPa) in different groups	65
24	Line chart showing average shear bond strength values (MPa) in different groups	65
25	Bar chart showing average flexure strength values (MPa) in different groups	69
26	Line chart showing average flexure strength values (MPa) in different groups	69
27	Bar chart showing average microhardness values in restorative materials	73
28	Line chart showing average microhardness values in restorative materials	73
29	Bar chart showing average surface roughness values in different groups	77
30	Line chart showing average surface roughness values in different groups	77
31	Bar chart showing average microhardness values in dental structures	81
32	Line chart showing average microhardness values in dental structures	81

33	SEM of enamel at magnification of 1000X (A, B, C) for non-irradiated enamel.	82
34	SEM of enamel at magnification of 1000X (A, B, C) for irradiated enamel.	83
35	SEM of dentin at magnification of 1000X (A, B, C) for non-irradiated dentin.	84
36	SEM of dentin at magnification of 1000X (A, B, C) for irradiated dentin.	85
37	Bar chart showing average weight percentage (%) values in dental substrates	88
38	EDX of non-irradiated enamel	89
39	EDX of irradiated enamel	89
40	EDX of non-irradiated dentin	90
41	EDX of irradiated dentin	90

List of Abbreviations

1. μm = micrometer
2. AFM= atomic force microscopy
3. ANOVA = Analysis of variance.
4. Bis-EMA = Bisphenol A ethoxylated dimethacrylat
5. Bis-GMA = Bisphenol glycidyl methacrylate.
6. C=carbon.
7. Ca =calcium.
8. DEJ= Dentioenamel junction
9. EBPDMA = ethoxylated bisphenol-A-dimethacrylate
10. EDX= Energy Dispersive X-ray spectroscopy
11. FTIR= Fourier transform infrared spectroscopy
12. GIC= Glass ionomer cement
13. Gy = Grays
14. h = Hour
15. HNC = head and neck cancer
16. HSV= Herpes simplex virus
17. HVGIC= High viscous glass ionomer cement.
18. ICP-OES= Inductively Coupled Plasma-Optical Emission Spectrometry
19. ISO =International Standards Organization
20. IU= international unit
21. KHN = Knoop Hardness Number.
22. LCU =Light curing unit
23. LED =Light emitting diodes.
24. min = minutes.
25. mm = millimeters.
26. MPa = Mega Pascal.
