SHEAR BOND STRENGTH OF BONDED ESTHETIC
RESTORATIVE MATERIALS USING NEW
GENERATIONS OF ADHESIVE SYSTEMS.

13/11/95

Thesis
Submitted in partial fulfillment for The Requirement
of
Master Degree
In
Conservative Dentistry

By
Nabil Abdel Maksoud Soliman
B.D.S., Tanta University
(1995)

Faculty of Dentistry
Tanta University

2002

SUPERVISORS

Prof. Dr. AMINA. EL-MISSIRY
Professor of Conservative Dentistry
Faculty of Dentistry
Tanta University

Dr. WEDAD M. ETMAN
Associate Professor of Conservative Dentistry
Faculty of Dentistry
Tanta University

Dr. RANY A. ABDELMOHSEN
Lecturer of Conservative Dentistry
Faculty of Dentistry
Tanta University

وما أوثق من العلم إلا قليلا
صدق الله العظيم

DEDICATION

Dedicated to my family for their love,
understanding and support.

Acknowledgment

I am thankful to *GOD* whose care is essential guidance in my life and in every step.

My deepest thanks and gratitude goes to *Prof. Dr. Amin El-Missiry* Professor of Conservative Dentistry, Faculty of Dentistry, Tanta University for his kind supervision, generous assistance, endless cooperation, valuable instructions and suggestions during the course of this research.

I would like to express my deepest gratitude and thanks to *Assoc. Prof. Dr. Wedad Etman*, Conservative Dentistry, Faculty of Dentistry, Tanta University for her kind help and fruitful encouragement and valuable time she offered me all the way.

I wish to express my deepest gratitude to *Dr. Hany Abdel-Mohsen* Lecturer of Conservative Dentistry, Faculty of Dentistry, Tanta University for his great help in the creation of this work.

I am so grateful to *Staff Members* of Conservative Dentistry Department, Faculty of Dentistry, Tanta University.

I am also grateful to *Prof. Dr. Oraby Husein*, Geology Department, Faculty of Science, Monofia University for his help in streomicroscopic examination of sectioned samples.

Finally I must thank *my parents* for their valuable encouragement and their noble feeling towards me and my work.

Contents

Subject	Page
I Introduction	1
II Review of Literature	6
- Composite Resins	6
- Ceramics	15
- Adhesion	18
- Dentine Bonding Agents	22
- Shear Bond Strength	27
- Cements	29
III Aim of the Work	31
IV Materials and Methods	32
Part I: Evaluation of shear bond strength of TARGIS, DUCERAM and ISOSITE	35
Part II: Evaluation the mode of the bond failure patterns in the tested groups	50
V Results	51
VI Discussion	68
VII Summary and Conclusion	77
VIII References	80
Arabic Summary.	

List of Figures

Fig. No.	Subject	Page
1	Showing light stereiomicroscope	34
2	Flat dentine specimen embedded in acrylic resin cylinder ...	36
3a	Showing the split brass mould and dimensions desired to obtain a wax pattern	37
3b	Showing the device completely mounted together ready-to make the wax patterns	37
4	Showing molten blue wax in the mould cavities	39
5	Showing Duceram-lay superfit porcelain refractory	39
6	Showing Jelenko-Auto II VPF porcelain furnace	40
7	Showing Duceram-LFC low fusion porcelain kit	41
8	Showing the shofu cerasomonic condenser	41
9	Showing single bond dental adhesive system	44
10	Application of etching gel of single bond on dentine surface	44
11	Showing application of adhesive liquid of single bond on dentine surface	11
12	Showing 3M Rely X ARC cement	45
13	Showing Etch and prime adhesive system	13
14	Showing the universal test machine used to calculate the shear bond strength values	49
15	Showing a specimen attached to the universal testing machine during testing	49
16	Shear bond strength of different materials using no bonding agent	53
17	Shear bond strength of different materials using single bond agent	54

Fig. No.	Subject	Page
18	Shear bond strength of different materials using prime and etch	56
19	Shear bond strength of Targis using different bonding agents	57
20	Shear bond strength of Duceram using different bonding agents	58
21	Shear bond strength of Isosite using different bonding agents	60
22	Shear bond strength of different materials using different bonding agents	61
23	Showing detached Isosité disc leaving patches of the single bond adhesive system on the dentine surface	63
24	Showing detached Targis restoration leaving patches of the single bond adhesive system	63
25	Showing adhesive failure with a clean dentinal surface	64
26a	Showing detached Targis disc with patches of Etch and prime adhesive system on the dentine surface	66
26b	Showing detached Targis disc with a clean surface of restoration	66
27a	Showing detached porcelain disc with patches of Etch and prime adhesive system on the dentine surface	67
27b	Showing detached porcelain disc with patches of Etch and prime adhesive system on the surface of restoration	67

List of Tables

Table No.	Subject	Page
(1)	Materials used in the present study	32
(2)	Mean and standard deviation of tested groups	51
