Acknowledgment

Thanks **God** who allowed and helped me to accomplish this work.

I would like to express my sincere appreciation and deep gratitude to **Prof. Dr. Saleh Mohamed Hassan El-Shiemy**, Professor of Dermatology and Venereology, Faculty of Medicine, Ain Shams University, for his helpful supervision and valuable instructions through this work.

My special thanks and appreciation for **Dr. Ashraf Afifi hassan**, Lecturer of Dermatology and Venereology, Faculty of Medicine, Ain Shams University, for his kind supervision, great cooperation, sincere encouragement, and moral support that made the accomplishment of this work possible.

It gives me a great pleasure to express my deep gratitude to **Dr. Amany Tharwet Abd El-Rahman**, Lecturer of Microbiology and Immunology, Faculty of Medicine, Ain Shams University, for her kind advice, valuable instructions, and her great effort during this work.

Riham El Kady

List of Tables

No.	Table	Page
Table (1):	Relationship between clinical features and site of disease activity in psoriasis of the nail.	35
Table (2):	Direct microscopy with 20% KOH of 50 cases of psoriasis with toe nail involvement.	70
Table (3):	Prevalence of onychomycosis in male and female cases of psoriasis with toe nail affection.	73
Table (4):	Culture of 50 cases of psoriasis with toe nail affection on Sabouraud dextrose agar.	75
Table (5):	Classification of 23 positive culture isolated fungi of patients with psoriatic nails into genera and species.	77
Table (6):	Culture of 50 cases of toe nail onychomycosis on Sabouraud dextrose agar.	80
Table (7):	Classification of 50 positive culture isolated fungi of onychomycosis into genera and species.	82
Table (8):	Direct microscopy with 20% KOH of 20 control subjects.	85
Table (9):	Culture of 20 control subjects on Sabouraud dextrose agar and their identification.	87
Table (10):	Isolated fungi in patients with onychomycosis and patients with psoriatic nails.	88
Table (11):	Proportion of dermatophytes in group (1) and group (2).	89
Table (12):	Proportion of non-dermatophyte molds in group (1) and group (2).	89
Table (13):	Proportion of yeast in group (1) and group (2).	90
Table (14):	Proportion of mixed isolates in group (1) and group (2).	90
Table (15):	Proportion of dermatophyte species in group (1) and group (2).	91
Table (16):	Proportion of species of non-dermatophyte molds in group (1) and group (2).	92
