MONA MAGHRABY

Ghrelin/Obestatin Ratio as a Potential Mediator for Food Intake and Fat Distribution among Obese Children

Thesis

Submitted for Fulfillment of Ph.D. Degree of Childhood Studies
Faculty of Postgraduate Childhood Studies
Child health and nutrition

By

Ayat Nageeb Kamal
Researcher Assistant, Biological Anthropology Department
National Research Centre

Supervisors

Prof. Dr. Gamal Samy Aly
Professor of Pediatrics, Faculty of Postgraduate Childhood Studies, Medical studies department, Ain Shams University

Prof. Dr. Nayera EL-Morsi Hassan
Professor of Biological Anthropology,
Department of Biological Anthropology
National Research Centre

Prof. Dr. Ghada Muhammed Anwar
Professor of Pediatrics
Diabetes & Endocrinology Unit - Cairo University

Dr. Reham Sabry Abdelaal
Lecturer of Pediatrics, Faculty of Postgraduate Childhood Studies, Medical studies department, Ain Shams University

Faculty of Postgraduate Childhood Studies – Ain Shams University

2019

سورة البقرة الآية: ٣٢

Acknowledgment

First, grace and foremost thanks to Allah for blessing this work until it has reached its end, as a part of his generous help throughout my life.

My profound gratitude is to ***Prof. Dr. Gamal Samy Aly*** *Professor of Pediatrics, Faculty of Postgraduate Childhood Studies, Ain Shams University for his continuous help and supervision all through this study.*

I would like to express my sincere appreciation to ***Prof. Dr. Nayera El-Morsi Hassan,*** *Professor of Biological Anthropology, National Research Center, for her valuable instructions, inspiring guidance, encouragement and support throughout this work.*

My profound gratitude is to ***Prof. Dr. Ghada Muhammed Anwar,*** *Professor of Pediatrics, Cairo University for her kind help, advice and guidance.*

I would like to express my great thankfulness to ***Dr. Reham Sabry Abdelaal,*** *Lecturer of Pediatrics, Faculty of Postgraduate Childhood Studies, Ain Shams University whose continuous supervision, advice and fruitful criticism have been of great help in performing this work.*

I would also like to thank the experts at the National Research Center who were kindly involved in the research work: ***Prof. Sahar Abd-El-Rauf El-Masry,*** *Professor and Head of Biological Anthropology Department, National Research Centre,* ***Prof. Hanaa Hamdy Ahmed,*** *Professor and Head ofHormones Department, National Research Centre,* ***Dr. Nehad Hassan Ahmed*** *Assistant Professor of, Nutrition and food science, National Research Centre,* ***Prof. Dr. Rokia Abdelshafy Elbana,*** *Professor of Biological Anthropology, National Research Centre. Without their passionate participation and input, this work could not have been successfully conducted.*

Ayat Nageeb

Dedication

To my dear ***Father & Mother,*** ***lovely sisters,*** *my* ***dear mother in law*** *and my* ***sweet children***

To my dear ***Mohamed*** *whose kindness and support will always be remembered.*

List of Tables

Table No.	Title	Page No.
Table (1):	IDF consensus definition of the Metabolic Syndrome in children and adolescents	30
Table (2):	Estimated Average Requirement (EAR) of Energy for children in the UK	42
Table (3):	Dietary Reference Intake of Energy in Childhood	43
Table (4):	Updated definitions of BP categories and stages in children	56
Table (5):	Selected clinical findings associated with nutritional deficiencies, adapted from	57
Table (6):	Laboratory testing in the work-up of the overweight child	69
Table (7):	Mean age difference between cases and control	116
Table (8):	Family history in the obese and control group	117
Table (9):	Comparison between obese and control children regarding blood pressure and studied anthropometric parameters	118
Table (10):	Comparison between obese and control children regarding Peripheral and Central subcutaneous fat	122
Table (11):	Comparison between obese and control children regarding the studied appetite hormones; Ghrelin, Obestatin and Ghrelin/Obestatin ratio	124

List of Tables (Cont...)

Table No.	Title	Page No.
Table (12):	Comparison between obese and control children regarding fasting serum Insulin, fasting serum Glucose and Insulin resistance (HOMA)	125
Table (13):	Comparison between obese and control children regarding their lipid profile	128
Table (14):	Comparison between obese and control subjects regarding daily nutrients intake and recommended dietary allowances (RDA)	130
Table (15):	Comparison between obese and control subjects regarding daily Protein Fat and Carbohydrate energy intake (Kcal)	135
Table (16):	The percent of the frequency consumption of different food items among sample under study	136
Table (17):	Comparison between obese males and females regarding age, blood pressure, studied anthropometric parameters	139
Table (18):	Comparison between obese males and females regarding laboratory parameters	140
Table (19):	Comparison between males and females in the control group regarding age, blood pressure and anthropometric parameters	142
Table (20):	Comparison between males and females in the control group regarding laboratory parameters	143

List of Tables (Cont...)

Table No.	Title	Page No.
Table (21):	Comparison between obese and control subjects in the males group regarding age, blood pressure and studied anthropometric parameters	144
Table (22):	Comparison between obese and control subjects in the males group regarding laboratory parameters	147
Table (23):	Comparison between obese and control subjects in the males group regarding daily nutrients intake and recommended dietary allowances (RDA)	150
Table (24):	Comparison between obese and control subjects in the females group regarding age, blood pressure and anthropometric parameters	154
Table (25):	Comparison between obese and control subjects in the females group regarding laboratory results	157
Table (26):	Comparison between obese and control subjects in the females group regarding daily nutrients intake and RDA	160
Table (27):	Correlation between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and age, blood pressure, anthropometry in the obese and control groups	164
Table (28):	Partial Correlation (adjusted age) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and blood pressure, anthropometry in the obese and control groups	166

List of Tables (Cont...)

Table No.	Title	Page No.
Table (29):	Partial Correlation (adjusted age and sex) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and blood pressure, anthropometry in the obese and control groups	168
Table (30):	Correlation between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and other laboratory results in the obese and control groups	170
Table (31):	Partial Correlation (adjusted age) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and laboratory parameters in the obese and control groups	172
Table (32):	Partial Correlation (adjusted age and sex) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and laboratory parameters in the obese and control groups	173
Table (33):	Correlation between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and daily nutrient intake in the obese and control groups	174
Table (34):	Partial Correlations (adjusted age) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and and daily nutrient intake in the obese and control groups	180
Table (35):	Partial Correlations (adjusted age and sex) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and and daily nutrient intake in the obese and control groups	182

List of Tables (Cont...)

Table No.	Title	Page No.
Table (36):	Correlation between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and calories delivered from proteins, fats and carbohydrates in the obese and control groups	184
Table (37):	Partial Correlation (adjusted age) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and calories delivered from proteins, fats and carbohydrates in the obese and control groups	186
Table (38):	Partial Correlation (without age and sex effect) between Ghrelin, Obestatin, Ghrelin/Obestatin ratio and calories delivered from proteins, fats and carbohydrates in the obese and control groups	187
Table (39):	Correlation between total Energy, Proteins, Fat, Carbohydrates calories and anthropometric parameters in the Obese group	188
Table (40):	Partial Correlation (age) between Energy, Proteins, Fat, Carbohydrats calories and studied anthropometric parameters in the obese group	192
Table (41):	Partial Correlation (adjusted age & sex) between Energy, Proteins, Fat, Carbohydrates calories and studied anthropometric parameters in the obese group	193
Table (42):	Correlation between Energy, Proteins, Fat, Carbohydrates calories and studied anthropometric parameters in the control group	194

List of Tables (Cont...)

Table No.	Title	Page No.
Table (43):	Partial Correlation (age) between Energy, Proteins, Fat, Carbohydrates calories and studied anthropometric parameters in the control group	195
Table (44):	Partial Correlation (adjusted age & sex) between Energy, Proteins, Fat, Carbohydrates calories and studied anthropometric parameters in the control group	196
Table (45):	Correlation between Energy, Proteins, Fat, Carbohydrates calories and laboratory results in the obese group	197
Table (46):	Partial Correlation (adjusted age) between Energy, Proteins, Fat, Carbohydrates calories and laboratory results in the obese group	198
Table (47):	Partial Correlation (adjusted age &sex) between Energy, Proteins, Fat, Carbohydrates calories and laboratory results in the obese group	199
Table (48):	Correlation between Energy, Proteins, Fat, Carbohydrates calories and laboratory results in the control group	200
Table (49):	Partial Correlation (adjusted age) between Energy, Proteins, Fat, Carbohydrates calories and laboratory results in the control group	201
Table (50):	Partial Correlation (adjusted age &sex) between Energy, Proteins, Fat, Carbohydrates calories and laboratory results in the control group	202

List of Tables (Cont...)
