## **Acknowledgement**

First and foremost, thank you God, Almighty, for your showers of blessings throughout my life. Thank you, God, for your strength, wisdom, knowledge and support in helping me surpass all the encountered trials and for giving me the will power to pursue this research and make it happen.

I would like to dedicate this thesis to my precious daughter and outstanding parents whom I would not have been able to accomplish this without them.

A special thanks goes out to my mother, Soheir Daniel and father, Moody Hakim whom have been my support system through thick and thin. I do not know where I would have been without you. Thank you to my outstanding mother for being my rock through it all, without your persistence and moral support, I wouldn't have been where I am today. Thank you to my fighter of a father who has always taught me to never give up and chase my dreams till my very last breath. Without both of your presence, my thesis would not have been possible.

Thank you my daughter, Miriam Ibrahim, for keeping up with my triumphant journey through writing this thesis. You have been my source of motivation and inspiration through it all and thank you for pulling up an all-nighter with me through these past couple of years. You have always been my support system through every journey I encountered.

This thesis is also dedicated in memory of my loving grandfather, Agban Daniel who was a great believer in the power of women's education. I am sure you would have been very proud of me.

I would like to express my deep and sincere gratitude to my supervisors Professor Dr. Dina Farouk Abou Zeid and Dr. Menna AbdelHamid. Professor Dr. Dina Farouk Abou Zeid, your continuous meticulous feedback, patience and motivation was outstanding. You showered me with passion and knowledge. It was my ultimate honor to be supervised by such an impeccable Professor. Dr. Menna AbdelHamid, your guidance was much appreciated throughout this journey. Thank you for believing in me and my research topic and thank you for always giving me sound advice. A special thanks goes to the esteemed panel, Professor. Dr. Amany Fahmy for her continuous support during my entire PhD process and Dr. Shereen Omer for her encouragement.

In addition, I would like to take this opportunity to thank Eng. Magdy Nassif for his patience and support throughout the entire research process. As for Eng. Madonna Nabil, my sister and best friend, you were the one that continuously calmed me down during hardships and encouraged me at all times. Last but not least, a special thanks to Assam Salman for helping me stay motivated and encouraged every step of the way. As well as Nehal El Gendi and Hanan El-Laithy for their continuous support throughout this thesis.
