CFRP STRENGTHENING OF STEEL-RC COMPOSITE BEAMS- A PARAMETRIC STUDY

By

Mona Mahmoud Abdel Fattah

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
STRUCTURAL ENGINEERING

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT

2021

**CFRP STRENGTHENING OF STEEL-RC COMPOSITE
BEAMS- A PARAMETRIC STUDY**

By

Mona Mahmoud Abdelfattah

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
STRUCTURAL ENGINEERING

Under the Supervision of

Prof. Dr. Walid AbdLatif Attia

Prof. Dr. Metwally Abd EL Aziz

Professor of
Structural Engineering Department
Faculty of Engineering, Cairo University

Professor of
Structural Engineering Department
Faculty of Engineering, Cairo University

Dr. Mohamed Mohieeldien

Professor of
Civil Engineering Department
Faculty of Engineering, Beni-Suef University

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT

Engineer's Name: Mona MahmoudAbdElfattah
Date of Birth: 21/04/1980
Nationality: Egyptian
E-mail: mona.htc21@gmail.com
Phone: 0100391293
Address: Eladwa, fayoum -EGYPT
Registration Date: 1/3/2014
Awarding Date:/....../2021
Degree: Master of Science
Department: Structural Engineering

Supervisors:

Prof. Dr. Walid AbdLatif Attia
Prof. Dr .Metwally Abd ELAziz
Dr .Mohamed Mohieeldien
(Faculty of Engineering, Beni-Suef University)

Examiners:

Prof. Dr. Walid AbdLatif Attia(Thesis main advisor)

Prof. Dr. Hazem Mostafa Ramadan (Internal examiner)

Dr.Kamal Ghamry Metwally(External examiner)
Associate Prof.at Faculty of Engineering, Beni-Suef
University

Title of Thesis:

CFRP Strengthening of Steel-RC Composite Beams- A Parametric Study

Key Words:

Composite I -beam; Strengthening; Non-linear analysis; Fiber; I-beam;

Summary:

The thesis presents an analytical investigation for the flexural capacity of composite I beams and straight beams with Carbon fiber reinforcement polymer. A non-linear finite element model has been established considering several parameters: beam dimension, Length thickens the layer of carbon, to study the flexural strength for the I-beam composite restrained compression flange.

Disclaimer

I hereby declare that this thesis is my original work and that no part of it has been submitted for a degree qualification at any other university or institute.

I further declare that I have appropriately acknowledged all sources used and have cited them in the references section.

Name: Mona Mahmoud Abd El fattah

Signature:

Dedication

I would like to dedicate this thesis to **my father,mother,brother,and sister** for their hopes and encouragement and are always behind me for success. I would not have achieved this work without their help.

Acknowledgments

I would like to express my sincere gratitude to my advisors **Prof. Dr. Walid AbdLatif Attia, Prof. Dr. Metwally Abd EL Aziz & Dr. Mahammed Mohie**, for their guidance, support, encouragement, valuable discussion and review during this work, and great efforts to accomplish the thesis objectives.
