Detection of dental rough surface shift using laser speckle photography technique

A Thesis Submitted to Faculty of Science-Ain Shams University in partial fulfillment for the Degree of Master of Science (M.Sc.) in Biophysics

By

Nouran Esmat Sayed Mahmoud

B.Sc. in Physics
Faculty of Science- Ain Shams University 2014

Supervised by

Prof. Dr. Abdelsattar Mohamed Sallam

Professor of Biophysics
Physics Department, Faculty of Science-ASU

Prof. Dr. Hatem Mahmoud El-Ghandour

Professor of Physics
Physics Department, Faculty of Science-ASU

Assoc. Prof. Dr. Nasser Hussein Ali

Associate professor in fixed prosthodontics Department
Misr University for Science and Technology

2020

Ain Shams University
Faculty of Science
Physics Department

Approval Sheet

Degree: M. SC.

Title: Detection of dental rough surface shift using laser
Speckle photography Technique

Name: Nouran Esmat Sayed Mahmoud

Supervisors

Signature

Faculty of Dentistry
Misr for Science and Technology University

.....

Ain Shams University
Faculty of Science
Physics Department

Name: Nouran Esmat Sayed Mahmoud

Degree: Master's degree

Department: Physics

Faculty: Science

University: Ain Shams

Graduation date: 2014

Registration date: 2016

Grant date: 2020

Acknowledgement

In the beginning, I bow head thanking to “Allah” who paved the way and only by his will everything can be achieved.

Deep thanks and sincere gratitude with appreciating to Prof. Dr. Abdelsattar Mohamed Sallam , Professor of Biophysics, Faculty of Science, Ain Shams University. This work would not have been possible without his guidance, support and encouragement. For his effective supervision, helpful comments, and the extensive time he devoted to this work, providing many facilities during preparation and experimental measurements, and scientific supervision that helped to accomplish this study.

I would like to express my deeply grateful and respect to Prof. Dr. Hatem Mahmoud El-Ghandour, Professor of Optics Physics, Faculty of Science, Ain Shams University, for giving me this opportunity to work under his esteemed guidance, for suggesting the work and supervising it, for useful comments and helping during the course of this work. Under his supervision I learned how to overcome many difficulties in my work.

I would like to express my deeply grateful and respect to Assoc. Prof. Dr. Nasser Hussein Ali. I wish to express profound gratitude for his constant encouragement and critical discussions throughout this research program and during the preparation of this thesis.

I would like to thank and appreciate Assoc. Prof. Dr. Alaa Elsisi I truly appreciate him and his time he spent helping me in my work.

I would like to express my deeply grateful and respect to Prof. Dr. Gehan Mohamed for her help , patient guidance , advice and assistance in my work.

I would like to express my deeply grateful and respect to Prof. Dr. Oziris Wanees for his useful comments and helping.

Finally, no words can describe how thankful I'm to my family, my lovely husband and my lovely son for their help, encouragement and inspiration to accomplish all work.

 Nouran Esmat

Dedication

I would like to dedicate this work to

My family; Dad, Mum, Sisters, Esmat , Seham and my sisters Shaimaa , Ebtihal and Zahraa for their lifelong love and support without boundaries which have always been a source of motivation and happiness for me , without them after Allah this work would have been completed .

I would like to send special thanks, full of gratitude and love, to my lovely Husband Mohamed for his love, support and care and also I would like to send special thanks my son Adam for his pure smile, lovely warm Hugs and love which helped me to continue.

Finally I would like also to dedicate this work to my Husband's family for their love and support.

LIST OF CONTENTS

<i>Title</i>	<i>Page No.</i>
Acknowledgement	i
Dedication.....	ii
Contents	iii
List of Tables	v
List of Figures	vi
List of Abbreviations	ix
Abstract.....	x
Chapter I	
Introduction and Literature Review	
1.1 Introduction.....	1
1.2 Literature Review	2
Chapter II	
Theoretical Aspects	
2.1 LASER speckles	10
2.1.1 Formation of LASER speckles pattern and their characteristics	12
2.2 Interaction of LASERs with dental hard tissues	16
2.3. Enamel and dental composition as the basis for laser interaction dental.....	16
2.4. Objective and subjective speckles.....	18
2.5. Speckle photography.....	20
2.6. Advantages and applications of speckle photography	21
2.7. Elastic properties and hardness of enamel and dentin.....	23
2.8. Deformation of whole teeth under load.....	24
2.9 Tooth deformation due to load applied.....	28

Chapter III	
Materials and Methods	
3.1. Materials	29
3.1.1 Extracted teeth	29
3.1.2 LASER source	31
3.1.3 Digital camera.....	31
3.1.4 Image processing computer program	31
3.1.5 Finite element analysis.....	31
3.2 Methods	32
3.2.1 Construction of teeth blocks	32
3.2.2 Construction of holding device	33
3.2.3 LASER light application.....	34
3.2.4 Application of load	34
3.2.5 Imaging tooth surface	35
3.2.6 Image analysis (management).....	36
3.2.7 Finite element analysis.....	37
Chapter IV	
Results and Discussion	
Results	44
Discussion	68
Conclusion	71
Advantages of the system	71
References.....	72
Arabic Summary	--

LIST OF TABLES
