2020

Ain Shams University

Faculty of Nursing

Assessment of Nurses' knowledge and Practices Regarding Care of Children Undergoing Gastrointestinal Surgeries

Thesis

Submitted for Partial Fulfillment of the Requirements for the Master Degree in Pediatric Nursing

Supervised by

Prof. Dr. Eman Amin Mouhamed

Professor of Pediatric Nursing
Faculty of Nursing- Ain Shams University

Prof. Dr. Salma Elsayed Hassan

Professor of Pediatric Nursing
Faculty of Nursing- Ain Shams University

**Faculty of Nursing
Ain Shams University**

2020

Acknowledgment

First, I feel always indebted to **Allah**, the most kind and the most merciful

I am deeply grateful to **Prof, Dr. Eman Amin** Professor of Pediatric Nursing Faculty of Nursing, Ain Shams University, for the constructive criticism, unlimited help and giving me the privilege to work under her supervision.

I would like to express my deep appreciation and gratitude to **Prof, Dr. Salma Elsayed Hassan** Professor of Pediatric Nursing, Faculty of Nursing, Ain Shams University, for her supervision, guidance and support through the study.

I would like to express my deep appreciation and gratitude to all children and nurses who participated as the study subject.

List of contents

List of contents	i
List of Tables	iii
List of Figure	vi
List of Abbreviations	vii
Operational Definition.....	viii
Abstract.....	xiii
Introduction	14
Aim of the Study.....	20
Review of literature.....	22
Introduction:	23
History of Gastrointestinal Surgeries:	25
Anatomy and physiology of the digestive system:.....	26
Cleft lip (CL) and palate (CP):	32
Diseases and congenital anomalies in Esophagus:	44
Definition of Corrosive esophageal obstruction:	44
Diaphragmatic disease:	63
Pyloric diseases or anomalies:	72
Hypertrophic pyloric stenosis (HPS):.....	72
Intestinal congenital anomalies & diseases:	77
Definition of Intussusceptions:	88
Imperforated Anus:	95
Subjects and Methods	107
Results	116

Discussion	145
Conclusion and Recommendations	162

Arabic Summery	1

List of Tables

Table (1): Distribution of the studied nurses according to their characteristics (n= 60) -----	118
Table (2): Distribution of the studied children according to their diagnosis -----	119
Table (3): Distribution of the studied nurses according to their knowledge about cleft lip (n= 60)-----	120
Table (4): Distribution of studied nurses according to their knowledge about cleft palate (n= 60)-----	121
Table (5): Distribution of the studied nurses according to their knowledge about esophageal atresia (n= 60) -----	122
Table (6): Distribution of the studied nurses according to their knowledge about gastrostomy (n= 60) -----	123
Table (7): Distribution of the studied nurses according to their knowledge about corrosive esophageal obstruction (n= 60) -----	124
Table (8): Distribution of the studied nurses according to their knowledge about pyloric stenosis (n= 60) -----	125
Table (9): Distribution of the studied nurses according to their knowledge about intestinal obstruction (n= 60)-----	126
Table (10): Distribution of the studied nurses according to their knowledge about Hirschsprung's disease (n= 60)-----	127
Table (11): Distribution of the studied nurses according to their knowledge about intussusceptions' (n=60)-----	128
Table (12): Distribution of the studied nurses according to their total knowledge about gastrointestinal diseases in children (n= 60)-----	129
Table (13): Distribution of the studied nurses according to their actual practice related to pre and post-operative care of children undergoing gastrointestinal surgeries (n= 60) -----	130

List of Tables

Table (14): Distribution of the studied nurses according to their actual practice related to oropharyngeal suction (n= 60) -----	131
Table (15): Distribution of the studied nurses according to their actual practice related to pediatric patient care with gastrostomy. (n= 60) -----	132
Table (16): Distribution of the studied nurses according to their actual practice related to gastrostomy feeding (n= 60) -----	133
Table (17): Distribution of the studied nurses according to their actual practice related to gavages' feeding (n= 60) -----	134
Table (18): Distribution of the studied nurses according to their actual practice related to colostomy care (n=60). -----	135
Table (19): Distribution of the studied nurses according to their actual practice related to wound dressing (n= 60). -----	136
Table (20): Distribution of the studied nurses according to their total actual practice regarding care of children undergoing gastrointestinal surgeries (n= 60). -----	137
Table (21): Correlation between the studied nurses' age and their total knowledge regarding care of children undergoing gastrointestinal surgeries (n= 60).-----	138
Table (22): Correlation between the studied nurses' years of Experience and their total knowledge regarding Care of children undergoing gastrointestinal Surgeries (n= 60).-----	139
Table (23): Correlation between the studied nurses' Qualification and their total knowledge regarding Care of children undergoing gastrointestinal Surgeries (n= 60). -----	140
Table (24): Correlation between studied nurses' age and their actual practice regarding care of children undergoing gastrointestinal surgeries (n= 60).-----	141

List of Tables

Table (25): Relation between studied nurses' year of experience and their total actual practice regarding care of children undergoing gastrointestinal surgeries (n= 60).-----	142
Table (26): Correlation between studied nurses' qualification and their actual practice regarding care of children undergoing gastrointestinal surgeries (n= 60).-----	143
Table (27): Correlation between total knowledge of the studied nurses and their total actual practice regarding care of children undergoing gastrointestinal surgeries (n= 60).-----	144

List of Figure

Figure (1): Anatomy of digestive system -----	26
Figure (2): Cleft lip pre-surgery -----	34
Figure (3): Cleft lip post-surgery -----	34
Figure (4): Types of cleft palate -----	35
Figure (5): Classification of esophageal atresia with tracheoesophageal fistula -----	56
Figure (6): Congenital diaphragmatic hernia -----	64
Figure (7): Types of congenital diaphragmatic hernia -----	66
Figure (8): Hypertrophic pyloric stenosis -----	73
Figure (9): Types of intestinal obstruction -----	78
Figure (10): Abnormal bowel movement intussusceptions -----	88
Figure (11): Hirschsprung's disease -----	92
Figure (12): Cross-section of normal female anatomy -----	97
Figure (13): Types 1 of imperforated anus in the female infant -----	98
Figure (14): Types 2 of imperforated anus in the female infant -----	98
Figure (15): Imperforated anus in the male infant -----	99
Figure (16): Types 1 of imperforated anus in male -----	99
Figure (17): Types 2 of imperforated anus in male -----	100

List of Abbreviations

Abbreviation	Meaning
ABG	Arterial Blood Gases
AHLXBg	The Gene Responsible Currarino Syndrome Associated with Anorectal Malformation
ARMS	An Rectal Malformation
CDH	Congenital Diaphragmatic Hernia
CIPO	Chronic intestinal pseudo-obstruction
CL	Cleft Lip
CP	Cleft Palate
EA	Esophageal Atresia
ECMO	Extracorporeal Membrane Oxygenation
GIT	Gastrointestinal Tract
HCL	Hydro chloride
HD	Hirschsprung's Disease
HFOV	High Frequency Oxygen Ventilation
HPs	Hypertrophic Pyloric Stenosis
I.V	Intravenous
NPO	Nothing per mouth
Pco2	carbon Dioxide
SPO₂	Saturation blood oxygenation
PEMD	Primary Esophageal Motility Disorders
TEF	Tracheoesophageal Fistula
VACTERL	vertebral Defects, Anorectal Malformation, Cardiovascular Defects, Tracheoesophageal Fistula, Ear Deformities, Renal Anomalies and Limb Deformities
ICU	Intensive Care Unit
