Staff Nurses' Performance Regarding Safety Measures of High Alert Medications

Thesis

Submitted for Partial Fulfillment of the Master Degree in
Nursing Science
(Nursing Administration)

Supervised by

Dr. Hemat Abdel-Azeem Mostafa

Assistant Professor of Nursing Administration
Faculty of Nursing – Ain Shams University

Dr. Dalia Atef Khalaf

Lecturer of Nursing Administration
Faculty of Nursing – Ain Shams University

**Faculty of Nursing
Ain Shams University
2020**

Acknowledgments

*First and foremost, I feel always indebted to **Allah**, the **Most Beneficent** and **Merciful**, Who gave me the strength to accomplish this work,*

*Words cannot convey my thanks and appreciation to **Dr. Hemat Abd El Azeem Mostafa**, Assistant Professor of Nursing administration Faculty of Nursing, Ain Shams University, for her fruitful criticism, patience, continuous guidance and valuable advice in every step throughout this work; I'm indebted to her valuable consultation and direction.*

*I wish to express my gratitude and appreciation to **Dr. Dalia Atef**, Lecturer of Nursing administration Faculty of Nursing, Ain Shams University, for her kind help, generous advice, constructive criticism and time she had devoted to the fulfillment of this work,*

I wish to thank all the staff nurses who are appreciated and everyone who shared directly or indirectly in completion of this work,

Finally, I would like to extend my deep gratitude to my mother, and my family for their love, constant help, support and encouragement which made this work possible.

✍ Mostafa Gomaa Ahmed

List of Contents

<i>Subject</i>	<i>Page No.</i>
Introduction	1
Aim of the Study	6
Review of Literature	7
- Patient safety.	7
Definition of patient safety.....	7
Factors affecting Patient safety.....	9
-High alert medication.....	10
Definition of medication.	10
Definition of high alert medication.	11
Definition of generic name and brand name of medication.	11
Definition of Look Alike Sound Alike medication.	12
-Categories of high alert medications.	15
-Stages of high alert medication process.....	16
-Medication errors.	18
Definition of errors.	18
Definition of medication errors.	19
Hidden factors in medication errors.	19
Reasons of medication errors.	19
Types of medication errors.	20
-Staff nurses' role regarding safety measures of HAM.	21
Staff nurses' role in pre medication administration stage.	24
Staff nurses' role during medication administration stage.....	29
Staff nurses' role in post medication administration stage	34
-Head nurses' role regarding safety measures of HAM.	37
Subjects and methods	47
Results	57
Discussion	80

Conclusion	100
Recommendations	101
Summary	103
References	109
Appendices	125
Arabic Summary	--

List of Abbreviations

<i>Abbr.</i>	<i>Full-term</i>
ADE	: Adverse Drug Effects
FDA	: Food and Drug Administration
HAM	: High Alert Medication
ISMP	: Institute for Safe Medication Practices
JCI	: Joint Commission International Accreditation
LASA	: Look Alike Sound Alike
MAR	: Medication Administration Record
PRN	: Pro Re Nate “As Need”
PS	: Patient Safety
USA	: United State of America
USP	: United State Pharmacopeia
WHO	: World Health Organization

List of Tables

Table No.	Title	Page No.
Tables in Review		
Table (1):	Examples of the problematic medication names.	40
Table (2):	Top 10 Look-alike\ Sound-alike Drug Name Pairs.	41
Table (3):	List of high alert medication categories	43
Table (4):	Types of medication errors.....	45
Table (5):	List of drug written with Tall man lettering.	46
Tables in Subjects and Methods		
Table (6):	Dimension of nurses' knowledge regarding to safety measure of HAM questionnaire sheet.	49
Table (7):	Domains of nurses' practice observational checklist.....	50
Tables in Results		
Table (8):	The studied staff nurses' demographic characteristics (n=96).....	58
Table (9):	Number and percentage distribution of the studied staff nurses according to their attendance of training courses, experiences on high alert medication and hospital policies (n=96).	60
Table (10):	Number and percentage distribution of the studied staff nurses' according to total knowledge regarding to safety measures of high alert medications (n=96).	62
Table (11):	Number and percentage distribution of the studied staff nurses according to total practice regarding to safety measures of high alert medications (n=96).....	65
Table (12):	Relationship between age and gender of the studied staff nurses and their total level of knowledge regarding to safety measures of high alert medications.	67

List of Tables (Continued)

<i>Table No.</i>	<i>Title</i>	<i>Page No.</i>
Table (13):	Relationship between qualification and department of the studied staff nurses' and their total knowledge regarding to safety measures of high alert medications.	68
Table (14):	Relationship between years of experience, training courses in administration medication and training courses in administration of HAM of the studied staff nurses and their total level of knowledge regarding to safety measures of high alert medications.	69
Table (15):	Relationship between age and gender of the studied staff nurses' and their total level of practice regarding to safety measures of high alert medications.	71
Table (16):	Relationship between qualification and department of the studied staff nurses' and their total practice regarding to safety measures of high alert medications.	72
Table (17):	Relationship between years of experience, training courses in administration medication and training courses in administration of HAM of the studied staff nurses and their total practice regarding to safety measures of high alert medications.	73
Table (18):	Correlation between the staff nurses' total knowledge and their total practice regarding to safety measures of high alert medications.	74
Table (19):	Correlation matrix between dimensions of knowledge regarding to safety measures of high alert medications.	75

List of Tables (Continued)

<i>Table No.</i>	<i>Title</i>	<i>Page No.</i>
Table (20):	Correlation matrix between dimensions of practice regarding to safety measures of high alert medications.....	76
Table (21):	Correlation matrix between dimension of knowledge and practice regarding to safety measures of high alert medications.....	77
Table (22):	Multiple Linear regression model for staff nurses' total knowledge regarding to safety measures of high alert medications.	78
Table (23):	Multiple Linear regression model for staff nurses' total practice regarding to safety measures of high alert medications.	79

List of Figures

<i>Figure No.</i>	<i>Title</i>	<i>Page No.</i>
Figures in Review		
Figure (1):	Look -alik TraZODONE and traMADOL bottles.	14
Figure (2):	Sound alike Thyroxine and Lanoxin.	15
Figures in Results		
Figure (3):	Percentage distribution of the studied staff nurses total knowledge regarding to safety measures of high alert medications (n=96).	64
Figure (4):	Percentage distribution of the studied staff nurses' total practice regarding safety measures of high alert medications (n=96).....	66
