Acknowledgment

All praise and thanks is to ALLAH the most merciful and graceful as he has guided and enabled me by his mercy to fulfill this thesis, which I hope to be helpful to people.

*I would like to express my sincere appreciation to **Prof. Dr. Medhat A. El-Zainy**, professor of Oral Biology, Faculty of Dentistry, Ain Shams University and to **Prof. Dr. Souzi Farid Shinaishin**, God have mercy on her, professor of Oral Biology, Faculty of Dentistry, Ain Shams University for their encouragement, kind support and constructive advice whenever needed.*

*Profound thanks are extended to **Dr. Rabab Hassan Ali**, lecturer of Oral Biology, Faculty of Dentistry, Ain Shams University for supervising this work, her outstanding help step by step in all its stages, her patience to follow closely its part and for her constant encouragement and support.*

I am also thankful to all members of Oral Biology Department, Faculty of Dentistry, Ain Shams University for their kind help and cooperation.

I cannot forget the continuous support, encouragement and pieces of advices from all my dear members at Oral Biology department, Faculty of Oral

and Dental medicine, Future University, throughout my thesis journey.

*Finally, I would like to express my special thanks to **Dr.Sherif Gamal**, specialist at chemistry research labs at Future University for his help during the preparation of the materials that are used during the experiment.*

Dedication

I would like to dedicate this work to

My precious family especially my beloved parents,
who made me what I am today, their blessing and
prayers are the key for my success, I really thank them
whole heartedly.

My dear lovely sisters, Mai and Sara Elghazawy,
thank you for your support, encouragement and
unstoppable motivation.

My dear friends and colleagues, thanks for your
presence beside whenever I need.

And last but not least, I dedicate this work to the
kind soul of my great mentor Prof.Dr.Souzi Farid
Shinaishin, God have mercy on her.
