STUDIES ON THE BIOLOGY OF MANTIS SHRIMPS IN THE SUEZ CANAL.

**Thesis submitted in accordance with the requirements
of the University of the Suez Canal
for the degree of Doctor of Philosophy.**

By

Wafaa Said Sallam

M.Sc. in Marine Biology (1994)

Assistant Lecturer in the Department of Marine Science

Faculty of Science – Suez Canal University

Department of Marine Science.

Faculty of Science, Suez Canal University.

Ismailia, Egypt.

(2000).

B

بسم الله الرحمن الرحيم

**STUDIES ON THE BIOLOGY OF MANTIS SHRIMPS
IN THE SUEZ CANAL.**

Thesis supervisors :

Approved

1- Dr. S. G. El-etreby

S. G. El-etreby

Prof. of Fish Biology and Head of

Marine Biology Department, Suez Canal University.

2- Dr. S. Z. Mohammad

Saad Zahrani

Prof. of Invertebrates, Marine Biology Department,

Suez Canal University.

3- Dr. R.G. Hartnoll (D.Sc.)

Reader in Marine Biology, University of Liverpool,

Port Erin Marine Laboratory,

Isle of Man, British Isles.

Richard S. Hartnoll

COMMITTEE OF REFREES

Title of thesis:

“ Studies on the biology of mantis shrimps in the Suez Canal.”

Degree:

DOCTOR OF PHILOSOPHY OF SCIENCE (MARINE SCIENCE).

This thesis has been approved by:

Signature

Prof. Sameh Hafez Hassan

Department of Zoology,
Faculty of Science,
El Manssoura University.

Hassan S H

Prof. Soliman Hamed Abdel Rahman

National Institute of Oceanography
and Fisheries,
Alexandria.

Soliman H

Prof. Salah Gharib El etreby

Head of Marine science Department,
Faculty of Science,
Suez Canal University.

S. G. El etreby

Prof. Saad Zakaria Mohammad

Marine science Department,
Faculty of Science,
Suez Canal University.

Saad Zakaria

Acknowledgements

I wish to thank Prof. S.G.El Etreby, Professor of fish biology and head of Marine Science Department, Faculty of Science, Suez Canal University for his interest in the present work, providing facilities, kind revision, valuable comments and insightful discussion regarding the manuscript.

My thanks also extend to Prof. S.Z. Mohammad, Professor of Invertebrates, Marine Science Department, Faculty of Science, Suez Canal University for continuous encouragement, helpful suggestions and advices, and kind concern. I am also grateful to Dr.R.G. Hartnoll, reader in Marine Biology, Port Erin Marine Laboratory, University of Liverpool, Isle of Man, U.K. for his support during all parts of the work, critical reading and evaluation of the work.

I do appreciate the technical and emotional assistance offered to me by the members of the Department of Marine Science, Suez Canal University, Dr. Howaida Rushdy for being so supportive, Mr.Tarek Temraz, Mr.Mohsen el Sherbiny for their assistance with the field work and all the administrative staff for their concern.

Many people helped me during this work and they deserve to be acknowledged, Miss Chia-Hui Wang, Mr. Antonio Valencia and Dr. Chul-Woong Oh for their help with statistics, computer problems and for being good friends. Mrs. Eman Mahmoud for her loving friendship and Mrs. Nagwa Hassan for looking after my son. No words could describe my gratitude to my family who used every means of their powers to help and support me, my mother, father, my brother Dr.Mohammad Nader Sallam, sisters, Dr.Hanaa Sallam, Azza Sallam, and Dr. Hani Serag.

The true heroes behind this work were my sincere husband Mostafa and my beloved son Yasser, they put up with me in every stage of this work, I should ever remain grateful to them.

Contents	Page
CHAPTER 1: GENERAL INTRODUCTION.....	1
1.1. Aims of the present work.....	3
CHAPTER 2: STUDY SITES.....	4
2.1. Defresoir	4
2.2. Port Said.	5
CHAPTER 3: OCCURRENCE AND DISTRIBUTION OF STOMATOPODS IN THE SUEZ CANAL AND ADJACENT AREAS	7
3.1. Introduction	7
3.2. Distribution of Red Sea and Mediterranean stomatopods	8
3.2.1. Stomatopods of the Red Sea	8
3.2.2. Stomatopods of the Mediterranean Sea	9
3.2.3. Migrant stomatopods via Suez Canal to the Mediterranean	10
3.3. Aim of the present work	11
3.4. Material and methods	12
3.4.1. Collection of samples	12
3.4.2. Identification of specimens	12
3.5. Results	13
3.5.1. Species identified in the present study	13
3.5.2. Taxonomy of the recorded species	13
3.5.3. Distribution of the recorded species in the survey sites	14
3.6. Discussion.....	16
3.6.1. Migration of <i>Erugosquilla massavensis</i>	16
3.6.2. Migration of <i>Squilla mantis</i>	17
3.6.3. The migrational phenomenon	19
CHAPTER 4: FISHERIES OF THE MANTIS SHRIMPS IN THE SUEZ CANAL.	23
4.1. Introduction	23
4.2. Fishing grounds, landings and economic species.....	25

4.2.1.	Bitter lakes (Defresoir).....	25
4.2.1.1.	Fishing vessels.....	25
4.2.1.2.	Fishing gears and methods of operation.....	26
4.2.1.2.1.	Crab net (El tamdeed).....	26
4.2.1.2.2.	The beach seine.....	26
4.2.1.3.	Marketing of shrimps	27
4.2.2.	The Mediterranean sea (Port Said)	27
4.2.2.1.	The fishing vessels.....	27
4.2.2.2.	The fishing gear and method of operation.....	28
4.2.2.3.	Marketing of the shrimps.....	29
4.3.	Landings of mantis shrimps from the local fishery	29
 CHAPTER 5: REPRODUCTIVE BIOLOGY OF <i>ERUGOSQUILLA</i>		
	<i>MASSAVENSIS</i>.	30
5.1.	Introduction	30
5.2.	Materials and Methods	33
5.2.1.	Collection and processing of samples	33
5.2.1.1.	Gonad examination:	33
5.2.1.2.	Gonad index.....	34
5.2.1.3.	Examination of cement gland:	34
5.2.1.4.	Oocyte Measurements.....	34
5.2.1.5.	Estimation of fecundity	35
5.2.1.6.	Collection of plankton samples.....	35
5.2.1.7.	Data analysis.....	35
	5.2.1.7.1. Size at first sexual maturation.....	35
5.3.	Results	37
5.3.1.	Sex ratio	37
5.3.2.	Female maturity stages.....	37
5.3.3.	Size at first sexual maturity	38
5.3.4.	Seasonality of spawning	38
5.3.5.	Gonad index	39
5.3.6.	Gonad index and maturation	39
5.3.7.	Development of cement glands.....	40

5.3.8.	Fecundity	40
5.3.9.	Occurrence of larvae in the plankton samples	41
5.4.	Discussion	42
5.4.1.	Sex ratio	42
5.4.2.	Size at sexual maturity	42
5.4.3.	Reproductive pattern of <i>Erugosquilla massavensis</i>	43
5.4.4.	Cement glands development and gonad maturation	46
5.4.5.	Fecundity	46

CHAPTER 6: POPULATION STUDIES ON *ERUGOSQUILLA MASSAVENSIS*: SIZE VARIATIONS, MORPHOMETRICS AND DIET.49

6.1.	Introduction	49
6.2.	Materials and Methods	51
6.2.1.	Sampling of specimens	51
6.2.2.	Sample analysis	51
6.2.2.1.	Morphometric measurements	51
6.2.2.2.	Stomach content analysis	52
6.2.3.	Data analysis	52
6.2.3.1.	Estimation of growth parameters	52
6.2.3.2.	Allometric growth analysis	53
6.2.3.3.	Diet and prey relationships	54
6.3.	Results	55
6.3.1.	Population structure of <i>Erugosquilla massavensis</i>	55
6.3.2.	Length frequency distribution	55
6.3.3.	Estimation of growth parameters	56
6.3.4.	Biometric relationships	57
6.3.4.1.	Length - weight relationships	57
6.3.4.2.	Carapace length - total length relationships	57
6.3.5.	Allometric growth	57
6.3.5.1.	Relative growth within species comparison	58
6.3.5.2.	Relative growth between population comparison	59
6.3.6.	Feeding biology of <i>Erugosquilla massavensis</i>	60

6.3.6.1.	Seasonal variations in stomach fullness.....	60
6.3.6.2.	Diet composition.....	60
6.3.6.3.	Frequency of occurrence of the different prey types.....	61
6.3.6.4.	Seasonal variations in the occurrence of the different prey	62
6.3.6.5.	Variations in the occurrence of prey types with size.....	63
6.4.	Discussion.....	65
6.4.1.	Population structure.....	65
6.4.2.	Size distribution and growth of <i>E. massavensis</i>	66
6.4.3.	Relative growth	68
6.4.4.	Food and feeding of <i>E. massavensis</i>	69

CHAPTER 7: SEASONAL VARIATIONS IN ENERGY STORAGE AND UTILIZATION IN *ERUGOSQUILLA MASSAVENSIS* IN RELATION TO THE REPRODUCTIVE CYCLE.73

7.1.	Introduction	73
7.2.	Materials and Methods	75
7.2.1.	Preparation of tissues.....	75
7.2.2.	Analysis of protein	75
7.2.3.	Analysis of total lipid	77
7.2.4.	Analysis of glycogen	78
7.2.5.	Statistical analysis	79
7.3.	Results	80
7.3.1.	Biochemical composition of <i>Eurogosquilla massavensis</i>	80
7.3.1.1.	Female gonads	80
7.3.1.2.	Digestive gland	81
7.3.1.3.	Muscle tissue	82
7.3.2.	Biochemical composition and maturity	84
7.3.3.	Variation in the gonadal and hepatic indices of females.....	85
7.3.4.	Female indices and maturation.....	85
7.3.5.	Absolute amounts of biochemical constituents in relation to maturity stages	85

7.3.6. Relationship between the body variables and biochemical components.....	86
7.4. Discussion.....	88
7.4.1. Variations in the biochemical composition of the different organs with reproduction.....	88
7.4.2. Biochemical constituents and stages of gonad maturation.....	90
7.4.3. Biochemical components and body variables.....	91
CHAPTER 8: GENERAL DISCUSSION	93
8.1. Migration of <i>Erugosquilla massavensis</i>	93
8.2. Fisheries and exploitation.....	93
8.3. Life history.....	94
8.4. Recommendations and suggestions for future research.....	97
