OPTIMIZATION OF BIOGAS PRODUCTION FROM SOME INDUSTRIAL ORGANIC WASTES IN EGYPT

Thesis

Submitted in Partial Fulfillment
For the Degree of
M.Sc. in Environmental Studies

By
Sabry Farag Ismail Salem

B. Sc. Agricultural.
(Ag. Engineering)
1979

Department of Environmental Studies
Institute of Graduate Studies and Research
University of Alexandria

1997

SUPERVISORS

Dr. Salah Hassona

Associate Professor of Microbiology
Department of Environmental Studies,
Institute of Graduate Studies and Research
Alexandria University

Dr. Hesham Zaki Ibrahim

Associate Professor of Pesticide Chemistry,
Department of Environmental Studies,
Institute of Graduate Studies and Research
Alexandria University

Dr. Ibrahim Abd Elbaki El-Aasser

lecture, Department of Environmental Studies,
Institute of Graduate Studies and Research
Alexandria University

Optimization of biogas production from some industrial organic wastes in Egypt.

Approved

.....

.....

.....

Date / /1997 Alexandria, Egypt.

ACKNOWLEDGMENT

I WOULD LIKE TO EXPRESS MY GREAT APPRECIATION TO DR. SALAH HASSOUNA, ASSOCIATE PROFESSOR OF MICROBIOLOGY, DEPARTMENT OF ENVIRONMENTAL STUDIES, INSTITUTE OF GRADUATE STUDIES AND RESEARCH, ALEXANDRIA UNIVERSITY, SUGGESTING THE PROBLEM, CONTINUOUS SUPERVISION AS WELL AS THE CONTENTS AND STEPS OF THE WORK, USEFUL HELP DURING THE PREPARATION OF THIS WORK, AND REVISION OF THE MANUSCRIPT

I AM INDEBTED AND MOST GRATEFUL TO DR. HESHAM ZAKI IBRAHIM, ASSOCIATE PROFESSOR OF PESTICIDE CHEMISTRY, DEPARTMENT OF ENVIRONMENTAL STUDIES, INSTITUTE OF GRADUATE STUDIES AND RESEARCH, ALEXANDRIA UNIVERSITY, FOR HIS SUPERVISION, GUIDANCE, ENCOURAGEMENT, AND REVISION OF THE MANUSCRIPT

I WISH TO EXPRESS MY SINCERE THANKS TO DR. IBRAHIM EL-ASSAR, LECTURE. DEPARTMENT OF ENVIRONMENTAL STUDIES, INSTITUTE OF GRADUATE STUDIES AND RESEARCH, ALEXANDRIA UNIVERSITY, FOR HIS SUPERVISION, REVISION OF THE MANUSCRIPT ENCOURAGEMENT, AND HIS ASSISTANCE DURING THE PREPARATION OF THESIS.

I WOULD LIKE TO EXPRESS MY GRATITUDE TO DR. MOKHTAR IBRAHIM YOUSEF, FOR GREAT HELP, AND ASSISTANCE.

I WISH TO THANK AGRC. ENG. EMAN IBRAHIM AND DEPARTMENT OF ENVIRONMENTAL STUDIES, INSTITUTE OF GRADUATE STUDIES AND RESEARCH, ALEXANDRIA UNIVERSITY, FOR THEIR ASSISTANCE.

CONTENTS

<u>Chapter</u>	<u>Page</u>
1 Introduction	1
2 Aim of the work	4
3 Review of literature	5
3.1. Anaerobic fermentation as a tool for biogas production and waste treatment technology.	5
3.2. Biomass Fuels.	8
3.3. Chemical analysis in relation to the nutritive value of organic industrial wastes to microorganisms.	8
3.4. The microbiology of anaerobic bacteria.	13
3.4.1. Functional groups of bacteria	13
3.4.1.1. Hydrolysis	15
3.4.1.2. Acidogenesis	16
3.4.1.3. Acetogenesis	17
3.4.1.4. Methanogenesis	17
3.5. Environmental Factors Affecting Biogas Production	18
3.5.1. Temperature	18
3.5.2. Hydrogen ion concentration	20
3.5.3. C/N ratio	21
3.5.4. Loading rate	22
3.5.5. Volatile acids	23
3.5.6. The inoculum / substrate ratio (starter / substrate ratio).	23
3.5.7. Inhibitors	25
3.5.8. Particle size	26
3.5.9. Stirring	27
3.5.10. Operational system	28
3.5.11. Hydraulic retention time (HRT)	29
4 Materials and Methods	30
4.1. Materials.	30
4.1. Agro-industrial wastes.	30
4.1.1.1. Solid wastes	30
4.1.1.2. Cheese whey	30
4.1.2. Cow dung	32
4.1.3. Reactors	32
4.2. Methods	32
4.2.1. Chemical analyses	32
4.2.1.1. Total Solids (TS)	32
4.2.1.2. Total Volatile Solids (TVS)	35
4.2.1.3. Organic matter and organic carbon (OC)	
4.2.1.4. Total Nitrogen (N)	
4.2.1.5. Hydrogen ion concentration (pH)	
4.2.2. Gas determination	
4.2.2.1. Gas production	
4.2.2.2. Methane and carbon dioxide content	35
4.2.3.1. Cellulolytic activity	36

<u>Chapter</u>	<u>Page</u>
4.3. Experimental procedures	36
4.3.1. Evaluation of biogas generation from agro-industrial wastes	36
4.3.2. Studying the effect of Inoculum substrate ratio on the biogas production and substrate degradation.	38
4.3.3. Biogas production from whey	38
4.3.3.1. Studying the effect of hydraulic retention time (HRT) on the biogas production	38
4.3.4. Assessment of the anaerobically digested slurry as a fertilizer and soil conditioner	39
5 - Results and Discussion	42
5.1. Agro-industrial Wastes.	42
5.1.1. Survey of some agro-industrial wastes in Alexandria.	42
5.1.2. Chemical characteristics of wastes	44
5.2. Biogas from agro-industrial wastes:	47
5.2.1. Daily biogas / methane production.	47
5.2.2. The accumulative amount of biogas and methane production from the agro-industrial wastes	55
5.2.3. Analysis of production rate of biogas and methane from the different wastes used	61
5.2.4. Change in total and volatile solids.	65
5.2.5. Cellulolytic activities (CA).	67
5.3. Effect of different inoculation ratios on the anaerobic fermentation process.	69
5.3.1. Effect of the different inoculation ratios on the biogas production.	69
5.3.2. Effect of different inoculation ratios on the cumulative biogas production	74
5.3.3. Effect of different inoculation ratio on volatile solids removal and biogas production.	76
5.3.4. Changes in total and volatile solids.	78
5.3.5. Effect of the different inoculation ratios on cellulolytic activity.	83
5.4. Effect of different inoculum ratios on the degradation rates of the agro-industrial wastes used:	85
5.4.1. Tomato waste.	85
5.4.2. Apple waste.	85
5.4.3. Pea waste.	89
5.4.4. Artichoke waste	89
5.4.5. Okra waste	92
5.4.6. Cocoa waste	92
5.4.7. Orange waste	95
5.4.8. Potato waste	95
5.4.9. Mango waste	95

<u>Chapter</u>	<u>Page</u>
5.5. Biogas production from anaerobic treatment of cheese whey using upflow fixed bed reactor.	99
5.6 Assessment of the anaerobically digested slurry as a fertilizer and soil conditioner.	105
5.7. Economic feasibility of applying biogas units	111
