# Value of Adding a T2 Mapping Sequence to a Routine MR Imaging Protocol in Evaluation of Articular Cartilage of the Knee Joint

Thesis

Submitted for Partial Fulfillment of  
M.D Degree in **Radiodiagnosis**

Presented by

***Samar Shehata Mohamed El Sayed Hasan Noreldine***

*M.B., B. Ch*

*M.Sc of Radiodiagnosis*

*Faculty of Medicine- Ain Shams University*

Supervised by

**Prof. Dr. Mohamed Amin Nassef**

*Professor of Radiodiagnosis*

*Faculty of Medicine - Ain Shams University*

**Dr. Mennatallah Hatem Shalaby**

*Associate Professor of Radiodiagnosis*

*Faculty of Medicine - Ain Shams University*

**Dr. Ali Haggag Ali**

*Lecturer of Radiodiagnosis*

*Faculty of Medicine - Ain Shams University*

Faculty of Medicine - Ain Shams University

2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

سُبْحَانَكَ لَا مَعْلَمَ لَنَا  
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ  
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

# Acknowledgments

*First and foremost, I feel always indebted to **Allah** the Most Beneficent and Merciful.*

*I am extremely grateful to Prof. Dr. Mohamed Amin Nassef, Professor of Radiodiagnosis, Faculty of Medicine, Ain Shams University, without his patience and understanding; this work would not have been possible.*

*I am deeply indebted to Dr. Mennatallah Hatem Shalaby, Associate Professor of Radiodiagnosis, Faculty of Medicine, Ain Shams University, for her valuable suggestions, guidance, advice and kind instructions through this work.*

*I would also like to show my deepest gratitude to Dr. Ali Haggag Ali, Lecturer of Radiodiagnosis, Faculty of Medicine, Ain Shams University, for her remarkable ideas and remarks suggestions, guidance, advice and kind instructions through this work.*

*I would like to express my hearty thanks to all my family for their support till this work was completed.*

**Samar Shehata Noreldine**

# List of Figures

Fig. No.	Title	Page No.
<b>Figure 1:</b>	Schematic representation of articular cartilage composition and morphology in healthy <b>(A)</b> , early-stage osteoarthritic <b>(B)</b> , and advanced-stage osteoarthritic cartilage <b>(C)</b> .....	9
<b>Figure 2:</b>	<b>(A)</b> Negative ions attract positive counter ions and water molecules. <b>(B)</b> This swelling of the proteoglycans is constrained by the surrounding collagen meshwork. ....	11
<b>Figure 3:</b>	Schematic, cross-sectional diagram of healthy articular cartilage.....	13
<b>Figure 4:</b>	<b>(A)</b> PD FS MR image in 32 year old man with arthroscopically normal retropatellar articular cartilage. <b>(B)</b> A graphic depiction of layers of articular cartilage on a MRI image as identified on histology.....	20
<b>Figure 5:</b>	Axial FS T2W images of the patella targetted for cartilage imaging <b>(A)</b> large FOV <b>(B)</b> Small FOV .....	21
<b>Figure 6:</b>	Coronal T1W image of knee joint .....	22
<b>Figure 7:</b>	Shows axial 2D T2-weighted fast SE image provides excellent depiction of a focal region of deep cartilaginous delamination (arrows), with high contrast between the cartilage surfaces and synovial fluid .....	23
<b>Figure 8:</b>	Sagittal PD-weighted non-FS <b>(A)</b> and FS <b>(B)</b> images of knee reveal efficacy of 2D FSE sequence to depict articular cartilage .....	24
<b>Figure 9:</b>	<b>(a)</b> Coronal 3D intermediate-weighted fast SE source image. Axial <b>(b)</b> and sagittal <b>(c)</b> images obtained with reformatting of the coronal source image dataset, Coronal 3D intermediate-weighted fast SE source image shows no cartilage abnormalities .....	27

# List of Figures cont...

Fig. No.	Title	Page No.
<b>Figure 10:</b>	Coronal 3D SPGR image with lipid suppression shows intact high-signal-intensity cartilaginous surfaces in the medial and lateral tibiofemoral compartments.....	29
<b>Figure 11:</b>	Sagittal 3D SPGR of knee provides excellent contrast between cartilage and subchondral bone along signal-intensity cartilaginous surfaces in tibiofemoral compartments.....	30
<b>Figure 12:</b>	(a) T2-weighted fat-suppressed image shows large areas of complete loss of cartilage in the medial tibiofemoral compartment with associated edematous degenerative lesions in subchondral bone marrow (arrowheads). (b) 3D FLASH image accurately depicts the areas of complete loss of cartilage in the medial compartment as seen in a, but the associated bone marrow lesions are barely visible .....	32
<b>Figure 13:</b>	3D DESS WE.....	33
<b>Figure 14:</b>	Balanced steady-state free precession (bSSFP) images of knee of healthy 32-year-old male volunteer acquired using iterative decomposition of water and fat.....	34
<b>Figure 15:</b>	(a) Sagittal source and (b) coronal reformatted 3D VIPR-SSFP images exhibit a high cartilage SNR and high contrast among cartilage, synovial fluid, and other joint structures .....	35
<b>Figure 16:</b>	(A) Axial T1 image of the retropatellar cartilage obtained in a volunteer reveals morphologically normal cartilage. (B) Corresponding T2 maps for the same volunteer and (C) late unloading.....	38

# List of Figures cont...

Fig. No.	Title	Page No.
<b>Figure 17:</b>	Bar diagram, normal knee cartilage T2 pattern.....	40
<b>Figure 18:</b>	Color map of T1p relaxation time in tibial cartilage .....	42
<b>Figure 19:</b>	A)Delayed gadolinium-enhanced magnetic resonance imaging (MRI) of cartilage (dGEMRIC), B) T2 mapping, C) T1rho mapping, and D) Sodium imaging differentiate between healthy and early-stage knee osteoarthritis (OA).....	43
<b>Figure 20:</b>	(A) A proton density image of cartilage. (B) T1WI after An ionic contrast agent (Gd-DTPA2-) was given time to penetrate the tissue. (C)T1WI when the same individual was given a nonionic contrast agent (Gd-HPDO3A).....	46
<b>Figure 21:</b>	Sagittal ADC map obtained with diffusion weighted MR imaging in the knee. ....	50
<b>Figure 22:</b>	47 year old male volunteer with knee pain. Sagittal balanced steady-state free precession (bSSFP) image of knee joint (0.3 mm isotropic resolution and 8 minute scanning time) shows superficial partial-thickness cartilage thinning (arrow).....	51
<b>Figure 23:</b>	(A) A dual-tuned 23 NA/1H coil allows direct measurement of GAG content (B) Three-dimensional cones acquisition of sodium MRI in healthy 28-year-old female volunteer at 3 T.....	53
<b>Figure 24:</b>	Conceptual model for the risk factors of osteoarthritis (OA) .....	58

# List of Figures cont...

Fig. No.	Title	Page No.
<b>Figure 25:</b>	Multiplanar FS PD-weighted images in a 56 year old woman who previously underwent arthroscopic partial medial meniscectomy .....	64
<b>Figure 26:</b>	Axial image acquired with multiple-echo data image combination sequence shows grade 1 cartilage lesion.....	67
<b>Figure 27:</b>	Axial 2D fat-saturated PD-weighted fast spin-echo image of knee joint in a 47 year old man shows arthroscopically confirmed superficial cartilage fibrillation (arrows) categorized as grade 2 cartilage lesion.....	67
<b>Figure 28:</b>	Coronal FS PD weighted image of the knee reveals a grade 2 chondromalacia of the weight-bearing surface of the medial femoral condyle (arrows) .....	68
<b>Figure 29:</b>	Axial fast spin-echo PD FS image in 39 year old man reveals a wide area of full-thickness chondromalacia (arrow) involving the median ridge and the medial patellar facet categorized as grade 3 lesion (fissuring of cartilage to level of subchondral bone).....	68
<b>Figure 30:</b>	(A) Axial FS PD-weighted sequence image of knee joint shows grade 4 chondromalacia (yellow arrow) of articular cartilage in median patellar ridge and lateral patellar facet. (B) Coronal FS PD weighted images of an adult patient.....	69
<b>Figure 31:</b>	Sagittal T2 map obtained from a healthy volunteer subject (32 years old male volunteer with grade 0 knees) shows lower relaxation times compared to OA patients .....	72
