Investigation of Developed Ferritic and Martensitic Stainless Steels for Nuclear Power Reactors

A Thesis

Submitted for the degree of Ph.D. of science as a partial
fulfillment for requirements of the Ph.D. of science

In Physics

By

Noha Mohamed Ali Ahmed

M.Sc., In Physics

Supervisors

***Prof. (Passed Away) Samir Yousha
El khamisy***

*Professor of Nuclear Physics
Ain Shams University*

Prof. Mamdouh Mahmoud Eissa
*Professor of Steel & Ferroalloys Technology
Central Metallurgical Research and
Development Institute*

Prof. Soad Abd El-Monem El fiki
*Professor of Radiation Physics
Ain Shams University*

Assoc. Prof. Raed Mohamed El Shazly
*Assoc. Professor of Nuclear Physics & Its
Applications, Faculty of Science, Al Azhar
University*

Dr. Aly Abdallah Saeed Abdallah
*Lecturer of Nuclear Physics, Faculty of Engineering,
Egyptian Russian University*

Ain Shams University
Faculty of Science
Physics Department

Degree: Ph.D. in Physics

Title: Investigation of Developed Ferritic and Martensitic Stainless Steels for Nuclear Power Reactors.

Name: Noha Mohamed Ali Ahmed

Thesis Advisors

Approved

Prof. Samir Yousha El-Khamisy

Degree: Ph.D. in Physics

Department: Physics

Faculty: Science

University: Ain Shams

Graduation date: 2011, Ain Shams University

Registration date: 13/02/2017

Grant date: 2021

Ain Shams University
Faculty of Science
Physics Department

Degree: Ph.D. in Physics

Title: Investigation of Developed Ferritic and Martensitic Stainless Steels for Nuclear Power Reactors.

Name: Noha Mohamed Ali Ahmed

Approval Sheet

This thesis for Ph.D. degree has been approved by

Prof. Soad Abd El-Monem El fiki

.....

Physics Department, Faculty of Science, Ain Shams University.

Prof. Huda Mohamed Eissa

.....

National Institute for Measurement and Calibration.

Prof. h.c.Dr.Ing Andreas Oechsner

.....

Vice Dean for Research, Esslingen University of Applied Sciences, Faculty of Mechanical Engineering.

ACKNOWLEDGEMENT

Acknowledgement

First of all, the author bows his head thanking to “Allah” who paved the way and only by his will everything can be achieved, for helping and giving me power to complete this work.

*I would like to express deepest appreciations and grateful for all my great supervisor professors. Special thanks and dense gratitude to **Prof. Samir Yousha El khamisy, (Passed Away)**, (Professor of Nuclear Physics, Faculty of Science, Ain Shams University,), for suggesting the research point. He carried the heavy guidance responsibility during my research journey in both of my master and doctoral degrees. He has ever been patient with me until the end of the road, his usual fruitful and beneficial scientific discussions, extensive time and his continuous support that pushed me to score my deep goal.*

*My sincere appreciation and grateful to, **Prof. Soad Abd El-Monem Elfiki** (Professor of Radiation Physics, Faculty of Science, Ain Shams University). This work would not have been possible without her guidance, sincere support and encouragement. Her effective supervision and helpful comments helped me to accomplish this study.*

*My great gratitude and respect to **Prof. Mamdouh Mahmoud Eissa**, (Professor of Steel & Ferroalloys Technology, Central Metallurgical Research and Development Institute), his constant encouragement, smart fruitful and beneficial discussions during all steps of this work helped me to overcome successfully all difficulties and I have learned many valuable ideas.*

Acknowledgement

*My grateful respect to **Assoc. Prof. Raed M. El Shazly**, (Associated Professor of Nuclear Physics, Faculty of Science, Al-Azhar University), for his supervision, advice and help which accelerated my work.*

*My respect to **Dr. Aly Abdallah Saeed** (Lecturer of Nuclear Physics, Faculty of Engineering, Egyptian Russian University), who solved any hard situation I have had during Ph.D. study.*

*My great gratitude and respect to **Assoc. Prof. Mohamed Kamal El-Fawkhry**, (Associated Professor of Steel & Ferroalloys Technology, Central Metallurgical Research and Development Institute), for his constant support and useful discussion. Without his help, this work would not be possible, providing necessary infrastructure and resources to accomplish the research work.*

*I would also like to express my deeply thanks to **Prof. Ibrahim Mohamed Ghayad**, (Acting Dean, Metals Technology Department, Central Metallurgical Research and Development Institute), for his generous guidance, sincerely efforts and support throughout this work.*

I would like to thank all members of the Central Metallurgical Research and Development Institute, they have always been friendly, helpful and they rendered enormous helps being apart during the whole tenure of measurements.

Acknowledgement

*The author takes this opportunity to express sincere gratitude to my great father (**Uncle Nagdy**), dear mother (**Fatma Mohamed**), husband (**Alaa Eldin Rafaat**), sisters (**Azaa, Menna, Ghada and Asmaa**), brothers (**Abdel Rahman and Abdallah**) for their unceasing encouragement, help and their support in his decisions. Without whom Author could not have made it here. I love them so much.*

***Lastly**, I would like to say that, it was pride to me to study under the supervisions of those professors. Thanks, and appreciation for all professors and lecturers in physics department at faculty of science, Ain Shams University for teaching me and putting me in the first step in the field of research.*

Noha Mohamed Ali
