HANAA ALY

Prognostic role of FDG positron emission tomography in gastric cancer patients following treatment

Thesis

Submitted for Partial Fulfillment of Master Degree of Radiology

By

Mark Michel Ibrahim Nakhla

(M.B.B.CH.)

Under supervision of

Prof. Dr. Sahar Mohamed El Gaafary

Professor of Radiology

Faculty of Medicine

Ain Shams University

Assist. Prof. Dr. Nermeen Nasry Keriakos

Assistant Professor of Radiology

Faculty of Medicine

Ain Shams University

Faculty of Medicine

Ain Shams University

2021

ACKNOWLEDGMENT

First and foremost, praise is to GOD, to whom I relate any success in achieving any work in my life.

Throughout working on this thesis, I have received a great deal of support and assistance.

*I wish to express my deepest thanks, gratitude and appreciation to **Prof. Dr. Sahar Elgaafary** for her sincere encouragement, constant advice and valuable guidance throughout the performance of this work. I owe special thanks to **Ass. Prof. Dr. Nermeen Nasry** for her kind care, advice and help which gave me the best guidance throughout this work.*

Finally, I would like to thank my family, my friends, and my colleagues, for their support and moral encouragement.

List of Contents

Title	Page No.
List of Abbreviations.....	i
List of Tables	iii
List of Figures	iv
Introduction	1
Aim of the Work.....	5
Review of Literature	
Stomach Anatomy	6
Pathology of Gastric Malignancy	24
Physics and Background of PET/CT Scanners	56
¹⁸ FDG PET/CT in Gastric Malignancy	61
Patients and Methods.....	73
Results	79
Illustrative Cases	91
Discussion	99
Summary and Conclusion.....	106
References	108
Arabic Summary	—

List of Abbreviations

Abb.	Full term
¹⁸ FDG PET/CT ...	¹⁸ F-fluorodeoxyglucose positron emission tomography– computed tomography
AJCC	American Joint Committee on Cancer ()/
BMI.....	Body mass index
CDH1.....	Cadherin 1 gene
CEA	Carcinoembryonic antigen
CT	Computed Tomography
DLBL.....	Diffuse Large B cell Lymphoma
EGJ.....	Oesophago-gastric junction
EUS	Endoscopic ultrasound
GC.....	Gastric Cancer
GIST	Gastrointestinal Stromal Tumors
GLUTs.....	Glucose transporters
H&E.....	Hematoxylin and eosin
HDGC.....	Hereditary diffuse gastric cancer
HU	Hounsfield Unit
MALT	Mucosa Associated Lymphoid Tissue
MDCT.....	Multidetector computed tomography
MEN	Multiple endocrine neoplasia
MRI.....	Magnetic resonance imaging
NCCN	National Comprehensive Cancer Network
NPV	Negative predictive value
NPV	Negative predictive value
PACS	Picture archiving and communications system
PERCIST.....	Positron Emission tomography Response Criteria in Solid Tumors

List of Abbreviations Cont...

Abb.	Full term
PET	Positron Emission Tomography
PGL.....	Primary Gastric Lymphoma
PPV	Positive predictive value
ROI	Region of Interest
SIR.....	Systemic inflammatory response
SUV	Standardized uptake value
TNM	Tumour, node, metastasis
UICC.....	Union for International Cancer Control
WHO.....	World Health Organization

List of Tables

Table No.	Title	Page No.
Table (1):	The Various Ligamentous Attachments of the Stomach and their Vascular Landmarks on Cross-Sectional Imaging	10
Table (2):	Stomach Cancer Tumour, Node, Metastasis Staging: American Joint Committee on Cancer/Union for International Cancer Control	48
Table (3):	Stage grouping (clinical)	49
Table (4):	Demonstrating the range of age in years.....	80
Table (5):	Previous Treatment of the patients under study	82
Table (6):	Type of surgery of the patients under study.	82
Table (7):	¹⁸ FDG PET/CT findings in the positive patients under study.	88
Table (8):	Sites of distant Metastasis.....	88
Table (9):	Sensitivity, specificity, PPV, NPV and diagnostic accuracy of FDG pet-ct in detection of Gastric recurrence/residual, Nodal Disease and Distant Metastasis.	89

List of Figures

Fig. No.	Title	Page No.
Figure (1):	The borders and regions of the stomach	9
Figure (2):	Posterior topographical relations of the stomach.....	12
Figure (3):	The arterial supply of the stomach.....	13
Figure (4):	Blood supply to the stomach and duodenum with anatomic relationships to the spleen and pancreas	14
Figure (5):	Veins of the stomach.....	16
Figure (6):	The distribution of the vagal trunks to the stomach.....	19
Figure (7):	Lymphatic drainage of stomach	21
Figure (8):	Multidetector Computed Tomography of the stomach in axial.....	22
Figure (9):	Multidetector Computed Tomography of the stomach in coronal showing a single layer of enhancing gastric wall.....	23
Figure (10):	Normal histology of the stomach	32
Figure (11):	Gastric Histology A	33
Figure (12):	Histopathology of the 2 types of gastric cancer	34
Figure (13):	Gastric adenocarcinoma of intestinal type	35
Figure (14):	The multistep histological progression from active chronic gastric inflammation to intestinal-type gastric adenocarcinoma	36
Figure (15):	Gastric adenocarcinoma of diffuse type showing a single-file pattern of infiltration of the muscularis propria	37
Figure (16):	Well-differentiated gastric adenocarcinoma of tubular type.....	39

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (17):	Moderately differentiated gastric adenocarcinoma of mixed tubular and papillary types.....	40
Figure (18):	Macroscopic image of stomach with lymphoma.....	42
Figure (19):	Microscopic image of lymphoepithelial lesion.....	42
Figure (20):	Primary gastric DLBCL (A, B) Primary high-grade gastric B-cell lymphoma	43
Figure (21):	Typical gastrointestinal stromal tumor histopathology	45
Figure (22):	Classification of gastric adenocarcinoma by depth of invasion (T classification).	49
Figure (23):	MDCT of gastric carcinoma correlated with Borrmann classification.....	51
Figure (24):	Primary Gastric Lymphoma, Large B-Cell NHL.....	52
Figure (25):	Contrast-enhanced computed tomography scan of a patient with a gastric gastrointestinal stromal tumor that is endophytic in nature and located along the posterior aspect of the gastric cardia just 2 cm beyond the gastroesophageal junction.....	53
Figure (26):	MDCT images of early gastric cancer.....	54
Figure (27):	MDCT images of advanced gastric cancer	55
Figure (28):	Illustrative diagram of combined PET/CT scanner components	57
Figure (29):	Typical imaging protocol for combined PET/CT.....	58
