## **Tacrolimus Loaded Polymeric Nanoparticles for the Treatment of Psoriasis**

A Thesis submitted

By

**Salma Abdel Aziz Mohammad Fereig**

Bachelor degree of pharmaceutical sciences and drug design, 2014,  
Ain Shams University

Teaching Assistant, Department of Pharmaceutics and Pharmaceutical Technology  
Faculty of Pharmacy, the British University in Egypt

For the partial fulfilment of Master Degree in Pharmaceutical Sciences  
(Pharmaceutical technology)

*Under the Supervision of*

***Assoc. Prof. Dr. Mona Mohamed Ahmed Abdel-Mottaleb***

Associate Professor of Pharmaceutics and Industrial Pharmacy  
Faculty of Pharmacy- Ain Shams University

***Assoc. Prof. Dr. Mona Gamal Arafat***

Associate Professor of Pharmaceutics and Pharmaceutical Technology  
Faculty of pharmacy- British University in Egypt.

***Dr. Ghada Mamdouh ElZaafarany***

Lecturer of Pharmaceutics and Industrial Pharmacy  
Faculty of Pharmacy - Ain Shams University

**2021**

### **Acknowledgements**

*First of all, “All the praises and thanks to ALLAH, the most merciful, who has guided us to this, and never could we have found guidance, were it not that ALLAH had guided us”.*

*I would like to express my gratitude to my dearest professor **Dr. Mona Mohamed Ahmed Abdel-Mottaleb**, Associate professor of pharmaceuticals and industrial pharmacy, Ainshams university, for her support, guidance, time, patience and effort all through this thesis work. She never failed to support me and give me her valuable time whatever she was going through. I will never forget her advices through my entire career life. I do owe her all my success and knowledge in science.*

*I would like to profoundly thank my dearest professor **Dr. Mona Gamal Arafa**, Associate professor of pharmaceuticals and pharmaceutical technology, the British university in Egypt, for believing in me from the beginning. I would have never been in the academic career if it hadn't been for her recommendation and support after Allah's will. She never held back her knowledge, support or valuable advice regarding research or teaching. I would also like to thank her for standing by my side during the sickness of my son.*

I would like to deeply thank my dear professor **Dr. Ghada Mamdouh EL-Zaafarany**, Lecturer of pharmaceuticals and industrial pharmacy, Ainshams university, for her effort, support and guidance which helped me improve this work and present it way better than my expectations.

I would like to express my sincere gratitude to my family; my parents, **Sherifa Mahmoud Affifi** and **AbdelAziz Muhammad Fereig**. I owe them everything. They have always been my role models. I would have never been here without their kindest and most sincere support and consideration from the first day of my life till now. May Allah keep them safe and at good health, my kindest and most supportive husband; **Ahmad Zaky El-Menawy** who always stood by my side in every possible way and supported me to fulfill my dreams since I was an undergraduate student, My mother-in-law, **Zeinab Ibrahim Youssif**, who was always a second mother and supporter, my beloved sister; **Yasmeen AbdelAziz Fereig**, who was always my supporter since our childhood, and my second sister and lifetime companion, **Mahitab Bayoumi**, for her endless support in career and life all through our friendship.

I would like to deeply thank all my professors at the pharmaceuticals department at Ainshams university. I have always been and will always be proud to be your student.

*Your passion and dedication to science inspired me all through my career life.*

*I would like to express my sincere gratitude to **Professor Dr. Mohey ElMazar**, Dean of the faculty of pharmacy, the British university in Egypt, for his kind support, guidance and patience as a second father to every staff member and his special understanding and support during the sickness of my young son.*

*I also like to thank all the staff members, professors and colleagues, of the department of pharmaceuticals and pharmaceutical technology and all my colleagues at the British university in Egypt for their continuous support and aid.*

*My deepest thank to all my friends who never hesitated to give me their support and advice.*

**Dedication**

*I would love to sincerely dedicate this work to my beloved  
sons,*

*Ali and Zeineldeen Ahmad Zaky*

*I wish I could make you proud of your mother who loves  
you both more than you can ever imagine. May Allah keep  
you always safe and in good health.*

**List of contents**

<b>Item</b>	<b>Page</b>
List of abbreviations	<b><i>I</i></b>
List of tables	<b><i>IV</i></b>
List of figures	<b><i>VI</i></b>
Abstract	<b><i>XI</i></b>
General introduction	<b><i>1</i></b>
Scope of work	<b><i>20</i></b>
<b>Chapter I: Tacrolimus-loaded chitosan nanoparticles prepared using a modified ionic gelation technique</b>	
<b>Introduction</b>	<b><i>22</i></b>
<b>Materials</b>	<b><i>29</i></b>
<b>Equipment</b>	<b><i>30</i></b>
<b>Methods</b>	
1. Ultra performance liquid chromatographic (UPLC) analysis of tacrolimus	<b><i>31</i></b>
2. Preparation of tacrolimus-loaded chitosan nanoparticles	<b><i>32</i></b>
3. Particle characterization	<b><i>34</i></b>
4. Entrapment efficiency (EE%) and drug loading capacity (DL%)	<b><i>34</i></b>
5. <i>In vitro</i> drug release study	<b><i>35</i></b>
6. <i>Ex-vivo</i> skin permeation and deposition study	<b><i>35</i></b>
7. Rheology testing	<b><i>36</i></b>
8. Microscopic examination	<b><i>37</i></b>
9. Lyophilization of tacrolimus-loaded chitosan nanoparticles	<b><i>37</i></b>
9.1. Fourier transform infrared (FT-IR) analysis	<b><i>37</i></b>
9.2. X-ray diffraction (XRD) analysis	<b><i>38</i></b>
10. Stability studies	<b><i>38</i></b>
11. <i>In vivo</i> testing of tacrolimus nanoparticles anti-psoriatic effect on imiquimod (IMQ)-induced animal model	<b><i>38</i></b>
12. Statistical analysis	<b><i>41</i></b>

<b>Results and discussion</b>	
1. Ultra performance liquid chromatographic (UPLC) analysis of tacrolimus	<b>42</b>
2. Particle size (PS) and polydispersity index (PDI) analysis	<b>47</b>
3. Zeta potential	<b>54</b>
4. Entrapment Efficiency (EE%) and drug loading capacity (DL%)	<b>55</b>
5. <i>In vitro</i> drug release study	<b>59</b>
6. <i>Ex-vivo</i> skin permeation and deposition study	<b>61</b>
7. Rheology testing	<b>64</b>
8. Microscopic examination	<b>65</b>
9. FT-IR analysis	<b>66</b>
10. X-ray diffraction analysis	<b>68</b>
11. Stability Studies	<b>69</b>
12. <i>In vivo</i> study of the antipsoriatic effect of tacrolimus nanoparticles on imiquimod (IMQ)-induced animal model	<b>70</b>
<b>Conclusions</b>	<b>79</b>
<b>Chapter II: Lecithin-chitosan hybrid nanoparticles incorporating tacrolimus using a modified formulation technique.</b>	
<b>Introduction</b>	<b>81</b>
<b>Materials</b>	<b>83</b>
<b>Equipment</b>	<b>84</b>
<b>Methods</b>	
1. Preparation of tacrolimus-loaded lecithin-chitosan hybrid nanoparticles	<b>85</b>
2. Particle characterization	<b>87</b>
3. Entrapment efficiency (EE%) and drug loading capacity (DL%)	<b>88</b>
4. <i>In vitro</i> drug release study	<b>88</b>
5. <i>Ex-vivo</i> skin permeation and deposition study	<b>89</b>
6. Microscopic examination	<b>89</b>
7. Lyophilization of tacrolimus-loaded chitosan nanoparticles	<b>89</b>
7.1. Fourier transform infrared (FT-IR) analysis	<b>89</b>

7.2. Differential scanning calorimetry (DSC)	<b>90</b>
8. Stability studies	<b>90</b>
9. <i>In vivo</i> testing of antipsoriatic effect of tacrolimus hybrid nanoparticles on imiquimod (IMQ)-induced animal model	<b>90</b>
10. Statistical analysis	<b>91</b>
<b>Results and discussion</b>	
1. Preliminary studies	<b>92</b>
2. Particle size (PS) and polydispersity index (PDI) analysis	<b>94</b>
3. Zeta potential	<b>101</b>
4. Entrapment Efficiency (EE%) and drug loading (DL%)	<b>103</b>
5. <i>In vitro</i> drug release study	<b>106</b>
6. <i>Ex-vivo</i> skin permeation and deposition study	<b>108</b>
7. Microscopic examination	<b>112</b>
8. FT-IR analysis	<b>113</b>
9. Differential scanning calorimetry (DSC)	<b>115</b>
10. Stability Studies	<b>116</b>
11. <i>In vivo</i> study of the antipsoriatic effect of tacrolimus nanoparticles on imiquimod (IMQ)-induced animal model	<b>117</b>
<b>Conclusions</b>	<b>125</b>
<b>Chapter III: Gold nanoparticles hybridized with chitosan and lecithin-chitosan nanoparticles loaded with tacrolimus</b>	
<b>Introduction</b>	<b>127</b>
<b>Materials</b>	<b>130</b>
<b>Equipment</b>	<b>131</b>
<b>Methods</b>	
1. Preparation of hybridized formulations	<b>132</b>
2. Characterization of the nanoparticles	
2.1. Particles size (PS), polysidpersity index (PDI) analysis and zeta potential	<b>133</b>
2.2. Morphological examination	
2.2.1. Visual examination of nanoparticles	<b>134</b>
2.2.2. Elemental mapping by TEM	<b>134</b>

2.3. X-ray diffraction analysis	<b>134</b>
3. <i>In vivo</i> testing of antipsoriatic effect on imiquimod (IMQ)-induced animal model	<b>135</b>
4. Statistical analysis	<b>137</b>
<b>Results and discussion</b>	
1. Formulation results	<b>138</b>
1.1. Particle size (PS) and polydispersity index (PDI) analysis	<b>139</b>
1.2. Zeta potential	<b>140</b>
2. Microscopic examination	
2.1. Morphological examination of nanoparticles	<b>141</b>
2.2. Elemental mapping	<b>144</b>
3. X-ray diffraction analysis	<b>146</b>
4. <i>In vivo</i> study of the antipsoriatic effect of tacrolimus nanoparticles and gold-hybridized tacrolimus nanoparticles on imiquimod (IMQ)-induced animal model	<b>147</b>
<b>Conclusions</b>	<b>160</b>
<b>Future perspective</b>	<b>162</b>
