Monitoring and controlling of bacteria in pharmaceutical industries water system

Thesis

**Submitted for Partial Fulfillment of Master Degree in
Science in Microbiology**

By

Nancy Ahmed Abdelrady Selim

(B.Sc. Microbiology- Chemistry, 2015)

Supervisors

Prof. Mohamed Khaled Ibrahim

Professor of Bacteriology,
Faculty of Science,
Former Vice Dean for Education and
Student Affairs,
Ain Shams University

Dr. Ali Mohamed Ali Saeed

Lecturer of Microbiology,
Microbiology Department,
Faculty of Science,
Ain Shams University

Microbiology Department

Faculty of Science

Ain Shams University

2021

Approval sheet

Monitoring and controlling of bacteria in pharmaceutical industries water system

By

Nancy Ahmed Abdelrady Selim

(B.Sc. Microbiology- Chemistry, 2015)

Supervisors Approved

Prof. Mohamed Khaled Ibrahim

Professor of Bacteriology,
Faculty of Science,
Former Vice Dean for Education and Student Affairs,
Ain Shams University

Dr. Ali Mohamed Ali Saeed

Lecturer of Microbiology,
Microbiology Department,
Faculty of science,
Ain Shams University

Examination committee

Prof. Mohamed Khaled Ibrahim

Professor of Bacteriology,
Faculty of Science,
Former Vice Dean for Education and Student Affairs,
Ain Shams University

Prof. Nagwa Mahmoud Sedky Osman

Professor of Botany and Microbiology,
Faculty of Science (Girls),
El Azhar University

Prof. Atef Ahmed Abdelhamed Elhela

Professor and Head of Pharmacognosy Department,
Faculty of Pharmacy,
El Azhar University

Date / /2021

Approval date / / 2021

University Council approved / /

Declaration

This dissertation has not been previously submitted for any degree at this or at any other university

Nancy Ahmed Selim

بِسْمِ اللَّهِ الرَّحْمَنِ
الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ
لَنَا إِلَّا بِمَا عَلَّمْتَنَا إِنَّكَ
أَنْتَ الْعَلِيمُ الْحَكِيمُ

صدق الله العظيم

(البقره آيه: 32)

ACKNOWLEDGEMENT

**First and foremost, I feel always indebted to
Allah, the most beneficent and merciful**

*I would like to express my deep gratitude and thanks to my dear supervisor **Prof. Mohamed Khaled Ibrahim** Professor of Bacteriology, Faculty of Science, Former Vice Dean for Education and Student Affairs, Ain Shams University for his help, encouragement, continuous advice, valuable suggestion in all steps of this thesis and his expert supervision. I am honored to be one of his students and I hope that he is proud of me.*

*I am gratefully and sincerely thankful to my dear supervisor **Dr. Ali Mohamed Ali Saeed**, Lecturer of Microbiology, Microbiology Department, Faculty of science, Ain Shams University for his help, continuous support, valuable instructions and guidance from the start of the work. He is always patient, perfect in work and the best advisor. I am really proud to be one of his students and I hope that he is satisfied with me.*

*My deep appreciation goes to my whole family especially **my dear mother and father** for their*

*continuous prayers, support and for everything they have done for me. **My lovely brothers** for their prayers and support.*

*And finally, a very special thanks to **my Husband** who has stood by me all through my study and for his constant support, advices and prayers.*

Abstract	1
Introduction	2
Aim of work	5
1. Review of Literature	6
1.1 Types of water for pharmaceutical use	8
1.1.1 Drinking water	8
1.1.2 Purified Water (PW)	9
1.1.3 Highly purified water (HPW)	10
1.1.4 Water for Injection (WFI)	11
1.2 Treatment of water process	11
1.2.1 Pretreatment phase	11
1.2.2 Coagulation and sedimentation	12
1.2.3 Water softening process	14
1.2.4 Filtration	15
1.2.4.1 Sand filtration	15
1.2.5 Membrane filtration	18
1.2.6 Disinfection	19
1.3 Microbial contamination in pharmaceutical water system	22
1.4 Limitation of microbial growth	27
1.5 Microbial contamination in pharmaceutical Products	29

2. Materials and methods	31
2.1 Materials	31
2.1.1 Media	31
2.1.2 Chemicals and reagents	35
2.1.3 Antibiotic discs	37
2.1.4 VITEK cards	37
2.1.5 Preservatives	37
2.2 Methods	40
2.2.1 Bacterial isolation and examination from pharmaceutical water system	40
2.2.2 Purification and preservation of isolates	41
2.2.3 Identification of bacterial isolates by conventional methods	41
2.2.3.1 Gram staining	42
2.2.3.2 Biochemical Tests	42
2.2.3.3 VITEK 2 identification system (BioMerieux)	46
2.2.4 Antibiotic sensitivity test (Disc Diffusion Method)	49
2.2.5 Disinfectant Efficacy test	50
2.2.6 Antimicrobial preservative efficacy test	51
3. Results	54
3.1 Bacterial identification results	54
3.2 Bacterial species isolated from different phases in pharmaceutical water system	56
3.3 Antibiotic susceptibility test results	62
3.4 Disinfectant efficacy test	66
3.5 Microbial preservative efficacy test results	76
4. Discussion	81

5. English summary	100
6. Conclusion	
7. Refrences	105
8. Arabic summary	

LIST OF TABLES

Table No.	Title	Page No.
A	List of Antibiotics discussed	37
B	List of preservatives used	38
1	Sampling points in pharmaceutical water system	41
2	Gram negative VITEK card contents	47
3	Categories of pharmaceutical products	51
4	Acceptance criteria of effective preservative for tested bacteria	52
5	Identification of isolates from pharmaceutical water system	55
6	Bacterial species isolated from main source of water (wells) in pharmaceutical water system	57
7	Bacterial species isolated from pretreatment and treatment phase in pharmaceutical water system	58
8	Bacterial species isolated from purified water in pharmaceutical water system	59
9	Bacterial species isolated from all stages in pharmaceutical water system	60
10	Antibiotic susceptibility of different isolates from pharmaceutical water system	63
11	Inhibition zones for bacterial isolates from purified water against antibiotics	65
12	Disinfectant (Delladet) efficacy against isolates from pharmaceutical water system at contact time 15 minutes on three different surfaces.	67

13	Disinfectant (Ethyl alcohol 70%) efficacy against isolates from pharmaceutical water system at contact time 15 minutes on three different surfaces	68
14	Disinfectant (Ethyl alcohol 85%) efficacy against isolates from pharmaceutical water system at contact time 15 minutes on three different surfaces	69
15	Disinfectant (Minncare 1%) efficacy against isolates from pharmaceutical water system at contact time 15 minutes on three different surfaces	70
16	Disinfectant (Dettol 5%) efficacy against isolates from pharmaceutical water system at contact time 15 minutes on three different surfaces	71
17	Disinfectant (Sodium Hypochlorite 5%) efficacy against isolates from pharmaceutical water system at contact time 15 minutes on three different surfaces	72
18	Effect of disinfectants using different surfaces (stainless steel, Epoxy and Ceramic) on bacterial isolates from pharmaceutical water system.	75
19 a	Log reduction of bacterial isolates by different preservatives	77
19 b	Log reduction of bacterial isolates by different preservatives	78
19 c	Log reduction of bacterial isolates by different preservatives	79
20	Effect of preservatives on isolates from pharmaceutical water system.	80
