MONA MAGHRABY

Evaluation of Different Diagnostic Modalities in Diagnosis of Egyptian Children with Interstitial Lung Disease

Thesis

Submitted for Partial Fulfilment of
M.D. Degree in **Pediatrics**

By

Salma Gamal Abdelhafeez Abdelhady

M.B., B.Ch. (2012). M.Sc. (2017) Faculty of Medicine- Ain Shams University

Under Supervision of

Prof. Dr. Eman Mahmoud Fouda

*Professor of Pediatrics
Faculty of Medicine, Ain Shams University*

Prof. Dr. Malak Ali Shaheen

*Professor of Pediatrics
Faculty of Medicine, Ain Shams University*

Prof. Dr. Faten Abdelaziz Ghazal

*Professor of Histopathology
Faculty of Medicine, Ain Shams University*

Ass. Prof. Dr. Ahmed Mohammed Mohammed Mostafa

*Assistant Professor of Thoracic Surgery
Faculty of Medicine, Ain Shams University.*

Dr. Heba Moustafa Hamza

*Lecturer of Pediatrics
Faculty of Medicine, Ain Shams University*

Faculty of Medicine, Ain Shams University

2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالَ

سُبْحَانَكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgments

*First and foremost, I feel always indebted to
Allah the Most Beneficent and Merciful.*

*I wish to express my deepest gratitude and appreciation to
Prof. Dr. Eman Mahmoud Fouda, Professor of Pediatrics,
Faculty of Medicine, Ain Shams University, for her meticulous
supervision, kind guidance, valuable instructions and generous help.*

*I am deeply thankful to **Prof. Dr. Malak Ali Shaheen**,
Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for
her great help, outstanding support, active participation and guidance.*

*Special thanks are due to **Prof. Dr. Faten Abdelaziz
Ghazal**, Professor of Histopathology, Faculty of Medicine, Ain Shams
University, for her sincere efforts, fruitful encouragement.*

*I can hardly find the words to express my gratitude to **Ass. Prof.
Dr. Ahmed Mohammed Mostafa**, Assistant Professor of Thoracic
Surgery, Faculty of Medicine, Ain Shams University, for his supervision,
continuous help, encouragement throughout this work.*

*Great thanks to **Dr. Heba Moustafa Hamza**, Lecturer of
Pediatrics, Faculty of Medicine, Ain Shams University for her valuable
effort and contribution.*

*I would also like to thank **Prof. Andrew G. Nicholson**,
Department of Histopathology, Royal Brompton and Harefield NHS
Foundation Trust & National Heart and Lung Institute, Imperial
College, London, UK; For his valuable contribution to the
histopathology revision.*

*I would also like to thank **Dr. Ahmed Osman**, Department of
Radiology, Faculty of Medicine, Ain Shams University, Cairo, Egypt;
For the second revision of the radiology.*

*I would like to express my gratitude to all my family for their
support till this work was completed.*

Salma Gamal Abdelhafeez Abdelhady

List of Contents

Title	Page No.
List of Tables.....	5
List of Figures	9
List of Abbreviations.....	14
Abstract	17
Introduction	- 1 -
Aim of the Work	3
Review of Literature	
▪ Definitions, Epidemiology and Clinical Presentation of chILD...	4
▪ Classification of chILD/DPLD.....	9
▪ Diagnostic Algorithm for chILD Syndrome.....	62
Patients and Methods.....	78
Results.....	99
Supplementary Histopathology Atlas for Enrolled Cases	151
Discussion	162
Summary.....	181
Conclusion	183
Recommendations	184
References	185
Arabic Summary	

List of Tables

Table No.	Title	Page No.
Table 1:	Classification scheme for pediatric diffuse parenchymal lung disease	10
Table 2:	Summary of genetic mutations involved in surfactant protein dysfunction.....	22
Table 3:	Causes of DAH in children	32
Table 4:	Common causes of OP pattern	52
Table 5:	Diseases associated with follicular bronchiolitis	58
Table 6:	Histopathological classification of small airways disease.....	59
Table 7:	Childhood interstitial lung disease illness severity score	66
Table 8:	Diagnostic bronchoalveolar lavage findings in chILD	69
Table 9:	Proposed pharmacological therapy for chILD.....	72
Table 10:	Improvement in physiological outcomes considered to be a treatment response in chILD.....	73
Table 11:	Acute exacerbation in chILD.....	77
Table 12:	WHO criteria for RD in infants and children	81
Table 13:	Interpretation of the results of spirometry.....	86
Table 14:	Illness severity score for childhood interstitial lung disease.....	87
Table 15:	American Society of Anesthesiologists (ASA) physical status classification system	92
Table 16:	Sociodemographic data of the study group	99
Table 17:	Shows frequency of environmental exposures among studied patients.....	101

List of Tables cont...

Table No.	Title	Page No.
Table 18:	Shows significant perinatal and family history among studied patients.....	102
Table 19:	Shows previous admission history among studied patients	103
Table 20:	Shows frequency of symptoms among studied patients.	104
Table 21:	Shows frequency of signs among studied patients	106
Table 22:	Shows frequency of respiratory distress (RD) grades among studied patients	107
Table 23:	Shows basic anthropometric parameters and vital data among studied patients.	108
Table 24:	Shows chest examination findings among studied patients	109
Table 25:	Shows saturation levels (SpO2 %) at room air (at rest) and during sleep among studied patients	110
Table 26:	Shows routine laboratory data among studied group	111
Table 27:	Shows frequency of pulmonary hypertension among studied patients	112
Table 28:	Fan illness severity score among studied group	113
Table 29:	Mean Fan scores among studied group	114
Table 30:	Shows frequency of chest CT findings among studied patients	114
Table 31:	Spirometry parameters among studied group.....	116
Table 32:	Shows percentage of subjects who had a surgical lung biopsy among studied group.	118

List of Tables cont...

Table No.	Title	Page No.
Table 33:	Perioperative data for enrolled subjects who had surgical lung biopsy.....	119
Table 34:	Shows frequency of diagnoses among studied group after the diagnostic evaluation.....	120
Table 35:	Range and Mean of oxygen saturation (SpO2) % at rest and after exercise (6-minute walk test-6MWT) among studied patients	121
Table 36:	Statistical comparison between enrolled subjects who had pulmonary hypertension and subjects who didn't suffer from pulmonary hypertension as regards anthropometric data, saturation levels in different situations and spirometry parameters	122
Table 37:	Relation between weight, height and BMI Z scores and other studied parameters among study group using Spearman test	125
Table 38:	Relation between spirometry test results and other studied parameters among study group using Spearman test.	129
Table 39:	Summary of patient data diagnosed with DPLD related to environmental exposures	131
Table 40:	Summary of patient data diagnosed with DPLD related to immune dysregulation or compromise	133
Table 41:	Summary of patient data diagnosed with DPLD related to interstitial pneumonias	137
Table 42:	Summary of patient data diagnosed with DPLD related to small airway disease	141

List of Tables cont...

Table No.	Title	Page No.
Table 43:	Summary of patient data diagnosed with DPLD related to systemic diseases	144
Table 44:	Summary of patient data diagnosed with post-infectious DPLD.....	147
Table 45:	Highlights on treatment changes after the diagnostic evaluation.....	149

List of Figures

Fig. No.	Title	Page No.
Figure 1:	Venn diagram that demonstrates the relationship among diffuse lung disease, childhood interstitial lung disease, and specific chILD diagnoses	5
Figure 2:	Acinar dysplasia.....	12
Figure 3:	Alveolar capillary dysplasia with misalignment of the pulmonary veins	13
Figure 4:	Lasting changes of BPD in a child born at 28 weeks gestation.....	15
Figure 5:	Imaging and histopathology in a dyspneic child with trisomy 10.....	15
Figure 6:	A HRCT image from an infant with a filamin A gene mutation.....	16
Figure 7:	HRCT findings in pulmonary interstitial glycogenosis	17
Figure 8:	Lung histopathology from an infant with PIG	18
Figure 9:	Imaging features characteristic to NEHI	19
Figure 10:	NEHI histopathology.....	20
Figure 11:	Histopathology of SP-B mutation	23
Figure 12:	PAP secondary to surfactant protein dysfunction (<i>ABCA3</i> mutation).....	24
Figure 13:	<i>ABCA3</i> mutation	24
Figure 14:	NKX2.1 (TTF-1) deficiency in a hypothyroid 4-week-old infant with brain-thyroid-lung syndrome.....	26
Figure 15:	HRCT and HP in sarcoidosis.....	29
Figure 16:	Langerans cell histocystosis (LCH)	31
Figure 17:	HRCT in hemosiderosis.....	34

List of Figures cont...
