Development and Standardization of an Arabic Semantic Test for Egyptian Arabic Speaking Children

Thesis

Submitted For Partial Fulfillment of Master Degree in
Phoniatrics

Presented by

Dina Mohamed Abdel-Moneim

MB. Bch., Faculty of Medicine, Ain Shams University
The Resident of Phoniatrics, Phoniatric Unit, Department of Otolaryngology
Faculty of Medicine, Ain Shams University

Under Supervision of

Professor/ Hassan Hosny Ghandour

Professor of Phoniatrics
Phoniatrics Unit, Otorhinolaryngology Department,
Faculty of Medicine, Ain Shams University

Dr./ Dina Ahmed Elrefaie

Lecturer of Phoniatrics
Phoniatrics Unit, Otorhinolaryngology Department
Faculty of Medicine, Ain Shams University

Dr./ Mona Sameeh Khodeir

Lecturer of Phoniatrics
Phoniatrics Unit, Otorhinolaryngology Department
Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain Shams University
Cairo, Egypt
2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالَ

سَبَّحَانَكَ لَا إِلَهَ إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgment

*First and above all, all thanks to **Allah** the Merciful, the compassionate without his help I could have never completed my work.*

*I am greatly honored that I have worked under the supervision of **Professor Dr. Hassan El Ghandour**, Faculty of Medicine Ain Shams University, for his guidance and support.*

*I am also delighted and deeply grateful to **Dr. Dina Elrefaie**, Lecturer of phoniatics, Faculty of Medicine, Ain Shams University, for her support and patience all through the work.*

*Finally, all my thanks and love to **Dr. Mona Sameeh Khodeir**, Lecturer of Phoniatics, Faculty of Medicine, Ain Shams University, for her generous help, hard work and constructive criticism.*

*My great appreciation is directed to **my sincere colleagues** at the Phoniatics department, Ain Shams University, for their real help and co-operation in the preparation of the materials and the practical work.*

Thanks to everyone who offered any advice or minimal help to facilitate the completion of the work.

Lastly, but not least, thanks to my lovely parents, God bless them, for their prayers and support, my husband who always believed in me, and my little daughter always giving me hope and making me do my best to give her a good example and showing her the best of me.

Dina Mohamed A. Moneim

ABSTRACT

Background: Lexical-semantic development for preschool children has several applications in research design, assessment, and intervention that were very difficult to obtain before. In English and most Indo-European languages, there is a long tradition of examining aspects of child language by computing different developmental indices from spontaneous language samples and through applying different language tests. However, for the Arabic language, these aspects are lacking in this valuable area of research. Bridging this gap, this work provided the first comprehensive study of the Arabic language lexical-semantic development among preschool Egyptian Arabic speaking children.

Aim of the work: to provide a descriptive profile of the lexical-semantic development among the preschool Egyptian Arabic-speaking children.

Subjects and methods: This is a descriptive cross-sectional study conducted on 120 typically developed Egyptian Arabic-speaking children. Children were randomly selected by inclusion and exclusion criteria in the age range between 2-4 years. Children were assessed by the lexical-semantic subtest of the standardized Egyptian Arabic Semantic Test (EAST). Children's total score and scores of the receptive and expressive aspects of the lexical-semantic subtest of EAST were calculated and compared to determine the development of the lexical-semantic among the 4 age-groups.

Results: A statistically significant difference was found between lexical-semantic growth among the 4 age groups. Lexical semantic growth is positively correlated to the chronological age of the participated children.

Conclusion: The lexical-semantic develops as early as the age of 2 years. Noun classes and verbs started to be identified by children at the age of 2 years. As children grow; noun vocabulary increases both expressively and receptively.

Adjectives started to be acquired at age of 2.6 to 3 years and were mostly identified by the age of 3 to 3.6 years.
