Nutritional Screening Assessment and Early Nutrition Intervention among Hospitalized Children

Thesis

Submitted for Partial Fulfillment of MD in Pediatrics

By

Nada Tharwat Ezzat Deraz

MB BCh (2011), Master degree in Pediatrics (2016)

Under supervision of

Prof. Dr. Mohamed Ashraf Abdel Wahed

Professor of Pediatrics

Faculty of Medicine – Ain Shams University

Prof. Dr. Ehab Khairy Emam

Professor of Pediatrics

Faculty of Medicine – Ain Shams University

Prof. Dr. May Fouad Nassar

Professor of Pediatrics

Faculty of Medicine – Ain Shams University

Ass. Prof. Dr. Nayera Samy Mostafa

Assistant Professor of Community Medicine

Faculty of Medicine – Ain Shams University

Dr. Marian Girgis Rizk

Lecturer of Pediatrics

Faculty of Medicine – Ain Shams University

*Faculty of Medicine
Ain Shams University*

2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

سببنا نك لا تعلم لنا
إلا ما علمتنا إنك أنت
العليم الحكيم

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**,
the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to **Prof. Dr. Mohamed Ashraf Abdel Wahed**, Professor of Pediatrics Faculty of Medicine – Ain Shams University for his keen guidance, kind supervision, valuable advice and continuous encouragement, which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and thanks to **Prof. Dr. Ehab Khairy Emam**, Professor of Pediatrics, Faculty of Medicine – Ain Shams University, for his kind care, continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

*I am deeply thankful to **Prof. Dr. May Fouad Nassar**, Professor of Pediatrics, Faculty of Medicine – Ain Shams University, for her great help, active participation and guidance.*

*I wish to introduce my deep respect and thanks to **Ass. Prof. Dr. Mayera Samy Mostafa**, Assistant Professor of Community Medicine, Faculty of Medicine – Ain Shams University, for her kindness, supervision and cooperation in this work.*

*I am deeply grateful for **Dr. Marian Girgis Rizk**, Lecturer of Pediatrics, Faculty of Medicine – Ain Shams University, for her valuable help and guidance.*

I would like to express my hearty thanks to all my family especially my father and husband for their support till this work was completed.

Last but not least my sincere thanks and appreciation to all patients and their families who participated in this study.

Nada Tharwat

List of Contents

Title	Page No.
List of Abbreviations.....	i
List of Tables	ii
List of Figures	x
Introduction	15
Aim of the Work.....	17
Review of Literature	
Malnutrition	18
Nutritional Screening.....	29
Patients and Methods.....	41
Results	67
Discussion	151
Summary	164
Conclusion	166
Recommendations	168
References	169
Arabic Summary	—

List of Abbreviations

Abb.	Full term
ASPEN	American Society of Parenteral and Enteral Nutrition
BMI.....	Body Mass Index
BNF	British National Formulary
CDC	Center of disease control
CIAF	Composite Index of Anthropometric failure
ESPEN	European Society of Parenteral and Enteral Nutrition
ESPGHN	European Society for Pediatric Gastroenterology, Hepatology, and Nutrition
GPD	Gross Domestic Product
HAZ	Height Z score
HC.....	head circumference
MUAC.....	Mid-Upper Arm Circumference
NCHS	National Center for Health Statistics
NRT	Nutrition Rescue Team
OF	Over failure
OFC	Occipito-frontal circumference
ON	Only normal
PeDiSMART	Pediatric digital scaled malnutrition risk screening tool
PNRS	Pediatric nutritional score
PNST	Pediatric nutrition screening tool
PYMS.....	Pediatric Yorkhill malnutrition score
SD-scores.....	Standard Deviation scores
SGA.....	Subjective global assessment
STAMP	Screening tool for the assessment of malnutrition in pediatrics
STRONG _{kids}	Screening Tool for Risk on Nutritional Status and Growth
UF	Under failure
WAZ.....	Weight Z score
WHO	World Health Organization
WHS	Weight/height Z score

List of Tables

Table No.	Title	Page No.
Table (1):	Disease group considered high risk in STRONG _{kids} method.	38
Table (2):	WHO classification of growth parameters	48
Table (3):	STRONG _{kids} score.....	59
Table (4):	The seven groups of CIAF according to Nandy's modification.....	60
Table (5):	The malnutrition indices:.....	61
Table (6):	The new CIAF model as proposed by Kuiti and Bose in 2018 including nine groups	64
Table (7):	Classification of the study sample according to gender.....	68
Table (8):	Distribution of the study sample according to age groups	69
Table (9):	Distribution of the study sample according to their nutritional status	70
Table (10):	Distribution of the study sample according to order of birth.....	71
Table (11):	Distribution of the study sample according to social class.....	72
Table (12):	Distribution of the study sample according to their affiliation to specialized clinics	73
Table (13):	Distribution of the study sample according to presence of organomegaly.....	75
Table (14):	STRONG _{kids} score results during screening of the initial sample.....	76
Table (15):	Distribution of the study sample according to presence of chronic illness	77

List of Tables Cont...

Table No.	Title	Page No.
Table (16):	Distribution of the study sample according to presence of signs of nutritional deficiency.....	78
Table (17):	The initial anthropometric measurements of the study sample.....	79
Table (18):	The anthropometric measurements of the study sample after one month of NRT assessment, after removing children with normal anthropometry.....	80
Table (19):	The anthropometric measurements of the study sample after six months of NRT assessment, after excluding children with normal anthropometry.....	81
Table (20):	Prevalence of different CIAF groups in the initial screening.....	82
Table (21):	Comparison between the initial anthropometric measurements among the intervention group and those after one month of NRT intervention.....	83
Table (22):	Comparison between anthropometric measurements among the intervention group after one and six months	85
Table (23):	Comparison between initial anthropometric measurements among the intervention group and those after six months of NRT intervention.....	87
Table (24):	Distribution of moderate and severe underweight at initial screening	89

List of Tables Cont...

Table No.	Title	Page No.
Table (25):	Distribution of moderate and severe underweight after 1 month of intervention by NRT.....	90
Table (26):	Distribution of moderate and severe underweight after 6 months of intervention by NRT.....	91
Table (27):	Comparison between underweight severity between the initial anthropometric measurements and those after one and 6 months of NRT intervention.....	92
Table (28):	Distribution of moderate and severe stunting at initial screening.....	93
Table (29):	Distribution of moderate and severe stunting after one month of NRT intervention.....	94
Table (30):	Distribution of moderate and severe stunting after 6 months of NRT intervention.....	95
Table (31):	Comparison between stunting severity in initial screening and after one and 6 months of NRT intervention.....	96
Table (32):	Distribution of moderate and severe wasting at initial screening.....	97
Table (33):	Distribution of moderate and severe wasting after one month of NRT intervention.....	98
Table (34):	Distribution of moderate and severe wasting at 6 months of NRT intervention.....	99

List of Tables Cont...

Table No.	Title	Page No.
Table (35):	Comparison between wasting severity in initial screening and after one and 6 months of NRT intervention.....	100
Table (36):	Difference between initial laboratory parameters and those after one and 6 months of intervention.....	101
Table (37):	Classification of the under-nutrition group according to gender.....	102
Table (38):	Age group distribution of the under-nutrition group	103
Table (39):	Order of birth distribution of the under-nutrition group	104
Table (40):	Social class distribution of the under-nutrition group	105
Table (41):	Distribution of the under-nutrition group according to follow up in specialized clinics....	106
Table (42):	Distribution of the under-nutrition group according to presence of organomegaly.....	108
Table (43):	Distribution of the under-nutrition group according to presence of chronic illness	109
Table (44):	Distribution of the under-nutrition group according to presence of signs of nutritional deficiency	110
Table (45):	STRONG _{kids} score results in under-nutrition sample.....	111
Table (46):	Initial anthropometric measurements of the under-nutrition group.....	112
Table (47):	The anthropometric measurements of the under-nutrition group (134 patients) one month after NRT intervention.....	113

List of Tables Cont...

Table No.	Title	Page No.
Table (48):	Comparison between initial anthropometric measurements among the under-nutrition group and those after one month of NRT intervention.....	114
Table (49):	The anthropometric measurements of under-nutrition group 6 months after NRT intervention	116
Table (50):	Comparison between the anthropometric measurements of the under-nutrition group (134 patients) taken after one and 6 months of NRT intervention.....	117
Table (51):	Comparison between the initial anthropometric measurements of the under-nutrition group (134 patients) and those taken after 6 months of NRT intervention.....	119
Table (52):	Distribution of moderate and severe underweight at initial screening of under-nutrition group	121
Table (53):	Distribution of moderate and severe underweight in the under-nutrition group after one month of NRT intervention	122
Table (54):	Distribution of moderate and severe underweight in the under-nutrition group after 6 months of NRT intervention	123
Table (55):	Comparison between underweight severity in initial screening, and after one and 6 months of NRT intervention in the under-nutrition group.	124
