PHARMACOTOXICOLOGICAL STUDY OF SOME DRUG INTERACTIONS WITH SELENIUM AND/OR TELLURIUM

THESIS

**SUBMITTED FOR THE DEGREE OF DOCTORATE
OF PHILOSOPHY IN PHARMACEUTICAL SCIENCES
(PHARMACOLOGY)**

**BY
MOHAMMED RAAFAT ABDALLA**

***ASSISTANT LECTURER OF PHARMACOLOGY & TOXICOLOGY
FACULTY OF PHARMACY, CAIRO UNIVERSITY***

Under The Supervision of

Prof. Dr. Helmy M.S. Ahmed

*Professor of
Pharmacology & Toxicology
Vice-Dean
Faculty of Pharmacy,
Cairo University*

Prof. Dr. Ezz E. El-Denshary

*Professor of
Pharmacology & Toxicology
Faculty of Pharmacy,
Cairo University*

Prof. Dr. Mona M. Seif El-Nasr

*Professor of
Pharmacology & Toxicology
Faculty of Pharmacy,
Cairo University*

**Faculty of Pharmacy
Cairo University
2002**

Date : 16 / 3 / 2002

ACKNOWLEDGMENT

I Wish to express my sincere gratitude and profound thanks to Prof. Dr. Ezz E. El-Denshary, Professor of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University, for his kind and keen supervision, guidance, valuable comments and sincere advice throughout the work of this thesis.

It gives me a great pleasure to express my sincere thanks and gratitude to Prof. Dr. Mona M. Seif El-Nasr, Professor of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University, for her keen supervision, fruitful help and generous assistance during all stages of this study.

A special word of thanks to Prof. Dr. Hassan Farghali, Chairman of Institute of Pharmacology, 1st Faculty of Medicine, Charles University, Prague, Czech Republic, for his generous assistance in teaching and establishing the hepatocyte bioreactor technique.

To my mother and wife, I am greatly endepted for their continuous encouragement , patience and support.

Finally, I would like to extend my deep thanks to all of my professors and colleagues in the Pharmacology Department for kind words and support.

Mohammed Raafat

LIST OF ABBREVIATIONS

- **ACE** : angiotensin converting enzyme.
- **AD** : Alzheimer's disease.
- **AI** : angiotensin I.
- **Ang II** : angiotensin II.
- **ATP** : adenosine triphosphate.
- **BK** : bradykinin.
- **BP** : blood pressure.
- **DOCA** : deoxycorticosterone acetate.
- **EDCFs** : endothelium-derived contracting factors.
- **EDRFs** : endothelium-derived relaxing factors.
- **FFAs** : free fatty acids.
- **GSH** : reduced glutathione.
- **GSSG** : oxidized glutathione.
- **KHB** : Krebs Henseleit buffer.
- **K-K-PG system** : kallikrein kinin prostaglandin system.
- **1K-1C RHR** : one kidney-one clip renal hypertensive rats.
- **2K-1C RHR** : two kidney-one clip renal hypertensive rats.
- **LDH** : lactate dehydrogenase.
- **LDL** : low density lipoproteins.
- **MDA** : malondialdehyde.
- **NAC** : N-acetylcysteine.
- **NO** : nitric oxide.
- **PAF** : platelet activating factor.
- **PGs** : prostaglandins.
- **PRA** : plasma renin activity.
- **PUFAs** : polyunsaturated fatty acids.
- **RAAS** : renin angiotensin aldosterone system.
- **RAS** : renin angiotensin system.
- **ROS** : reactive oxygen species.
- **Se-GSHPx** : selenium-dependent glutathione peroxidase.
- **SHR** : spontaneously hypertensive rats.
- **SOD** : superoxide dismutase.
- **TXA₂** : thromboxane A₂.
- **VLDL** : very low density lipoproteins.
- **VSMCs** : vascular smooth muscle cells.

CONTENTS

SUBJECT	PAGE
INTRODUCTION	
• Biologically active free radicals	1
• Damaging reactions of free radicals (Oxidative Stress)	6
• Defense against free radicals (Biological Antioxidants)	10
- Preventive defense mechanisms	10
- Scavenging or interceptive defense	13
- Repair processes.....	18
• Reactive oxygen species (ROS) and hypertension	19
• Reactive oxygen species (ROS) and ischaemic tissue injury	22
• N-acetylcysteine	25
• Alpha-tocopherol (Vitamin E).....	28
• Captopril	31
• Selenium	34
• Tellurium	42
AIM OF THE WORK	46
EXPERIMENTAL DESIGN	48
MATERIAL	
• Animals	54
• Drugs, Chemicals and Analytical reagents.....	54
METHODS	
• Immobilized perfused hepatocytes	56

• Induction of brain ischaemia	61
• Induction of renal ischaemia (renal hypertension)	62
• Biochemical evaluations :	
- Lipid peroxides (MDA).....	63
- Reduced glutathione (GSH)	65
- Cytosolic protein content.....	67
- Superoxide dismutase (SOD).....	68
- Lactate dehydrogenase (LDH).....	69
- Glutathione peroxidase (GSHPx).....	70
- Interleukin-2 (IL-2).....	71
• Statistical analysis	75
RESULTS	76
DISCUSSION	132
SUMMARY AND CONCLUSION	163
REFERENCES	169
ARABIC SUMMARY	

LIST OF TABLES

TABLE	PAGE
1. Activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation	77
2. Effect of N-acetylcysteine on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation.....	80
3. Effect of selenium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation	83
4. Effect of N-acetylcysteine alone and in combination with selenium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation	86
5. Effect of tellurium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation	89
6. Effect of N-acetylcysteine alone and in combination with tellurium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation	92
7. Effect of selenium and tellurium alone and in combination on the activity of lactate dehydrogenase measured in the perfusate of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia / reoxygenation	95

LIST OF FIGURES

FIGURE	PAGE
i. Free radical-induced lipid peroxidation in biomembranes.....	8
ii. Components of the perfusion system of the isolated rat liver and hepatocytes.....	58
iii. Standard curve for lipid peroxides.....	65
iv. Standard curve for reduced glutathione.....	66
v. Standard curve for superoxide dismutase.....	69
vi. Standard curve for serum interleukin -2.....	75

I- EXPERIMENTS ON ISOLATED RAT HEPATOCYTES :

1. Activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/ reoxygenation	78
2. Effect of N-acetylcysteine on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/reoxygenation.....	81
3. Effect of selenium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/reoxygenation	84
4. Effect of N-acetylcysteine alone and in combination with selenium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/reoxygenation	87
5. Effect of tellurium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/reoxygenation	90
6. Effect of N-acetylcysteine alone and in combination with tellurium on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/reoxygenation.....	93

7. Effect of selenium and tellurium alone and in combination on the activity of lactate dehydrogenase measured in the perfusate of isolated rat hepatocytes cast in agarose gel during anoxia/reoxygenation96

II- EXPERIMENTS ON CEREBRAL ISCHAEMIA :

8. Effect of selenium on brain cytosolic lactate dehydrogenase activity in rats following global cerebral ischaemia/reperfusion.....98
9. Effect of α -tocopherol alone and in combination with selenium on brain cytosolic lactate dehydrogenase activity in rats following global cerebral ischaemia/reperfusion.....99
10. Effect of selenium on brain lipid peroxide content (measured as MDA) in rats following global cerebral ischaemia/reperfusion.....101
11. Effect of α -tocopherol alone and in combination with selenium on brain lipid peroxide content (measured as MDA) in rats following global cerebral ischaemia/reperfusion.102
12. Effect of selenium on brain cytosolic superoxide dismutase activity in rats following global cerebral ischaemia/reperfusion.....104
13. Effect of α -tocopherol alone and in combination with selenium on brain cytosolic superoxide dismutase activity in rats following global cerebral ischaemia/reperfusion.....105
14. Effect of selenium on brain cytosolic glutathione peroxidase activity in rats following global cerebral ischaemia/reperfusion.....107
15. Effect of α -tocopherol alone and in combination with selenium on brain cytosolic glutathione peroxidase activity in rats following global cerebral ischaemia/reperfusion.....108
16. Effect of selenium on brain reduced glutathione content in rats following global cerebral ischaemia/reperfusion.....110

17. Effect of α -tocopherol alone and in combination with selenium on brain reduced glutathione content in rats following global cerebral ischaemia/reperfusion.111

III- EXPERIMENTS ON RENAL ISCHAEMIA :

18. Effect of selenium on systolic blood pressure of renal hypertensive rats.....113
19. Effect of captopril alone and in combination with selenium on systolic blood pressure of renal hypertensive rats.....114
20. Effect of selenium on serum lipid peroxides level (measured as MDA) of renal hypertensive rats116
21. Effect of captopril alone and in combination with selenium on serum lipid peroxides level (measured as MDA) of renal hypertensive rats...117
22. Effect of selenium on lipid peroxide content of the ischaemic kidney of renal hypertensive rats.....119
23. Effect of captopril alone and in combination with selenium on lipid peroxide content of the ischaemic kidney of renal hypertensive rats..120
24. Effect of selenium on cytosolic superoxide dismutase activity in the ischaemic kidney of renal hypertensive rats.....122
25. Effect of captopril alone and in combination with selenium on cytosolic superoxide dismutase activity in the ischaemic kidney of renal hypertensive rats.....123
26. Effect of selenium on cytosolic glutathione peroxidase activity in the ischaemic kidney of renal hypertensive rats.....125
27. Effect of captopril alone and in combination with selenium on cytosolic glutathione peroxidase activity in the ischaemic kidney of renal hypertensive rats.....126
