Synthesis and industrial applications of superabsorbent polymers

A Thesis submitted

By

Doaa Samir Abd El-Rehim Mahmoud

Assistant Researcher, Department of Polymers and
Pigments, Department, National Research Centre, Dokki,
Cairo, Egypt

**For the requirement of Ph.D. Degree of Science in
Chemistry**

Supervised By

Prof. Dr. Abd El-Guad Mohamed Rabia

*Professor of Organic Chemistry, Faculty of Science,
Ain shams University*

Prof. Dr. Salwa Hassan El-Sabbagh

*Professor of Polymer physics, Polymers and Pigments
department, National Research Center*

Prof. Dr. Medhat Lotfy Tawfic

*Professor of Polymer Chemistry and Pigments,
Polymers and Pigments department,
National Research Center*

**To Department of Chemistry
Faculty of Science, Ain Shams University
(2021)**

Acknowledgement

*First, my greatest praise and sincere thankfulness should be offered to **ALLAH**, for the uncountable blessings and continuous support to strive for the best I could do with everything I did.*

*Next, I would like to express my sincere thanks and gratitude to **Prof. Dr. Abd El guad Rabee**, Professor of organic chemistry, Chemistry Department, Faculty of Science, Ain Shams University, for his encouragement to finish this work, help, valuable comments, and complete revision of the thesis.*

*I wish to express my deep appreciation and gratitude to **Prof. Dr. Salwa Hassan El-Sabbagh and Prof. Dr. Medhat Lotfy Tawfic**, Polymers and Pigments Department, National Research Centre, Cairo, Egypt, for her suggesting and supervising the presented topic, extensive help and their strong support in all possible ways, particularly in difficult times. **They** taught me how to think deeply, and to listen to the different scientific opinions with an opened mind. With my best wishes for them to be in a good health all their life.*

*In addition, I owe thanks to **all the Member** of Polymers and Pigments Department, National Research Centre, Cairo, Egypt, for their cooperation. Last but not the least, I am heartedly grateful to my husband **Abed Ali** who have always supported me.*

Doaa Samir

	Abstract			viii
Chapter I				
Part A: Introduction				
1.1	Hydrogels			1
	1.1.1	Classification of hydrogels		2
1.2	Superabsorbent polymer hydrogels			4
	1.2.1	Important properties of SAPs		5
	1.2.2	Water absorption capacity		6
		1.2.2.1	Principle of swelling	7
	1.2.3	Preparation techniques		9
	1.2.4	Factors affecting the properties of SAPs		10
		1.2.4.1.	Monomers for production of SAPs	10
		1.2.4.2.	Initiator and cross-linker for production of SAPs	12
	1.2.5.	Applications of superabsorbent polymers		16
		1.2.5.1.	Superabsorbent polymer in rubber	17
		1.2.5.2.	Superabsorbent polymer in concrete	18
Part B: Literature review				
	1.1	Synthesis and characterization of superabsorbent polymers		22
	1.2	Superabsorbent polymer in rubber		26
	1.3.	Superabsorbent polymer in concrete		27

	Objective of the Work	29
	Chapter II Experimental part	
2.1.	Materials and chemicals	31
2.2	Preparations of superabsorbent polymer	32
	2.2.1. Synthesis of sodium polyacrylate	32
	2.2.2 Synthesis of co-polymers	33
	2.2.2.1 Synthesis of poly(sodium acrylate-co- glycidyl methacrylate)	33
	2.2.2.2. Synthesis of ploy(sodium acrylate-co-maleic anhydride)	35
	2.2.2.3. Synthesis of ploy(sodium acrylate-co-maleic anhydride)	36
2.3.	superabsorbent polymers evaluation	38
	2.3.1. Determination of gel fraction	38
	2.3.2. The water absorbency	38
	2.3.3. Viscosity measurement	39
2.4.	Methods of instrumental analysis	39
	2.4.1. Infrared Spectroscopy	39
	2.4.2. High-resolution transmission electron microscope	40
	2.4.3. Thermal gravimetric analysis	40
	2.4.4. Differential Scanning Calorimeter	40
2.5.	Synthesis of rubber roofing sheet (sodium polyacrylate/NR)	40
	2.5.1. Water absorbance test	41
	2.5.2 The density measurement	42

	2.5.3.	Scanning electron microscopy	43
2.6.		Synthesis concrete using super absorbent polymer	43
	2.6.1.	Mix proportion	43
	2.6.2.	Methodology	44
	2.6.3	Compressive strength test	44
Chapter III			
<i>Results and discussion</i>			
Part A: Characterizations of superabsorbent polymers			
3.1.		Characterization of the prepared sodium polyacrylate	47
	3.1.1.	FTIR spectroscopy	47
	3.1.2.	High resolution transmission electron microscopy (HRTEM) analysis	48
	3.1.3	Thermal gravimetric analysis (TGA)	49
	3.1.4.	DSC analysis	50
	3.1.5.	Gel Fraction	51
	3.1. 6.	Water absorbency	52
	3.1.7	Viscosity measurement	55
3.2.		Characterization of cross ross-linked sodium acrylate and glycidyl methacrylate	59
	3.2.1.	FTIR spectroscopy	59
	3.2.2.	HRTEM analysis	61
	3.2.3	TGA analysis	63
	3.2.4	DSC analysis	64
	3.2.5.	Gel Fraction	66
	3.2.6	Water absorbency	67
	3.2.7	Viscosity measurement	75
3.3.		Characterization of cross-linked sodium acrylate and maleic anhydride	82
	3.3.1.	FTIR spectroscopy	82
	3.3.2.	HRTEM analysis	84

	3.3.3.	TGA analysis	86
	3.3.4.	DSC analysis	87
	3.3.5.	Gel Fraction	88
	3.3.6.	Water absorbency	89
	3.3.7.	Viscosity measurement	97
3.4.		Characterization of cross-linked sodium acrylate and methylmethacrylate	106
	3.4.1.	FTIR spectroscopy	106
	3.4.2.	HRTEM analysis	108
	3.4.3.	TGA analysis	110
	3.4.4.	DSC analysis	110
	3.4.5.	Gel Fraction	112
	3.4.6.	Water absorbency	113
	3.4.7.	Viscosity measurement	120
		Part B: Applications of superabsorbent polymers	
	3.5.	Applications in rubber	129
	3.5.1.	Water swelling properties	129
	3.5.2.	The density measurement	130
	3.5.3.	SEM micrographs	131
	3.6.	Applications in concrete	133
		Summary and conclusion	138
		References	143
		Publication	
		Arabic Summary
