MONA MAGHRABY

Magnetothermal Properties and Magnetocaloric Effect in some RFe_2 Compounds.

A Thesis Submitted in partial fulfillment of the requirement for the degree of master of science (M.Sc.) in Physics

By

Rana Hesham Gamal El-Din Afify

B.Sc. in Physics, Faculty of Science, Ain Shams University, 2015

To Physics Department, Faculty of Science, Ain Shams University

Supervisors

Prof. Dr. Ahmed Abdel Ghani Awad

Professor of Materials Science

Physics Department, Faculty of Science, Ain Shams University

Ass. Prof. Dr. Mona Abdel Aziz Hussein

Associated Professor of theoretical Physics

Physics Department, Faculty of Science, Ain Shams University

Prof. Dr. Mohamed Sherif Yehia

Professor of theoretical physics

Physics Department, Faculty of Science-Helwan University

Acknowledgements

Above all, praise to **ALLAH**, the lord of the world, by whose grace this work has been completed and never leaving me during this stage.

I would like to thank ***Prof. Dr. Nabil Ali Elfaramawy***, chairman of the physics department, for his interest, encouragement and support.

My deep thanks to my supervisors for their continuous support and advice.

I appreciate the guidance, the efforts and the supervision of ***Prof. Dr. Ahmed Abdel Ghani***.

My sincere thanks are presented to ***Prof. Dr. Sherif Yehia*** for helping me learn the computational codes.

I would also thank ***Ass. Prof. Dr. Mona Abdel Aziz*** for her guidance, support and effect in checking and editing this study.

I would also extend my special thanks to ***Prof. Dr. Samy Hashem*** who contributed for his scientific discussion.

My thanks are also for my fellow mates ***Amani Adel*** and ***Ahmed Abdel Kader***.

I would like to thank my friends ***Ekram Assad*** and ***Alaa Tarek***.

I would like to thank my father ***Dr. H. G. Afify*** for his scientific advice and continuous encouragement.

I would like to thank my brother and my sister.

Last but not least, my deep thanks to my husband ***Mohamed Helal*** for everything he brought and still brings for me.

Rana Hesham

Abstract x

English summary xi

Chapter 1 Introduction 1

1.1 Magnetic materials 1

1.1.1 Diamagnetic materials 1

1.1.2 Paramagnetic materials 2

1.1.3 Antiferromagnetic materials 2

1.1.4 Ferrimagnetic materials 3

1.1.5 Ferromagnetic materials 4

1.2 Weiss molecular field theory 4

1.2.1 Weiss molecular field theory of ferromagnetism 4

1.2.2 Weiss molecular field theory of antiferromagnetism 5

1.2.3 Weiss molecular field theory of ferrimagnetism 6

1.3 Physical origin of Weiss field 7

1.4 Compensation temperature 8

1.5 Rare-earth elements and transition metals 9

	1.5.1	Rare-earth elements	9
	1.5.2	Transition metals	10
	1.5.3	Rare-earth intermetallic compounds	10
1.6	Magnetocaloric effect		11
	1.6.1	Historical introduction	11
	1.6.2	Applications of MCE	12
	1.6.3	Literature survey	13
	1.7	Aim of the work	14
Chapter 2		**Theoretical model and computation**	15
2.1	Density functional theory		15
	2.1.1	Introduction	15
	2.1.2	Schrödinger equation	15
	2.1.3	Many body problem	16
	2.1.4	Born-Oppenheimer approximation	16
	2.1.5	Density functional theory (DFT)	17
	2.1.6	Kohn-Sham equations	18
	2.1.7	The exchange correlation functional	19
	2.1.8	Wien2k code	22
2.2	Thermomagnetic properties and magnetocaloric effect		22
	2.2.1	Magnetic properties	22
	2.2.2	Thermodynamic properties	24
		2.2.2.1 Heat capacity	24

		2.2.2.2 Entropy	27
	2.2.3	Magnetocaloric effect	30
Chapter 3		**Results and discussion**	35
3.1	Introduction		35
3.2	Magnetization		36
3.3	Heat capacity		45
	3.3.1	Electronic heat capacity	45
	3.3.2	Lattice heat capacity	47
	3.3.3	Magnetic heat capacity	48
	3.3.4	Total Heat capacity	50
3.4	Entropy		51
	3.4.1	Electronic entropy	51
	3.4.2	Lattice entropy	52
	3.4.3	Magnetic entropy	52
	3.4.4	Total entropy	55
3.5	Magnetocaloric effect		55
	3.5.1	Isothermal change in entropy	56
	3.5.2	Adiabatic change in temperature	58
Conclusions			61
References			63
