MONA MAGHRABY

Interaction of plant proteinase inhibitors with gut proteinase of cotton leaf worm, *Spodoptera littoralis* (Bosid.)

A Thesis

Submitted for the degree of Master of Science as a Partial
fulfillment for requirements of the Master of Science

By

Kholoud Abd Elftah Ibrahim

B.Sc. (Entomology-Microbiology), 2013

Faculty of Science, Ain Shams University

Under supervision of

Prof. Dr. Zahia Kamel Moustafa

Emeritus Professor of insect physiology, Entomology Department, Faculty of
Science, Ain Shams University

Prof. Dr. Sondos Abd-Eltawab Mohamed Hussian

Head researcher, Plant Protection Research Institut, Cotton Leaf worm
Research Department, Agricultural Research Center.

Dr. Dalia Mohamad Mahmoud

Assistant Professor of Entomology, Entomology Department, Faculty of
Science, Ain Shams University

2021

Biography

Kholoud Abd Elftah Ibrahim

B.Sc. (Entomology-Microbiology), 2013

Entomology Department

Faculty of Science

Ain Shams University

Present Occupation:

Demonstrator, Entomology Department, Faculty of
Science, Ain Shams University.

Email:

kholoudabdelfatah@sci.edu.eg

Date of master registration:

June 2016.

Dedication

This thesis is dedicated to my
beloved family, husband,
friends, supervisors and
colleagues.

Acknowledgments

First, thanks to “ALLAH” to whom I relate any success in achieving any work in my life.

*I am deeply indebted to **prof. Dr. Zahia Kamel Moustafa**, professor of insect physiology, Entomology Department, Faculty of science, Ain Shams University for suggestion the research work, kind supervision, voluable advice and guidance during the progress of this study.*

*My deep thanks and everlasting gratitude goes to **prof. Dr. Sondos Abd-Eltawab**, Head researcher , Plant Protection Research Institut, Cotton Leaf worm Research Department, Agricultural Research Center. for her help, valuable advice, keen supervision, encouragement and all facilities offered during the investigation, the preparation of this manuscript, and completion of this study.*

I am greatly thankful for Dr. Dalia Mohamad, Assistant professor of Entomology, Faculty of science, Ain Shams University for her innovation, continuous supervision, helpful suggestions, constructive criticism, wise advises and her continuous encouragement.

List of abbreviations

Abbreviation	Meaning
ANOVA	Analysis of variance.
BAPNA	N-9 α -benzoyl-DL-arginine-p-nitroanilide hydrochloride.
BAEE	N- α -benzoyl-L-arginine ethyl ester hydrochloride.
BGPIs	Bitter ground protease inhibitors.
BgPI	Black gram protease inhibitor.
BmPI	<i>Butea monosperma</i> protease inhibitor.
BSA	Bovine serum albumin.
BTEE	N- α -benzoyl-L-tyrosine ethyl ester.
BTpNA	N-benzoyl-L-tyrosine p-nitroanilide.
CaTI	Cicer arietinum trypsin inhibitor.
CBB	Coomassie brilliant blue dye.
CIA	Chymotrypsin inhibitor activity.
CUI	Chymotrypsin unit inhibition.
DMSO	Dimethylsulfoxide.
HGP	<i>Helicoverpa</i> gut proteinases.
LBTI	Limabean trypsin inhibitor.
OD	Optical density.
PAGE	Poly acrylamide gel Electrophoresis.
PeTI	<i>Platypodium elegans</i> trypsin inhibitor.
PIs	Proteinase inhibitors.
PMSF	phenylmethyl-sulfonyl fluoride.

PPIs	Plant proteinase inhibitors.
PPI	Potato proteinase inhibitor.
RgPI	Red gram protease inhibitor.
SAAPFPNA	Succinyl-alanyl-alanyl-propyl-phenyl-alanyl-p nitroanilide.
SBBI	Soybean Bowman-Birk inhibitor
SBTI	Soybean trypsin inhibitor.
SDS	Sodium dodecylsulphate.
SGP	Spodoptera gut proteinase.
SKTI	Soybean Kunitz trypsin. inhibitor.
SPI	Soybean proteinase inhibitor.
SPIF	Soybean proteinase inhibitor fraction.
TI	Trypsin inhibitor.
TIA	Trypsin inhibitory activity.
TLCK	N- α -p-tosyl-L-lysine chloromethyl ketone HCl.
TPCK	L-1-tosylamide-2-phenylethyl chloromethyl ketone.
TUI	Trypsin unit inhibition.

Contents	Page No.
I) Introduction	1
II) Review of literature	6
1. Effect of serine proteinases inhibitors on proteinase enzymes of lepidopterous insects:	6
1.1. Biochemical effects.	6
1.2. Biological effects.	16
1.3. Zymogram analysis.	24
III) Materials and methods	26
1. Tested insect:	26
2. Extraction and partial purification of Soybean proteinase inhibitor (SPI):	27
3. Screening the inhibitory activity of partial purified SPI on <i>Spodoptera littoralis</i> gut proteinases (SGP) in vitro:	28
3.1. Preparation of the larval midgut extract:	28
3.2. Determination of inhibitory activity:	28
4. Determination of midgut Serine proteinase in 4 th instar larvae after 24h feeding on SPI (in vivo):	31
4.1. Sample preparation:	31
4.2. Determination of trypsin and chymotrypsin-like enzyme activity:	32
5. Biological evaluation:	32
6. Estimation of total protein content:	33
6.1. Preparation of total protein reagents:	34
6.2. Preparation of the standard protein solution:	34
6.3. Construction of standard calibration curve:	34
6.4. Estimation of protein content in unknown samples:	35
6.5. Calculations:	35

7. Statistical analysis:	35
8. Zymogram analysis:	35
IV) Results	37
1. Purification of proteinase inhibitor and screening of its inhibitory activity.	37
1.1. Purified fractions of soybean proteinase inhibitor (SPI) and its inhibitory activity against trypsin-like enzyme from <i>S. littoralis</i> :	37
1.2. Purified fractions of SPI and its inhibitory activity against chymotrypsin-like enzyme from <i>S. littoralis</i> :	39
2. The post-ingestion effect of SPI on the activity of midgut Serine proteinases of 4 th instar larvae of <i>S. littoralis</i> .	40
2.1. Determination of total protein content:	40
2.2. In vivo effect of SPI on the activity of midgut trypsin-like enzyme in 4 th instar larvae of <i>S. littoralis</i> after feeding 24h.	42
2.3. In vivo effect of SPI on the activity of midgut chymotrypsin-like enzyme in the 4 th instar larvae of <i>S. littoralis</i> after feeding 24h.	44
3. Effect of bio-feeding assay of SPI on growth and development of the 4 th instar larvae of <i>S. littoralis</i> .	45
3.1. Effect of SPI on growth and development of the 4 th instar larvae of <i>S. littoralis</i> :	45
3.2. Effects of SPI on pupal weight, pupation %, and adult emergency of the 4 th instar larvae of <i>S. littoralis</i> :	49
4. Zymogram analysis of trypsin-like enzyme activity after feeding 4 th instar larvae of <i>S. littoralis</i> 24h on SPI:	51
V) Discussion	53

VI) Summary	69
VII) References	74
Arabic summary	

List of Tables

No.	Title	Page
1	Purified fractions of SPI and its inhibitory activity against trypsin-like enzyme from <i>Spodoptera littoralis</i> .	38
2	Purified fractions of SPI and its inhibitory activity against chymotrypsin-like enzyme from <i>S. littoralis</i> .	40
3	Total protein content in the 4 th instar larvae of <i>S. littoralis</i> midgut after 24h feeding on SPI.	41
4	In vivo effect of SPI on trypsin – like enzyme extracted from the 4 th instar larvae of <i>S. littoralis</i> after feeding 24h.	43
5	In vivo effect of SPI on chymotrypsin – like enzyme extracted from the 4 th instar larvae of <i>S. littoralis</i> after feeding 24h.	44
6	Effects of SPI on larval growth and development of the 4 th instar larvae of <i>S. littoralis</i> .	47
7	Effects of SPI on pupal weight, pupation %, and adult emergency of the 4 th instar larvae of <i>S. littoralis</i> .	50

List of figures

No.	Title	Page
1	Total protein content in the 4 th instar larvae of <i>Spodoptera littoralis</i> midgut after feeding 24h on SPI.	42
2	Trypsin – like enzyme activity in the 4 th instar larvae of <i>S. littoralis</i> after feeding 24h on SPI.	43
3	Chymotrypsin – like enzyme activity in the 4 th instar larvae of <i>S. littoralis</i> after feeding 24h on SPI.	45
4	Effects of SPI on larval weight of the 4 th instar larvae of <i>S. littoralis</i> .	48
5	Effects of SPI on larval weight of the <i>S. littoralis</i> larvae after nine days of feeding. (A) Control, (B) Larvae fed on SPI F30% and (C) Larvae fed on SPI F60%.	48
6	Effects of SPI on pupal weight of the 4 th instar larvae of <i>S. littoralis</i> .	50
7	Effects of SPI on larval pupal intermediate of the 4 th instar larvae of <i>S. littoralis</i> . (A) Control, (B) Larvae fed on SPI F30% and (C) Larvae fed on SPI F60%.	51
8	Zymogram analysis of trypsin-like enzyme extracted from the 4 th instar larvae feed 24h on SPI; 1-Control; 2-SPI F30%; 3-SPI F60%; 4-SPI F90% 5- Positive control.	52
