MONA MAGHRABY

Ain Shams University
Faculty of Science
Department of Biochemistry

Association analysis of gene polymorphisms of *ABCA7*, *Clusterin* and *MS4A6A* in Alzheimer

Submitted in partial fulfillment for the requirements of the master degree of
Science in Biochemistry

Thesis submitted by
Hanem Gameel Abdelrahman
(B.Sc. in Biochemistry, Ain Shams University, 2013)

Under Supervision of

Prof. Dr. Mohamed Ragaa Mohamed
Professor of Biochemistry & Molecular Biology
Faculty of Science - Ain Shams University

Dr. Eman Mohamed Saleh
Assistant Professor of Biochemistry
Faculty of Science - Ain Shams University

Dr. Abeer Ramadan Salamah
Research Assistant Professor of Molecular genetic
Molecular genetics and Enzymology Department
National Research Center

2021

Biography

Full Name : Hanem Gameel Abdelrahman
Birth date : 8/01/1992
Birth place : Cairo, Egypt
Graduation date : 2013
Awarded degrees: B.Sc. in Biochemistry, 2013
Grade : Very good

Acknowledgement

All thanks are always to ALLAH, for giving me the ability to complete this work.

*It was a great pleasure for me to be supervised by **Prof. Dr. Mohamed Ragaa Mohamed**, Professor of Biochemistry and Molecular Biology, Biochemistry Department, Faculty of Science, Ain Shams University, for his endless help, fatherly attitude, valuable suggestions, and accurate supervision. I am very much honored to have him as my supervisor.*

*No words could express my sincere and deepest thanks to **Dr. Abeer Ramadan Salamah**, Research Assistant Professor of Molecular Genetics, Molecular Genetics and Enzymology Department, National Research Centre, for suggesting such an interesting point of research and valuable expertise supervision, also for her revision for every detail, her constant support and encouragement are very much appreciated.*

*I am greatly indebted and grateful to **Dr. Eman Mohamed Saleh**, Assistant Professor of Biochemistry, Biochemistry Department, Faculty of Science, Ain Shams University, for her supervision, accurate revision for every detail and support during completing this work.*

*My appreciation is expressed to **Dr. Alyaa Adel saleh**, Assistant Professor of Psychiatry, Psychiatry Department, Faculty of Medicine, Cairo Univeristy, for her practical guidance, experience and support during completing this work.*

I wish to express my deep thanks to Dr. Noha Ahmed Sabry, Professor and Head of Psychiatry Department, Faculty of Medicine, Cairo Univeristy, for her support and advice during completing this work,

Deep endless thanks, greetings and appreciation are going to my mother and father for their great help, support and encouragement.

Hanem Gameel Abdelrahman

DEDICATION

*To my dear family, I dedicate this work to you for
your great support, help and continuous
encouragement to perfect my work.*

*With all love to my mother and father for their
support and prayers to fulfill my hopes.*

Yours sincerely,

Hanem Gameel Abdelrahman

LIST OF ABBREVIATIONS

Abbreviated name	Full name
3'UTR	: 3' untranslated region
Aβ	: Amyloid beta
ABCA7	: ATP-binding cassette transporter A7
Ach	: Acetylcholine
AChE	: Acetylcholinesterase
AD	: Alzheimer's Disease
ADAM	: Disintegrin and metalloprotease
AICD	: Amyloid Intra-Cellular Domain
AMPA	: α -amino-3-hydroxy-5-methyl-4-isoxazole propionic Acid
APH-1	: Anterior pharynx defensive phenotype 1
ApoA-I	: Apolipoprotein A-I
APOE	: Apolipoprotein E
APOE ϵ4	: Apolipoprotein E ϵ 4
APP	: Amyloid Precursor Protein
BACE	: β -site – APP – cleaving enzyme
BCR	: β cell antigen receptor complex
BBB	: Blood brain barrier
Bp	: Base pair
BuChE	: Butyryl cholin esterase
CDRS	: Clinical Dementia Rating Scale
CJD	: Creutzfeldt-Jakob disease
CLU	: Clusterin
CNS	: Central nervous system
CSF	: Cerebrospinal fluid
CT	: Computerized tomography
DLB	: Dementia with Lewy bodies
DNA	: Deoxyribonucleic acid
dNTP	: Deoxynucleotide triphosphate
DSM-5	: Statistical Manual of Mental Disorders-5
DTT	: Dithiothreitol
EC	: Entorhinal cortex

EDTA	: Ethylene diamine tetra-acetic acid
FEOAD	: Familial early-onset Alzheimer's disease
FTD	: Front temporal dementia
g	: Gram
G	: Guanine
GABA	: Gamma aminobutyric acid
GWAS	: Genome-wide association study
HDL	: High density lipoprotein
IDE	: Insulin degrading enzyme
LOAD	: Late onset Alzheimer's disease
LRP	: Lipoprotein receptor-related protein
LTD	: Long-term depression
LTP	: Long term potentiation
MCI	: Mild Cognitive Impairment
MMSE	: Mini-Mental State Examination
MoCA-B	: Montreal Cognitive Assessment-Basic
MRI	: Magnetic resonance imaging
MS4A6A	: Membrane-Spanning-4-domains, subfamily A, member 6A
NEP	: Neprilysin
NFT	: Neurofibrillary tangle.
NIH	: National Institute of Health
NMDA	: N- methyl-D-aspartate
NPH	: Normal pressure hydrocephalus
OMIM No.	: Online Mendelian Inheritance in Man number, Aknowledge base of human genes and genetic disorders
OS	: Oxidative stress
PCR	: Polymerase chain reaction
PD	: Parkinson's disease
PET	: Positron emission tomography
PNS	: Peripheral nervous system
RAGE	: Receptor for advanced glycation end products
RE	: Restriction enzyme
RFLP	: Restriction fragment length polymorphism
ROS	: Reactive oxygen species
SDS	: Sodium dodecyl sulfate

SNPs	: Single nucleotide polymorphisms
TBE	: Tris-borate EDTA
TBI	: Traumatic brain injury
TE	: Tris-EDTA
TNF	: Tumor necrosis factor
TREM2	: Triggering receptor expressed in myloid cell 2
WHO	: World Health Organization

List of tables

No.	Title	Page
2.1.	Primer sequences used in the PCR amplification for the polymorphic loci.	81
2.2.	Reaction composition using Taq PCR Master Mix.	82
2.3.	PCR thermal cycler settings for <i>ABCA7</i> , <i>CLU</i> and <i>MS4A6A</i> amplification.	83
2.4.	Setting up a restriction enzyme digestion.	91
3.1.	Demographic characteristics of controls and cases.	110
3.2.	Comparison between the genotype distributions among the studied subjects (Cases &controls) for <i>ABCA7</i> rs3764650 SNP.	114
3.3.	Comparison between the genotype distributions among the studied subjects (Cases &controls) for <i>CLU</i> rs11136000 SNP.	119
3.4.	Comparison between the genotype distributions among the studied subjects (Cases &controls) for <i>MS4A6A</i> rs610932 SNP.	124
3.5.	<i>APOE</i> $\epsilon 4$ association with the three different gene polymorphisms in AD patients.	128
3.6.	Correlations between genes frequency and cognitive tests.	131

LIST OF FIGURES

No.	Title	Page
1.1.	Illustrative drawing showing anatomy of the brain and its principal parts.	8
1.2.	The structure of neuron.	11
1.3.	The connection between two neurons.	12
1.4.	The chemical transmission of a nerve impulse at the synapse.	13
1.5.	Glial cells support neurons and maintain their environment.	14
1.6.	The difference between health and Alzheimer's brain.	20
1.7.	Hypothesis for pathophysiology of Alzheimer's disease.	23
1.8.	Several potential roles for N-methyl- D-aspartate receptors (NMDARs) in the amyloid- β (A β) cascade are depicted.	28
1.9.	Schematic of the amyloid precursor protein.	29
1.10.	Amyloidogenic and non-amyloidogenic processing of the amyloid precursor protein.	31
1.11.	Production of amyloid β peptide from sequential proteolytic breaks of the amyloid precursor protein.	32
1.12.	Map of <i>ABCA7</i> gene.	48
1.13.	Model of <i>ABCA7</i> gene.	48
1.14.	Possible pathogenic pathways mediated by <i>ABCA7</i> in Alzheimer's disease.	49
1.15.	<i>CLU</i> gene, protein structure and its identified SNPs	53
1.16.	Structure of <i>CLU</i> gene, transcription and translation products.	54
