***Synthesis and Characterization of
nanostructure Semiconducting thin films for
solar cells applications***

“A thesis Submitted for the Degree of Doctor of Philosophy in Science in
Physics”

By
Manar Ahmed Farag Ahmed
Ain Shams University
(BSc physics 2011)
Supervised By

Prof. Dr. Gamal Mahmoud Ali Youssef
Professor of Materials Science
Department of Physics, Faculty of Science-ASU

Prof. Dr. Mahmoud Mohamed El-Nahass
Professor of Solid State physics
Physics Department, Faculty of Education-ASU

Prof. Dr. Emad El-Din Mohamed Elmenyawy
Professor of Solid State Physics department, Solid State
Electronics Laboratory, National Research Center.

Dr. Tamer Abdallah Fathy Sharaf.
Ass. Prof. of Experimental Physics,
Department of Physics, Faculty of Science-ASU

2021

Ain Shams University
Faculty of Science
Physics department

APPROVAL SHEET

Title of the Ph.D Thesis

Synthesis and Characterization of nanostructure Semiconducting thin films for solar cells applications

Name of the Candidate

Manar Ahmed Farag Ahmed

Supervisors

(Signature)

Prof. Dr. Gamal Mahmoud Ali Youssef
Professor of Materials Science

Name: Manar Ahmed Farag Ahmed

Degree: Ph.D

Department: Physics – Solid State Physics

Faculty: Science

University: Ain Shams University

Graduation Date: 2011

Registration Date: 2017

Grant Year: 2021

جامعة عين شمس
كلية العلوم
قسم الفيزياء

" تخليق وتوصيف أغشية رقيقة نانومترية شبه موصلة لإستخدامها في تطبيقات الخلايا الشمسية "

رسالة مقدمة للحصول على درجة دكتوراة الفلسفة فى العلوم فى الفيزياء.

مقدمة من

منار أحمد فرج أحمد

تحت إشراف

الأستاذ الدكتور/ جمال محمود على يوسف

استاذ فيزياء المواد المتفرغ
كلية العلوم جامعة عين شمس

الأستاذ الدكتور/ محمود محمد النحاس

استاذ فيزياء الجوامد المتفرغ
كلية التربية جامعة عين شمس

الاستاذ الدكتور / عماد الدين محمد المنياوى

أستاذ فيزياء الجوامد معمل الكترولنيات الجوامد
المركز القومى للبحوث

دكتور / تامر عبدالله فتحى شرف

أستاذ مساعد الفيزياء التجريبية
كلية العلوم جامعة عين شمس

جامعة عين شمس
كلية العلوم
قسم الفيزياء

رسالة دكتوراة الفلسفة فى العلوم فى الفيزياء

اسم الطالب: منار أحمد فرج أحمد

عنوان الرسالة:

" تخليق وتوصيف أغشية رقيقة نانومترية شبه موصلة لإستخدامها في تطبيقات الخلايا الشمسية "

الدرجة العلمية: دكتوراة فى العلوم (فيزياء المواد)

لجنة الإشراف:

أ. د / جمال محمود على يوسف أستاذ متفرغ بقسم الفيزياء- كلية العلوم- جامعة عين شمس
أ. د / محمود محمد النحاس أستاذ متفرغ بقسم الفيزياء- كلية التربية- جامعة عين شمس
أ. د/ عماد الدين محمد المنياوى أستاذ فيزياء الجوامد-معمل الكترونيئات الجوامد -المركز القومى للبحوث
د / تامر عبد الله فتحى أستاذ مساعد - بقسم الفيزياء- كلية العلوم- جامعة عين شمس

لجنة التحكيم:

أ.د. جمال محمود على يوسف أستاذ متفرغ بقسم الفيزياء- كلية العلوم- جامعة عين شمس
أ.د. ميرفت جمال أحمد الشعراوى أستاذ متفرغ بقسم الفيزياء -كلية العلوم- جامعة بنها
د. ليندا كاتين دكتور بقسم الفيزياء جامعة نانت

الدراسات العليا

أجيزت الرسالة بتاريخ 21 / 6 / 2021

موافقة مجلس الجامعة

2021 / 5 / 17

تاريخ التسجيل 12 / 6 / 2017

موافقة مجلس الكلية

2021 / 4 / 12

جامعة عين شمس
كلية العلوم
قسم الفيزياء

اسم الطالبة: منار أحمد فرج أحمد

الدرجة العلمية : دكتوراة فى العلوم (فيزياء المواد)

القسم التابع له: قسم الفيزياء

اسم الكلية: كلية العلوم

الجامعة: جامعة عين شمس

سنة الحصول على البكالوريوس: 2011

سنة التسجيل: 2017

سنة المنح: 2021

Contents

Acknowledgment	I
List of figures	II
List of tables	VII
Published papers	VIII
Abstract	IX

Chapter 1: Introduction

1.1 Overview	1
1.2. Historical review OSCs	2
1.3 Current status	3
1.4 Objectives of work	4
1.5 Thesis structure	4

Chapter 2: Theoretical background and Literature review

2.1 Nanomaterials	6
2.1.1 Semiconductor nanocrystals	6
2.1.2 Shape control of nanoparticles	11
2.2 Importance of CdSe	14
2.2.1 Properties of CdSe quantum dots (CdSe QDs)	16
2.2.1.1 Electronic Structure of CdSe	16
2.2.1.2 Optical properties of CdSe QDs	18
2.2.1.3 Electronic properties	19
2.2.2 Synthesis of CdSe QDs	20
2.2.2.1 Solution synthesis	20
2.2.2.1.1 Hot injection method	20
2.2.2.1.2 Low temperature aqueous method	21

2.2.2.1.3 Electrochemical method	21
2.2.2.1.4 Hydrothermal/solvothermal method	21
2.2.2.2 Solid state synthesis	22
2.2.2.2.1 Mechano-chemical method	22
2.2.2.2.2 Vapor deposition method	23
2.2.3 Applications of CdSe QDs	23
2.2.3.1 Solar cells	23
2.2.3.2 Photodetectors	25
2.2.3.3 Light emitting diodes (LEDs)	25
2.3 Organic and inorganic semiconductors	25
2.4 Donor and acceptor materials	27
2.5 Conjugated semiconducting materials	29
2.5.1 Conjugated polymers	29
2.6 Organic and inorganic solar cells	32
2.6.1 Device architecture and operational mechanism	34
2.6.2 Charge and energy transfer in nanocrystals and conjugated polymers	39
2.6.3 Degradation of hybrid heterojunction solar cells	40
2.6.3.1 Sources of solar cell degradation	40
2.6.3.2 Avoiding of BHJ CdSe polymer solar cell degradation	42
2.7 Literature review	43

Chapter 3:
Experimental Methods and Techniques

3.1 Materials	48
3.2 Synthesis of CdSe nanorods (NRs)	48
3.2.1 Powder synthesis via hydrothermal method	48

3.2.2 Hydrothermal procedure	49
3.3 Characterization methods	50
3.3.1 X-ray diffraction	50
3.3.2 Energy dispersive X-ray spectroscopy	51
3.4 Morphological characterization	52
3.4.1 Transmission electron microscopy	52
3.4.2 Scanning Electron Microscopy	53
3.4.3 Atomic Force Microscopy	54
3.5 Optical measurements	56
3.4.1 Absorption	56
3.5.2 UV-Vis-NIR transmission and reflectance	57
3.6 Solar cell fabrication	58

Chapter 4: Result and Discussion

4.1 Structural characteristics of CdSe NRs	61
4.1.1 Energy dispersive X-ray	61
4.1.2 X-ray diffraction (XRD)	61
4.1.3 Transmission electron microscope	64
4.2 Structural characterization of the composite films	66
4.2.1 XRD	66
4.2.2 Surface morphology	67
4.2.3 Surface topography	68
4.3 Optical properties	70
4.3.1 Absorption analysis	70
4.3.2 The reflectance and transmittance measurements	71
4.4 J–V characteristics	72

Conclusion	84
References	85
Arabic summary	i

AKNOWLEDGMENT

*First I wish to express my gratitude to the Almighty **Allah** for providing the grant to make this thesis possible.*

*The **Ph.D.** research period sustained the most difficult part of my life, not because of the unsolvable research problems, but due to several personal moments of difficulties. Naturally there are so many people involved in inspiring me at those moments of depressions, whose constant support and encouragement were so crucial to achieve what I am today.*

*I would like to express my special appreciation and thanks to my director Professor Dr. **Gamal Mahmoud Ali Youssef**. I would like to thank you for encouraging my research and for allowing me to grow as a research scientist. Your advice on both research as well as on my career have been priceless. He is also a very good teacher and a wonderful research guide with vast knowledge and insight. Without your supervision and constant help this dissertation would not have been possible.*

*I sincerely thank **Prof. Dr/ Mahmoud El.Nahass** for valuable scientific discussions and advices, also besides the scientific area, which I greatly enjoyed as an origin of inspiration.*

*A mere word of sincere appreciation is insufficient to express my gratitude to my research supervisor **Prof. Dr. Emad El-Din Mohamed Elmenyawy**. I appreciate all his contributions of time, ideas and funding to make my **Ph.D.** program motivated and productive. I am grateful to him for his guidance, fruitful discussions, technical critiques, valuable advice, constant support and encouragement throughout the course of this work. It*

has been really my pleasure to learn from him to solve challenging problems with deep understanding and creativity. His guidance with deep knowledge on broad spectrum of science and bright intuition keeps me motivated and going forward. But above all, he is a very good human being. I would be happy if I could acquire a few tips of his huge personality and knowledge.

*I also thank **Dr. Tamer abdallah.** for his valuable Comments and support. I would like to thank our assistant in the lab, **Madam Amal**, for her help and her kindness.*

I would also like to thank all of my friends who supported me in writing, and incited me to strive towards my goal.

*Last but not least, a special thanks to my family. Words cannot express how grateful I am to **my father, my mother and my brother and sisters** for all of the sacrifices that you've made on my behalf. Your prayer for me was what sustained me thus far.*

*Finally, I would like to thank my husband, **Eng. / moamen safwat**, love of my life, for his understanding, endless love, encouragement and endless support and my lovely son, **Asser**, for his existing in my life, granting me the motherhood.*
