**STUDY OF INTERACTION OF THE FORMED
HIGH PRESSURE AND TEMPERATURE
BOILERS INTERNAL SCALES ON
THE CORROSION BEHAVIOUR
OF CARBON STEEL
TUBES**

A Thesis

Submitted for the master degree in chemistry

By

Amira Sayed Mohamed Saber

B.Sc. (1986)

To

Chemistry Department

Faculty of Science,

Ain Shams University

Cairo – Egypt

2002

B
1079c

STUDY OF INTERACTION OF THE FORMED HIGH PRESSURE AND TEMPERATURE BOILERS INTERNAL SCALES ON THE CORROSION BEHAVIOUR OF CARBON STEEL TUBES

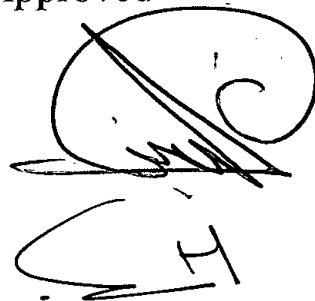

M.Sc. Thesis

Thesis Supervisors

Dr./ Khalid Mohamed Elewa Hashem

Dr. /Ahmed Abd El razek Ghorab

Approved

The block contains two handwritten signatures. The top signature is a large, stylized cursive signature, likely belonging to Dr. Khalid Mohamed Elewa Hashem. The bottom signature is a smaller, more compact cursive signature, likely belonging to Dr. Ahmed Abd El razek Ghorab.

Head of chemistry department

Prof. Dr./ M.A.El – Kasaby

A handwritten signature in cursive script, likely belonging to Prof. Dr. M.A. El-Kasaby, positioned below the text of the head of the chemistry department.

سُورَةُ الْفَاتِحَةِ

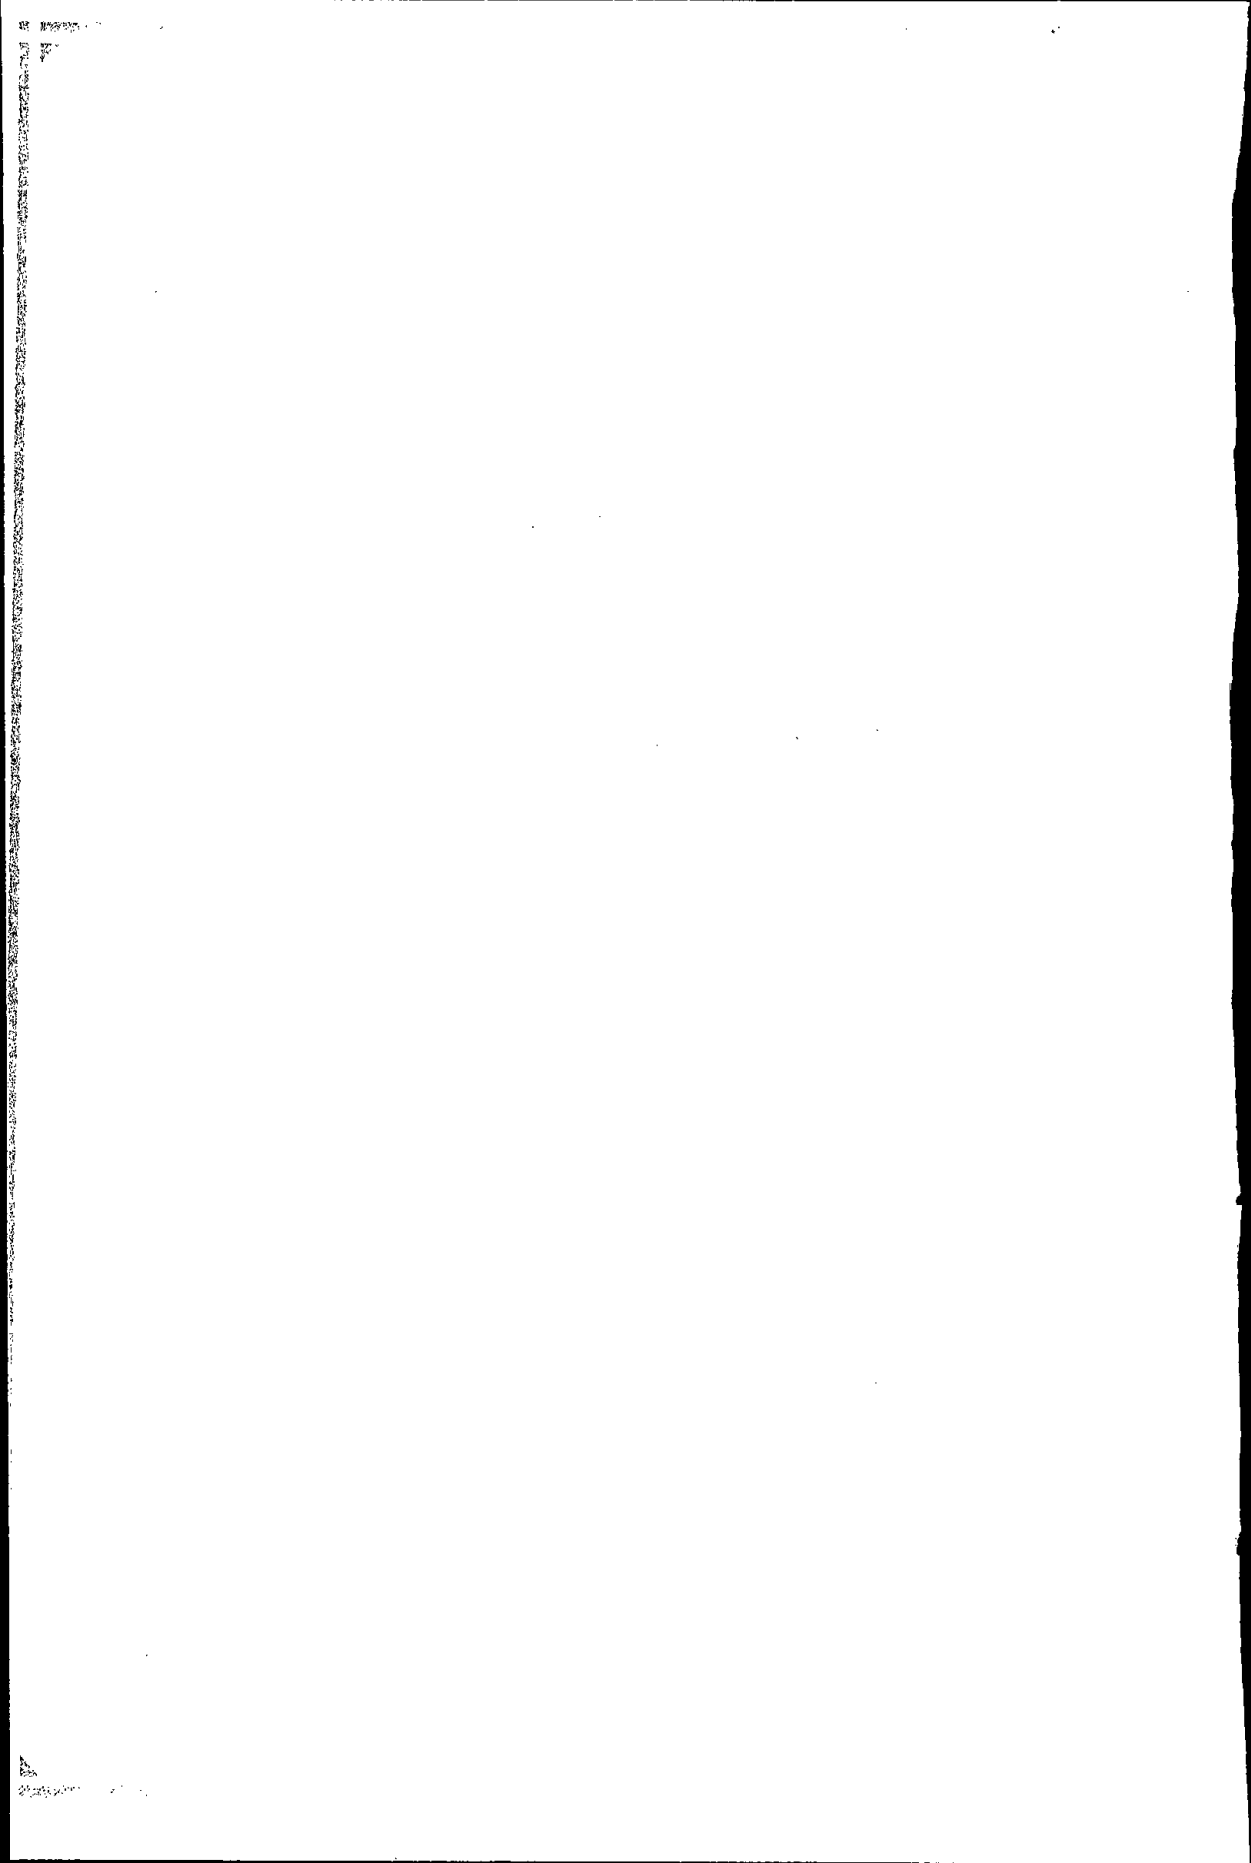

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
الْحَمْدُ لِلَّهِ رَبِّ الْعَالَمِينَ
الرَّحْمَنِ الرَّحِيمِ
إِيَّاكَ نَعْبُدُ وَإِيَّاكَ نَسْتَعِينُ
الْصِّرَاطَ الْمُسْتَقِيمَ
صِرَاطَ الَّذِينَ أَنْعَمْتَ
عَلَيْهِمْ غَيْرِ الْمَغْضُوبِ عَلَيْهِمْ
وَلَا الضَّالِّينَ

Acknowledgment

The candidate wishes to express her sincere appreciation and deep gratitude to **Dr. Khaled M.E Hashem** Associate prof. of physical chemistry, faculty of science, Ain Shams university for suggesting the subject of this work, his talent supervision, sincere advise, useful reading and discussion.

The candidate would like to submit her great thanks to **Dr. Ahmed A. Ghorab** the general inspector on the chemistry department of the central laboratory of electricity ministry for his support and for his offering all necessary facilitates needed to conduct this work .

The candidate appreciated the help of her colleagues in the SEM / polarized microscope, and X-ray diffraction departement in the central laboratory of the ministry of electricity, to all of them her thanks and gratitude.

Summary

Chapter I

I-Introduction

I-1 Historical background about heat transfring problems.	1
I-2 Real counting for the water – side flow problems.	7
I-3 Water quality prolems.	10
I-3-1 preboiler and boiler corrosion .	10
I-3-2 Types of corrosion .	10
a- Galvanic Corrosion .	10
b- Caustic Corrosion.	11
c- Acidic Corrosion .	12
d- Hydrogen Embrittlement.	12
e- Oxygen attack.	13
I-4 Fire side problems.	13
I-4-1 High temperature corrosion from low-melting ash deposits .	13
I-4-2 Low temperature corrosion .	14
I-5 Metal corrosion by salt.	15
I-5-1 Prevailing conditions under which metal attacked by salt melt.	16
I-5-2 Metal / Molten salts corrosion.	18
a- Thermal mass transfer .	18
b- Selective attack.	19
I-6General idea behind the plane of the study.	20

I-6-1 Internal deposition in the tubes of boiler .	20
a- Internal hard scale blockage .	20
b- Sludge deposits.	21
I-6-2 Aim of the present work.	22

Chapter 11

II Experimental work .

II-1 Preparation of the starting materials.	23
II-1-1 Preparation of metal carbon steel specimens.	23
II-1-2 Specified materials .	23
II-1-2-1 Dehydration of chloride salts.	23
II-1-2-2 Etched solution.	23
II-1-2-3 The aluminum frame.	24
II-2 Representative mold disc.	24
II-2-1 Preparation of the disc.	24
II-2-2 Thermal treatment of the disc molding	24
II-2-3 Representative sample's zones.	25
II-2-3-1 Thermally treated dopand.	25
II-2-3-2 Metal specimens thermally treated.	25
II-3 Metal and metallurgical analytical techniques.	27
II-3-1 Visual inspection .	27
II-3-2 Energy dispersive X- ray flouresence EDXRF analysis.	27
II-3- 3X-ray diffraction analysis "XRD "	28
II-3-4 Atomic absorption analysis " A.A "	28
II-3-5 Scanning electron microscope " SEM "	28
II-3-6 Ultrasonic vibration technique (U.S.V)	29
II-3-7 Polarized microscopic analysis.	29
II-3-8 Micro-hardness measurements.	29
II-3-9 Electronic balance.	30
II-3-10 Weight loss.	30
