Acknowledgment

Before all and after all, thanks to GOD

I am deeply indebted to **PROF. DR. ABDEL-HAMID ZIDAN**, Professor of Neurosurgery and Head of the Neurosurgical Departement, Faculty of Medicine, Cairo University, for his great help, unlimited support and encouragement, without which this work would have been impossible.

My sincere thanks and profound gratitude go to **PROF. DR. ABDEL-ALEEM RAGAB**, Professor of Neurosurgery, Faculty of Medicine, Cairo University, for his skillful selection of the topic of this thesis and for his precious guidance. Without his help, this work would not have been completed.

I would like to express my deep gratitude to **PROF. DR. HELMY ABDEL-HAMID YOUSEF**, Professor of Diagnostic Radiology, Faculty of Medicine, Cairo University, for his continous support and his magnificent help in performing the diagnostic radiological studies in this work.

Words cannot express the thanks that are due to a pioneer of epilepsy surgery, not only in Egypt but in the Middle East as well. I refer to **PROF. DR. MOHAMED NAYEL**, Assistant Professor of Neurosurgery, Faculty of Medicine, Cairo University. His valuable suggestions, critical guidance, meticulous attention to detail and continous encouragement, helped me to complete this work.

My deepest thanks are also directed to **PROF. DR. MOHAMED RIFAAT**, Professor of Neurosurgery, Faculty of Medicine, Cairo University, for his fatherly guidance and valuable remarks that taught me a great deal.

I would also like to thank **PROF. DR. ISMAIL EL-SHAFEI**, Professor of Neurosurgery, and the god father of our neurosurgical departement, for the valuable information that came out of our continous discussions.

My special thanks and deepest appreciation go to **DR. HASSAN SAAD HOSNY**, Lecturer of Neurology, Faculty of Medicine, Cairo University, for his unlimited help and great support during the electrophysiological work-up of the patients in this study.

Mohamed Sedeek
