# **Molecular Characterization of shiga-toxin producing *Escherichia coli* in Milk**

*Thesis presented by*

**Aya Gomaa Abdelraheem Ali**

(B. V. Sc. – 2016)

For the degree of M. V. Sc.

(Bacteriology, Immunology and Mycology)

*Under The Supervision of*

**Prof. Dr/ Mahmoud Dardiri Elhariri**

Professor of Microbiology  
Faculty of Veterinary Medicine  
Cairo University

**Dr/ Dalia Anwar Hamza**

Assistant Professor of Zoonoses  
Faculty of Veterinary Medicine  
Cairo University

**(2021)**

**Cairo University**  
**Faculty of Veterinary Medicine**  
**Department of Microbiology**

**Approval sheet**

---

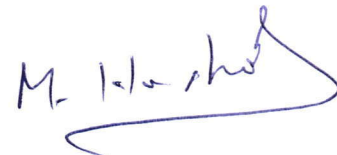

This is to certify that the dissertation submitted by Aya Gomaa Abdelraheem Ali to Cairo University, for the master Degree in Veterinary Medical Sciences, Microbiology (Bacteriology, Immunology, Mycology) has been approved by the Examining Committee.

Members of the Committee

**Prof. Dr. Amgad Ahmed Moawad**  
Professor of Microbiology  
Faculty of Veterinary Medicine  
Kafer Elshiek University

**Prof. Dr. Mahmoud Hashad**  
Professor of Microbiology  
Faculty of Veterinary Medicine  
Cairo University

**Prof. Dr. Mahmoud Dardiri Elhariri**  
Professor of Microbiology  
Faculty of Veterinary Medicine  
Cairo University  
Supervisor

**Dr. Dalia Anwar Hamza**  
Assistant Professor of Zoonosis  
Faculty of Veterinary Medicine  
Cairo University  
Supervisor

Date: 30/5/2021

**-Name:** Aya Gomaa Abdelraheem

**-Date of birth:** 4/3/1993

**-Nationality:** Egyptian.

**-Degree:** Master of Veterinary Science.

**-Specialization:** Microbiology

**-Title of thesis:** **Molecular Characterization of Shiga Toxin Producing *E. coli* from Raw Milk in Egypt**

**- Supervisors:**

**Prof. Dr. Mahmoud Dardiri Elhariri** Professor of Microbiology, Faculty of Veterinary Medicine, Cairo University.

**Dr. Dalia Anwar Hamza** Assistant Professor of Zoonoses, Faculty of Veterinary Medicine, Cairo University.

### **Abstract**

Recently, the incidence of food-borne diseases caused by Shiga toxin-producing *Escherichia coli* (STEC) has increased around the world. **Aim:** In this study, we have examined the methodologies and molecular characterization techniques for assessing the phenotypic, genotypic and characteristics of STEC O157 and non-O157 from milk samples from different governorates in Egypt. **Method:** milk samples were collected from different governorates in Egypt, Culture and isolation methods, including selective enrichment and differential plating that enabled the effective recovery of STEC have been performed. Following recovery, immunological serotyping of somatic surface antigens (O-antigens) was employed for the classification of the STEC isolates. Molecular genotyping methods, including polymerase chain reaction (PCR), and partial genome sequencing have been performed.

**Results:** In the present study, out of 33/158 samples were positive for *Stx2* gene (20.88), 1 sample was positive for *Stx1* and *Stx2* and 10 isolates were positive for *eae* gene. Also in this study, 7 serogroups were found between the isolates of *E. coli* (O157, O26, O111, O78, O125, O158, O127). O157 (5.06%) and O26 (3.79%) were the most frequently identified serogroups.

**Conclusion:** High prevalence of *Stx2* in collected milk samples and high prevalence of O157, O26 strains and other important serogroups will provide a better understanding of risks associated with STEC and will aid in the development of efficient and targeted intervention strategies.

**Keywords:**

Shiga toxin producing *Escherichia coli*, Raw milk, Molecular Characterization, Serotyping.

## ***Dedication***

*This thesis is dedicated to my dearest father who helped me to  
complete this work and throughout my life.  
He did not live to see my academic achievement.  
God bless his soul.*

# *Acknowledgment*

*First and foremost, I feel always indebted to*  
***ALLAH**, the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to*  
***Prof. Dr/ Mahmoud Elhariri**, Professor of Microbiology, Faculty of*  
*Veterinary Medicine, Cairo University for his keen guidance, kind*  
*supervision, valuable advice and continuous encouragement, which made*  
*possible the completion of this work,*

*I am also delighted to express my deepest gratitude and thanks*  
*to **Dr/ Dalia Anwar Hamza**, Assistant Professor of Zoonoses,*  
*Faculty of Veterinary Medicine, Cairo University, for her kind care,*  
*continuous supervision, valuable instructions, constant help and great*  
*assistance throughout this work,*

*Last but not the least, I would like to thank **My Family** for*  
*giving birth to me at the first place and supporting me spiritually*  
*throughout my life.*

*Aya Gomaa*
