Assessment of Health Care Practices of Children Suffering from Parasitic Infection

Thesis

*Submitted for Partial Fulfillment of the requirements
of the Master Degree in **Pediatric Nursing***

By

Hewida Mostafaa Ibraheim

B.Sc. Nursing (2004)

Clinical Instructor in Technical Institute of Nursing

Ain Shams University

**Faculty of Nursing
Ain Shams University
2020**

Assessment of Health Care Practices of Children Suffering from Parasitic Infection

Thesis

Submitted for Partial Fulfillment of the Master

Degree in Pediatric Nursing

Under Supervision of

Prof. Dr./ Wafaa El Sayed Ouda

Professor of Pediatric Nursing

Faculty of Nursing – Ain Shams University

Prof. Dr./ Salma El-Sayed Hassan

Professor of Pediatric Nursing

Faculty of Nursing – Ain Shams University

Assist. Prof. Dr./Mona Ali Kunswa

Assistant Professor of Pediatric Nursing

Faculty of Nursing – Ain Shams University

Faculty of Nursing

Ain Shams University

2020

Acknowledgement

First Thanks to **Allah** the most **Merciful**, most **Knowledgeable** for all his blessings throughout my life.

Great gratitude to **Prof. Dr. / Wafaa Elsayed Ouda**, Professor of Pediatric Nursing, Faculty of Nursing, Ain Shams University for her vast support during performing this work.

I would like to express my deep appreciation and gratitude to **Prof Dr. Salma Elsayed Hassan**, Professor of Pediatrics Nursing, Faculty of Nursing, Ain Shams University, for her supervision, guidance and support throughout this study.

I would like to express my deep thanking and appreciation to **Dr. Mona Ali Kunswa** Assistant professor of Pediatric Nursing, Faculty of Nursing, Ain Shams University, for her unlimited help, effort, support and guidance.

I would like also to express my deep apperception and gratitude to all children and their **Mothers** who participated as study subjects.

The candidate

Hewida Mostafaa

List of Content

Title	Page No.
List of Tables	I
List of Figures	VII
List of abbreviations	VIII
Abstract	IX
Introduction and Aim of the Study	1
Review of literature	
• Part I: Parasitic Infection in Children	8
• Part II: Maternal and Children's Practices for Prevention and Management of Parasitic Infection	43
• Part III: Role of Pediatric Nurse in Care of Children Suffering from Parasitic Infection through the Levels of Prevention	48
Subject and Methods	64
Results	74
Discussion	111
Conclusion and Recommendations	137
Summary	139
References	149
Appendices	184
Arabic Summary	

List of Tables

Table No.	Title	Page No.
1	Distribution of the Studied Children according to their Characteristics	75
2	Distribution of the Studied Children according to their Schoolastic Condition	76
3	Distribution of the Studied Mothers according to their Characteristic	77
4	Distribution of the Studied Subjects according to their Family Characteristic	78
5	Distribution of the Studied Subjects according to their Home Characteristic	79
6	Distribution of the Studied Subjects according to their Home Characteristic as regard Presence and raising of Birds / Animals and presence of insects	80
7	Distribution of the Studied Children according to their Growth Assessment	81
8	Distribution of the Studied Children according to their Physical Assessment	82
9	Distribution of the Studied Children according to their Physiological Assessment	84
10	Distribution of the Studied Children according to their History of Parasitic Infection	85

Table No.	Title	Page No.
11	Distribution of the Studied Children according to their Laboratory Analysis of Parasitic Infection	86
12	Distribution of the Studied Children according to their Relapse of Parasitic Infection and its causes	88
13	Distribution of the Studied Children according to their Treatment from Parasitic Infection	89
14	Distribution of the Studied Children according to their Systemic Complications related to Parasitic Infection	90
15	Distribution of the Studied Children according to their Health Complications related to Growth & Development	91
16	Distribution of the Studied Subjects according to their Knowledge regarding Meaning, Common Parasitic Infection, Mode of Infection and Causes of Parasitic Infection	92
17	Distribution of the Studied Subjects according to their Knowledge regarding Symptoms of Parasitic Infection related to Respiratory, Circulatory, Gastrointestinal, Neurological and Urinary System.	93

Table No.	Title	Page No.
18	Distribution of the Studied Subjects according to their Knowledge regarding Symptoms of Parasitic Infection related to Genital, Dermatological, Skeletal System and Growth & Development.	94
19	Distribution of the Studied Subjects according to their Knowledge regarding Prevention and Precautions of Parasitic Infection.	95
20	Distribution of the Studied Subjects according to their Knowledge regarding Complications, Treatment and Hygienic Measures during Treatment of Parasitic Infection.	96
21	Distribution of the Studied Subjects according to their Source of Knowledge regarding Parasitic Infection	98
22	Distribution of the Study Subjects according to their Reported Practices of Hand Washing.	99
23	Distribution of the Studied Subjects according to their Reported Practices of Food Safety.	100
24	Distribution of the Studied Subjects according to their Reported Practices of Oral Drug Administration.	101

Table No.	Title	Page No.
25	Distribution of the Studied Subjects according to their Reported Practices of Change of Bed Linens.	102
26	Relation between the Studied Children' Characteristics and their Total Knowledge regarding Intestinal Parasitic Infection	104
27	Relation between the Studied Children' Characteristics and their Total Reported Practices regarding Intestinal Parasitic Infection	105
28	Relation between the Mothers' Characteristics and their Total Knowledge regarding Intestinal Parasitic Infection	106
29	Relation between the Mothers' Characteristics and their Total Reported Practices regarding Intestinal Parasitic Infection	107
30	Correlation between the Studied Children Total Score of Knowledge and their Total Score of Reported Practices regarding Intestinal Parasitic Infection	109
31	Correlation between the Studied Mothers' Total Score of Knowledge and Their Total Score of Reported Practices regarding Intestinal Parasitic Infection	110

Table No.	Title	Page No.
Table in Appendix		
1	Distribution of the Studied Subjects according to their Reported Practices regarding Hand Washing	244
2	Distribution of the Studied Subjects according to their Reported Practices regarding Food Safety	246
3	Distribution of the Studied Subjects according to their Reported Practices regarding Oral Drug Administration	248
4	Distribution of the Studied Subjects according to their Reported Practices regarding Change of Bed Linens	250
5	Distribution of the Studied subjects according to their Knowledge regarding Concept and Nature of Parasitic Infection	252
6	Distribution of the Studied Subjects according to their Knowledge regarding Mode of Transmission, Causes and Common Parasitic Infection among School Age Children	253
7	Distribution of the Studied Subjects according to their Knowledge regarding Signs and Symptoms of Parasitic Infection related to Respiratory, Circulatory and Gastrointestinal Tract	255

Table No.	Title	Page No.
8	Distribution of the Studied Subjects according to their Knowledge regarding Signs and Symptoms of Parasitic Infection related to Neurological, Urinary and Genital System	256
9	Distribution of the Studied Subjects according to their Knowledge regarding Signs and Symptoms of Parasitic Infection related to Dermatological, Skeletal, Growth & Development Deteriorations	257
10	Distribution of the Studied Subjects according to their Knowledge regarding Prevention and Precautions of Parasitic Infection	259
11	Distribution of the Studied Subjects according to their Knowledge regarding Hygienic Precautions during Treatment of Parasitic Infection	261
12	Distribution of the Studied Subjects according to their Knowledge regarding Complications and Treatment of Parasitic Infection	262
13	Relation between Studied Children Knowledge and their Reported Practices	263
14	Relation between Studied Mother's Knowledge and their Reported Practices	264

List of Figures

Figure No.	Title	Page No.
Figures In Review		
1	Modes of transmission for Pinworm	12
2	Modes of transmission for Schistosomiasis	14
3	Modes of Transmission for Entamoeba Histolytica.	15
4	Modes of Transmission for Hymenolepiasis	16
5	Entamoeba histolytica	17
6	Giardiasis	19
7	Bilharzia	20
8	Pinworm	23
9	Ascaris lumbricoides adult worms	26
10	Hookworm	28
11	Hymenolepis nana	30
12	Taenia solium	31
13	Taenia saginata	33
Figures In Results		
1	Percentage Distribution of the Studied Subjects according to their Total Knowledge regarding Parasitic Infection.	96
2	Percentage Distribution of the Studied Subjects according to their Total Reported Practices regarding Parasitic Infection.	102

List of Abbreviations

Abb.	Full Term
CDC	Centers for Diseases Control and Prevention
E.histolytica	Entamoeba Histolytica
H.diminuta	Hymenolepis Diminuta
H.nana	Hymenolepis Nana
IPI	Intestinal Parasitic Infection
KAP	Knowledge, Attitude and Practice
MRI	Magnetic Resonance Imaging
T.saginata	Taenia Saginata
T.solium	Taenia Solium
WHO	World Health Organization
