Development of a Biosensor based on Graphene-Gold Nanoparticles Hybrid

Thesis

Submitted to Faculty of Science-Ain Shams University as a partial fulfillment for Degree of MSc. in Biophysics

By

Ahmed Medhat Kamal Zaki

BSc. in biophysics 2015

Supervised by

Prof. Dr. Ibrahim Hassan Ibrahim

Professor of Biophysics, Faculty of Science, Ain Shams University.

Dr. Dina Salah El-din Mohamed

Lecturer of Biophysics, Faculty of Science, Ain Shams University.

Dr. Amal Sayed Kasry

Director at Nanotechnology Research Center (NTRC), British University in Egypt.

Development of a Biosensor based on Graphene-Gold Nanoparticles Hybrid

Name: Ahmed Medhat Kamal Zaki

Degree: MSc.

Department: Physics- biophysics Group

Faculty: Science

University: Ain Shams

Graduation Date: 2015- Ain Shams University

Registration Date: 8 /1/2018

Acknowledgement

I would like to say Thank you to everyone helped me throughout this thesis to work on finishing my work adequately and concisely .

Firstly , I thank prof.Ibrahim Hassan who is considered as a father to me and I won't forget his role during all the travel time and his advices which were and still very useful to me for dealing with our career.

Secondly, Dr. Dina Salah who was the first one to help me for MSc. Registration and taught me a lot of things regarding the nanoscience and laboratory work . I wish her all the best.

Thirdly, Dr. Amal Kasry , the supervisor who taught me everything related to Graphene and supported me through the MSc. Journey to present my work in several conferences and to travel abroad .

Finally , Prof. Svetlana and Nazarii Boichuk who supported my work in Germany and were very helpful to publish this work . I hope to see you again .
