HANAA ALY

“Color of White Spot Lesions after Non-Invasive Treatment Modalities: An in-vitro study.”

A Thesis submitted to the Department of Operative Dentistry,

Faculty of Dentistry, Ain Shams University

In partial fulfillment of the requirements for the

Master’s degree in Operative Dentistry.

By

Yasmine Sherif Hassan Hedayet

B.D.S. Faculty of dentistry

Ain Shams University (2011).

2021

Dr. Omaila Hassan Ghallab

Professor of Operative Dentistry.

Faculty of Dentistry.

Ain Shams University.

Dr. Mohammed Nasser Mohammed Anwar

Lecturer of Operative Dentistry.

Faculty of dentistry.

Ain Shams University

Professor Dr. Omaila Hassan Ghallab... I wish to express my sincere gratitude for her support, patience, time and her guidance. I have benefited greatly from her wealth of knowledge and meticulous comments upon thesis writing.

Dr.Mohammed Nasser Mohammed Anwar...I had pleasure and honor to work under his supervision, he added a distinguished value to the thesis.

This work is dedicated to my amazing parents for their endless love and support

To my wonderful husband Thank you for always having my back.

Last but not least to my son I love you beyond words can describe.

Introduction	
Review of literature	3
) Caries development	3
) Enamel structure and its role in dental caries.....	4
) White spot lesions definition, types and assessment	5
) Use of Vita Easyshade in white spot lesion assessment	7
) The CIE Lab color system	10
) Different treatment modalities	
o Fluoride	12
o Resin infiltration	16
Aim of the study	22
Materials and Methods.....	23
Results	36
Discussion	44
Summary and conclusions	50
References	52
Arabic summary	

List of Tables

Table number	Table title	Page no
1	Showing the materials used in the study, its trade name, composition and lot number.	23
2	Showing the levels of investigation of the study	25
3	Showing the mean and standard deviation of color change (ΔE) and change in lightness of enamel (L^*) color of each treatment group.	37
4	showing mean and standard deviation of color change (ΔE) of each treatment group.	38
5	showing mean and standard deviation of enamel color lightness (ΔL) of each treatment group.	40
