Chemistry Department - Faculty of Science

"New approach for waste treatment of naturally radioactive materials accompanying to oil and natural gas production"

Thesis Submitted by

Hanan Mohamed Abdelbary Abdelaziz

B.Sc. (Special Chemistry) 2005
M.Sc. (Inorganic Chemistry) 2017

For the requirement of Ph. Degree of Science in Chemistry

Supervised By

Prof. Dr. Mohamed Mahmoud Abo-Aly
Prof. of Inorganic Chemistry
Faculty of Science
Ain-Shams University

Prof. Dr. Entessar Ahmed Elsofany
Prof. of Analytical Chemistry
Hot Laboratories Center
Egyptian Atomic Energy Authority

Prof. Dr. Yasser Tawfik Mohamed
Prof. of Radioactive Waste Management
Hot Laboratories Center
Egyptian Atomic Energy Authority

Ass. Prof. Dr. Mohamed Fathy Attallah
Assistance prof. of Radiochemistry
Hot Laboratories Center
Egyptian Atomic Energy Authority

To

Department of Chemistry
Faculty of Science, Ain Shams University

2021

Chemistry Department - Faculty of Science

Approval sheet

Title of Thesis:

New approach for waste treatment of naturally radioactive materials accompanying to oil and natural gas production

Submitted by:

Hanan Mohamed Abdelbary Abdelaziz

Thesis advisors	***Approved***
Prof. Dr. Mohamed Mahmoud Abo-Aly *Prof. of Inorganic Chemistry* *Faculty of Science* *Ain-Shams University*	……

Head of Chemistry Department

Prof. Dr. Ayman Ayoub Abdel-Shafi

Acknowledgment

First of all I am really grateful for "Allah" that I have finished this work. Secondly, there are many individuals without whom the work described in this thesis might not have been possible. I would like to thank my supervisors:

Prof. Dr. Mohamed Mahmoud Abo-Aly, Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University; for his sponsoring, continuous supervision and help during the scope of this work.

Prof. Dr. Entessar Ahmed Elsofany, Prof. of Analytical Chemistry, Hot Laboratories Center, Egyptian Atomic Energy Authority; for helping advice and supervision.

Prof. Dr. Yasser Tawfik Mohamed Prof. of Radioactive Waste Management, Hot Laboratories Center, Egyptian Atomic Energy Authority; for unlimited help and continuous supervision.

Ass. Prof. Dr. Mohamed Fathy Attallah, Assistance Prof. of Radiochemistry, Hot Laboratories Center, Egyptian Atomic Energy Authority; for his unlimited help and continuous supervision through all the experimental work, continuous encouragement, help during the progress and discussion of this work.

Thanks for all the staff members and colleagues of the Analytical Chemistry Department, for their cooperation and useful help offered during this work.

I wish to thank my parent, my husband, my daughter **Emanda** and my son **Mahmoud** for their assistance and patience over this work.

Hanan Mohamed Abdelbary

Chemistry Department - Faculty of Science

Researcher Data

Name:	**Hanan Mohamed Abdelbary Abdelaziz**
Date of Birth:	**16/9/1984**
Graduation Year:	**2005**
Academic Degree:	**Ph.D.**
Field of Speciation:	**Chemistry**
University of the degree:	**Cairo**
Date of the degree:	**2017**

Abstract……. XIX

List of abbreviation…….. XXII

Chapter 1: Introduction

1. Introduction..... 1

1.1. Radioactive decay..... 1

1.2. Environmental radioactivity..... 2

1.2.1. Sources of environmental radioactive..... 3

1.2.1.1. Natural radioactive isotopes..... 3

1.2.1.2. Radioactive isotopes of anthropogenic origin..... 5

1.2.2. Units of radiation measurements..... 6

1.3. Naturally occurring radionuclides..... 7

1.3.1. NORM and TENORM..... 7

1.3.1.1. Forms of TENORM waste..... 10

1.3.1.2. Protection against TENORM exposures..... 10

1.4. Radiological aspects of TENORM..... 11

1.4.1. Radiation hazards..... 11

1.4.2. Detection of TENORM..... 13

1.4.3. Limits of TENORM contamination and exposure..... 14

1.4.3.1. Equipment..... 14

1.4.3.2. Radioactive materials..... 14

1.4.3.3. Human exposure..... 15

1.5. TENORM in gas and petroleum industry..... 16
1.5.1. TENORM formation..... 21
1.5.2. TENORM waste management..... 23
1.5.2.1. Leaching of TENORM waste..... 23
1.5.2.2. Inhibition approaches..... 24
1.5.2.3. Trials for treatment of TENORM..... 26
1.5.2.3.1. Volume reduction..... 26
1.5.2.3.2. Use of reagents..... 27
1.5.2.3.3. Recycling equipment..... 27
1.5.2.4. Subsurface injection approach..... 28
1.5.2.4.1. Solid TENORM waste..... 28
1.5.2.4.2. Liquid TENORM waste..... 29
1.6. Radiochemistry of interested radionuclides..... 31
1.6.1 Radium..... 31
1.6.2. Radon..... 33
1.7. Surfactant solutions..... 34
1.7.1. Classification of surfactants..... 36
1.7.1.1. Nonionic surfactants..... 36
1.7.1.2. Ionic surfactants..... 37
1.7.1.2.1. Anionic surfactants..... 37
1.7.1.2.2. Cationic surfactants..... 37
1.7.1.3. Amphoteric surfactant..... 37
1.7.2. Critical micelle concentration..... 38
1.8. Review on treatment of TENORM in oil and gas field.. 39
Aim of the work..... 43

Chapter 2: Experimental

2. Experimental…….. 44

2.1. Chemicals and reagents…….…..... 44

2.2. TENORM samples……..... 44

2.2.1. Samples preparation ……. 45

2.2.1.1. Sludge TENORM waste …… 45

2.2.1.2. Scale TENORM waste …….. 46

2.3. Instrumentations…….…… 46

2.3.1. Infrared spectroscopy…… 46

2.3.2. X-ray fluorescence……..... 47

2.3.3 EDX-analysis…….…….. 47

2.3.4. X-ray diffraction…… 47

2.3.5. Nuclear spectroscopy……...…….. 48

2.3.5.1. Calibration……... 49

2.3.5.1.1. Energy calibration……..... 49

2.3.5.1.2. Efficiency calibration…….. 53

2.3.5.2.3. Efficiency calculation…….. 53

2.4. Experimental procedure……... 55

2.4.1. Radiological measurements ……..…….. 55

2.4.1.1. Samples preparation for γ-spectrometry measurements….. 55

2.4.1.2. Determination of radioactivity concentrations…… 58

2.4.2. Radiation hazard parameters………...……..……..... 58

2.4.2.1. Radium equivalent index……. 59

2.4.2.2. Absorbed dose rate…….. 59

2.4.2.3. Annual effective dose rate……... 59

2.4.2.4. External and internal radiation hazard index……... 60
2.4.2.5. The annual gonadal dose equivalent…… 60
2.4.2.6. Activity utilization index……. 60
2.4.2.7. Excess lifetime cancer risk factor…… 61
2.4.2.8. Representative gamma index (Iγ)…… 61
2.4.2.9. The alpha index (Iα)…… 62
2.4.3. The radon emanation coefficient……... 62
2.4.4. Age of scale samples……... 63
2.4.5. Treatment of TENORM waste samples…… 64
2.5. Kinetic models and activation energy..... 64

Chapter 3: Results and Discussion

3. Results and Discussion……. 68
3.1. Characterization of TENORM waste……..……. 68
3.1.1. Physiochemical characterization of TENORM waste Samples……..…. 68
3.1.1.1. Sludge samples…… 68
3.1.1.1.1. FTIR spectrometry……... 68
3.1.1.1.2. EDX analysis……... 70
3.1.1.1.3. X-ray diffraction…….. 73
3.1.1.2. Scale samples……... 75
3.1.1.2.1. FTIR-spectrometry…….. 75
3.1.1.2.2. X-ray fluorescence……... 76
3.1.1.2.3. X-ray diffraction spectra…….. 77
3.1.2. Radiological characterization……... 80
3.1.2.1. γ- Spectroscopic analysis of TENORM radionuclides…… 80

3.1.2.1.1. Uranium-series (^{238}U, ^{226}Ra, ^{210}Pb)…….. 80
3.1.2.1.2. Thorium Series (^{232}Th, ^{228}Ra, ^{224}Ra)……... 82
3.1.2.1.3. Actinium series ^{235}U...…… 83
3.1.2.1.4. Potassium (^{40}K)……...…… 83
3.1.2.2. Radiological characterization of sludge TENORM waste. 84
3.1.2.2.1. Activity concentration of sludge TENORM waste... 84
3.1.2.2.2. Radiological hazardous indices……. 87
3.1.2.2.2.1. Radium equivalent index…….. 87
3.1.2.2.2.2. Absorbed dose rate…… 87
3.1.2.2.2.3. Annual effective dose equivalent…….. 87
3.1.2.2.2.4. External and internal hazard indices……. 89
3.1.2.2.2.5. AGDE, AUI, ELCR, Iγr and Iα……. 89
3.1.2.2.3. Radon emanation coefficient…… 91
3.1.2.3. Radiological characterization of scale TENORM waste.. 92
3.1.2.3.1. Activity concentration of scale TENORM waste….. 92
3.1.2.3.2. Radiation hazard parameter……... 97
3.1.2.3. 2.1. Radium equivalent index…….. 97
3.1.2.3.2.2. Absorbed dose rate and annual effective dose equivalent……... 97
3.1.2.3. 2.3. External and internal hazard indices……. 97
3.1.2.3.2.4. The AGDE, AUI, ELCR, Iγ and Iα……... 98
3.1.2.3.3. Radon emanation coefficient…… 98
3.1.2.3.4. Determination of the age scale…….. 101
3.2. Treatment trials of TENORM waste samples…… 102
3.2.1. Treatment trials of the sludge TENORM waste samples… 102
3.2.1.1. Nonionic surfactant……... 103
3.2.1.1.1. Tween 20……... 103
3.2.1.1.1.1. Influence of contact time……... 104

3.2.1.1.1.2. Influence of concentration…… 105
3.2.1.1.1.3. Influence of temperature……... 106
3.2.1.1.1.4. Influence of pH……. 108
3.2.1.1.1.5. Influence of particle size……... 109
3.2.1.1.1.6. Influence of successive leaching……... 110
3.2.1.1.2. Triton X-100…… 111
3.2.1.2. Ionic surfactant…….. 112
3.2.1.2.1. Cationic surfactant (Benzethonium chloride)…….. 112
3.2.1.2.1.1. Influence of contact time…….. 113
3.2.1.2.1.2. Influence of concentration…… 114
3.2.1.2.1.3. Influence of pH……. 115
3.2.1.2.1.4. Influence of temperature……... 116
3.2.1.2.1.5. Successive Leaching……. 118
3.2.1.2.2. Anionic surfactant…… 120
3.2.1.2.2.1. Influence of concentration…… 120
3.2.1.2.2.2. Influence of pH…… 121
3.2.1.2.2.3. Influence of temperature……... 122
3.2.1.2.2.4. Influence of successive leaching……... 124
3.2.1.2.3. Zwitterionic surfactant……...…….. 125
3.2.1.2.3.1. Influence of concentration……..……. 126
3.2.1.2.3.2. Influence of successive leaching…….. 127
3.2.1.2.4. Commercial detergent surfactants….……... 129
3.2.1.2.4.1. Influence of concentration……... 129
3.2.1.2.4.2. Influence successive leaching…….. 129
3.2.2. Treatment of the scale TENORM waste samples……. 131
3.2.2.1. Influence of sequential leaching……. 131
3.2.2.2. Radiological assay of leaching product……. 132

3.2.2.3. Risk assessment of TENORM before and after treatment process……...……...……...……...… 136
3.2.3. Leaching kinetics……..…… 137
3.2.3.1. Order of reaction…… 150
3.2.3.2. Estimate the activation energy……... 152
3.2.3.3. Thermodynamic parameters……... 155
3.2.3.4. Mechanism of leaching reaction……...……. 157
Conclusion…….. 159
