Acknowledgments

First, I would like to thank Allah, the Almighty, for giving me the strength, patience, and physical ability to complete this dissertation. Without Him, I would never be able to finish it.

After a long time of resilient hard work, here comes the coronation day. However, I was not alone, I was surrounded by supportive, loving, and positive people. So, I use this opportunity to thank all those people whom I owe a lot for their support, love and encouragement throughout this study.

I would like to express my sincere gratitude to my dear professor and advisor, **Dr. Asmaa Ghanem Gheith** for always being cooperative, supportive, respectful, considerable, caring, encouraging, loving and enthusiastic. I would like to thank her for her belief and trust in my abilities and skills. Whenever I felt discouraged, she was always there, supporting and pushing me toward success. I deeply thank her for her kind feedback that helped me a lot to discover and develop myself and to refine my study. I really do appreciate all her efforts and words cannot express how grateful I am. I am also grateful to **Dr. Dina Sayed** whose fruitful comments helped me to successfully edit and complete my research. I really appreciate her guidance and advice.

I would like to express my deep gratitude to the rest of my dissertation committee **Prof. Zeinab El Naggar** professor of curriculum department (TEFL), Faculty of Education, Ain Shams University, and **Prof. Mostafa Badr** professor of curriculum department (TEFL), Faculty of Education, Tanta University, for accepting to take part in the dissertation committee and for giving time and effort to examine this study. I appreciate their kind presence, support, and their valuable comments.

I warmly thank all the teachers who took part in the program. I thank them for their commitment and hard work. I would also like to thank them for all the fun and good memories we had throughout the program.

Special thanks go to my family. I would really like to thank my late father who used to call me Dr. Walaa as he had great faith in me and in my abilities. I also would like to thank my husband, my mother and my children for their endless help and patience. Without their support I would not have done this dissertation.

Finally, I would like to deeply thank my Access colleagues for their assistance, help and insightful feedback. I would also like to thank my beloved Access students who walked with me during my whole journey from the very beginning.

ABSTRACT

The study aim was examining the effect of a program based on Cloud-computing platform on developing assessment strategies for EFL primary school teachers. The study reviewed the literature and previous studies dealing with assessment strategies (self-assessment, peer-assessment, strategic use of Questioning and reflection), professional learning communities, cloud computing and finally some platforms for assessment (Google Classroom, Kahoot, Quizizz, Quizlet, Wordwall, Padlet). The researcher prepared a list of assessment strategies and cloud-computing platforms as guides for the design of the instruments. The researcher also designed a pre/post assessment strategies test, a questionnaire, and a rubric, to obtain data for developing the trainees' performance, the researcher designed the proposed program. Then, after a Facebook announcement, the researcher nominated the Egyptian primary teachers (n=25) who intended to study the online assessment course for developing their assessment strategies. These participants were submitted to a pre and posttest. The scores were analyzed both quantitatively and qualitatively. Results showed that the cloud-computing platform was highly effective in developing the assessment strategies for EFL primary school teachers.
