High Performance Framework for Image Scanning Techniques

This thesis is submitted to Computer Systems Department, Faculty of Computer and Information Sciences, Ain Shams University for the Doctor of Philosophy degree of Computer and Information Sciences.

By

Yara Medhat M. A Abdel Aal

M.Sc. of Computer Systems, Computer Systems Department, Faculty of Computer and Information Sciences, Ain Shams University.

Supervised By

Prof. Hossam Faheem

Professor of Information Systems
Faculty of Computer and Information Sciences,
Ain Shams University

Prof. Sami El-Ghoneimy

Professor of Computer Systems
Faculty of Computer and Information Sciences,
British University in Egypt

Cairo – 2021

To my parents, husband & children.

Acknowledgement

Firstly, I would like to express my sincere gratitude to my advisor and God father Prof. Hossam Faheem. Also, to Prof. Sami El-Ghoneimy, and to Dr. Mahmoud Fayez for his continuous support during my PhD study and to his previous work that gave this thesis a major head start.

I am always grateful for my blessed family, a supporting mother no matter how long the road gets, a loving father and a caring brother.

Finally, I would like to thank my husband for his continuous support and patience, and to my kids who gave me unlimited happiness.
