Physics Department
Faculty of Science
Ain Shams University

Microstructure, Magnetic, and Electrical Properties of Multiferroic Composite

Thesis

*Submitted to Faculty of Science-Ain Shams University in
partial fulfillment for Degree of Master of Science in
Physics*

By

Loay Ibrahim Ibrahim Moustafa El-Gendy

Physics Department

Faculty of Science, Ain Shams University

Egypt

Supervisors

Prof. Dr. Ahmed Abd El-Ghani

Professor of Solid State Physics
Physics Department, Ain Shams University

Prof. Dr. Adel Abd El-Sattar

Professor of Solid State Physics
Physics Department, Ain Shams University

Asso. Prof. Atef Samir Darwish

Asso. Professor in Chemistry Department
Ain Shams University

2021

Degree: Master's degree in physics

Title: Microstructure, Magnetic, and Electrical Properties of Multiferroic Composite

Name: Loay Ibrahim Ibrahim Moustafa El-Gendy

Thesis Supervisors:

Prof. Dr. Ahmed Abd El-Ghani

Professor of Solid State Physics
Physics Department, Faculty of Science
Ain Shams University

Prof. Dr. Adel Abd El-Sattar

Professor of Solid State Physics
Physics Department, Faculty of Science
Ain Shams University

Asso. Prof. Atef Samir Darwish

Asso. Professor in Chemistry Department
Faculty of Science
Ain Shams University

Acknowledgement

Acknowledgement

First, I would like to thank Allah for giving me the strength, knowledge, ability and opportunity to undertake this research study and to persevere and complete it satisfactorily. Without his blessings, this achievement would not have been possible. I am asking His support for further success in my scientific work.

It was honor for me that I could be one of the students of **Prof. Dr. Ahmed Abd El-Ghani**, Physics Department, Faculty of Science, Ain Shams University, **Prof. Dr. Adel Abd ElSattar**, Physics Department, Faculty of Science, Ain Shams University and **Dr. Atef Samir Darwish**, Chemistry Department, Faculty of Science, Ain Shams University for proposing and planning this investigation and their continuous encouragements, valuable suggestions, capable supervision and reading throughout the manuscript that have rendered the realization of this work to be possible. The valuable discussions and continuous assistance which were so willingly during this work will never be forgotten.

Special Thanks for Prof Dr. Adel Abd El-Sattar for his his kind support and help, his office was opened whenever I ran into a trouble spot or had a question about my research or writing. He consistently allowed to be my own work but steered me in the right direction whenever he thought I needed it.

I would like to express my deepest thanks to **Prof. Dr. Hisham Muhammad El-Sayed** and **Assoc. Prof. Dr. Waleed Ragab Abdur Rasheed Agami**, Physics Department, Faculty of Science, Ain Shams University for their kind helpful guidance and encouragement during the work. I would like to deep thank my colleagues in the Magnetism Lab, Physics Department, **Dr. Ismail Muhammad**, **Dr. Muhammad Ashmawy**, **Zeyad Muhammad**, and **Naglaa Muhammad Sadik**.

Finally, I must express my very profound gratitude to my parents and my brothers for providing me with unfailing support and continuous encouragement throughout my years of study. Special thanks to my wife for her encouragements and supports during my master study. This accomplishment would not have been possible without them. Thank you.

Acknowledgement.....	I
Contents.....	III
List of Figures.....	VI
List of Tables.....	X
Abstract.....	XI
English Summery.....	XII

Chapter 1: Theoretical Background

1.1 Introduction.....	1
1.2 Spinel ferrites	2
1.2.1 Crystal Structure of Spinel Ferrites.....	2
1.2.2 Cation Distribution in Spinel Ferrites.....	3
1.2.3 Magnetic parameters.....	4
1.2.4 Electrical properties of ferrites.....	5
1.2.4.1 D.C – Electrical properties of ferrites.....	5
1.2.4.2 Dielectric properties of ferrites.....	8
1.3 Ferroelectrics.....	10
1.3.1 Crystal structure of ferroelectric phase (BaTiO_3)	10
1.3.2 Electrical properties of BaTiO_3	12
1.3.3 Dielectric constant and dielectric loss of ferroelectrics ...	14
1.3.4 Applications of ferroelectric ceramics	16

Chapter 2: Literature Survey

First: Some barium titanate composites	17
Second: Some other ferroelectric composites	24
Aim of the work	26

Chapter 3: Experimental Techniques

3.1 Preparation	28
3.1.1 Preparation of ferrite phase (NMFO).....	28
3.1.2 Preparation of ferroelectric phase (BTO).....	29
3.2 Characterization	33
3.2.1 XRD analysis.....	33
3.2.2 High-resolution transmission electron microscopy analysis.....	34
3.2.3 Field emission scanning electron microscopy (FESEM) analysis.....	35
3.3 Electrical measurements	36
3.3.1 D.C electrical resistivity Measurements.....	36
3.3.2 Dielectric constant (ϵ') and dielectric loss ($\tan \delta$) measurements at low and high frequency region.....	37
3.3.3 Ferroelectric hysteresis (P-E) loops	39
3.4 Magnetic properties	40
3.3.1 Magnetic hysteresis (M-H) loops	40
3.4.1 Relative magnetic permeability measurements.....	42

Chapter 4: Results and Discussion

4.1 Microstructure properties	44
4.1.1 X-ray analysis.....	44
4.1.2 Density & Porosity measurement.....	50
4.1.3 Infrared spectra.....	52
4.1.4 High-resolution transmission electron microscope (HRTEM).....	54
4.1.5 Field-emission scanning electron microscope (FESEM).....	55
4.2 Electrical properties	57
4.2.1 D.C resistivity.....	57
4.2.2 Dielectric properties.....	59
4.2.2.1 Low frequency dielectric constant (ϵ') and dielectric loss ($\tan \delta$)....	59
4.2.2.2 High frequency dielectric constant and dielectric loss ($\tan \delta$).....	63
4.2.3 AC conductivity.....	67

4.2.4 Ferroelectric hysteresis loop (P-E loop)	68
4.3 Magnetic Properties	71
4.3.1 (M-H) hysteresis loops	71
4.3.2 Relative permeability measurements.....	73
Conclusion	74
References	75
