HOSSAM MAGHRABY

Assessment of Left Ventricular function using two- and three-dimensional speckle tracking Echocardiography among healthy Egyptian pediatric-aged children

Thesis

*Submitted for Partial Fulfillment of Master Degree in
Cardiology*

By

Hany Nazmy Taalab

M.B.,B.Ch,

Under Supervision of

Prof. Dr. Hebatalla Attia, MD

Assistant Professor of Cardiology

Faculty of medicine – Ain Shams University

Dr. Heba Mohamed Kamel, MD

Lecturer of Cardiology

Faculty of medicine – Ain Shams University

Dr. Aya Tarek El Sayegh, MD

Lecturer of Cardiology

Faculty of Medicine – Ain Shams University

Cardiology Department

Faculty of Medicine

Ain Shams University

2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالَ

سَبِّحْ اِنَّكَ لَا تَعْلَمُ لَنَا
اِلَّا مَا عَلَّمْتَنَا اِنَّكَ اَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**,
the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to **Prof. Dr. Hebatalla Attia, MD**, Assistant Professor of Cardiology, Faculty of medicine – Ain Shams University for her keen guidance, kind supervision, valuable advice and continuous encouragement, which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and thanks to **Dr. Heba Mohamed Kamel, MD**, Lecturer of Cardiology, Faculty of medicine – Ain Shams University, for her kind care, continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

*I am deeply thankful to **Dr. Aya Tarek El Sayegh, MD**, Lecturer of Cardiology, Faculty of Medicine – Ain Shams University, for her great help, active participation and guidance.*

Hany Nazmy

List of Contents

Title	Page No.
List of Abbreviations.....	i
List of Tables	ii
List of Figures	iv
Introduction	1
Aim of the Study	3
Review of Literature	
The Left Ventricle	4
LV Assessment by 2D Echocardiography and Speckle Tracking.....	16
LV Assessment by Three-Dimensional Echocardiography and Speckled Tracking.....	41
Subjects and Methods.....	61
Results	78
Discussion	103
Conclusion	116
Summary	117
References	120
Arabic Summary	—

List of Abbreviations

Abb.	Full term
2D	Two dimensional
3D	Three dimensional
AO	Aortic diameter
BSA	Body surface area
EDD	End diastolic diameter
EDV	End diastolic volume
EF.....	Ejection fraction
ESD.....	End systolic diameter
ESV.....	End systolic volume
FS.....	Fractional shortening
GCS	Global circumferential strain
GLS.....	Global longitudinal strain
GRS	Global radial strain
LA.....	Left atrium
LAX.....	Long axis
LV	Left ventricle
LVPW	left ventricular posterior wall
M-Mode	Motion mode
SAX	Short axis
TAPSE	Tricuspid annular plane systolic excursion

List of Tables

Table No.	Title	Page No.
Table (1):	Shows normal pediatric reference values for diastolic function parameters. ⁽²⁵⁾	67
Table (2):	Representing gender percentage.....	78
Table (3):	Demonstrating the study population demographic data. BSA: body surface area	79
Table (4):	Showing our study population 2D Guided M-mode echocardiographic parameters.....	81
Table (5):	Showing our study population 2D speckle tracking parameters.....	82
Table (6):	Showing mean of 2D speckle tracking parameter in subjects of our study categorized according to age group.....	83
Table (7):	Showing our study population 3D echocardiographic parameters.....	86
Table (8):	Showing study population 3D speckle tracking echocardiography parameters.....	87
Table (9):	Showing mean of 3D speckle tracking parameter in subjects of our study categorized according to age group.....	87
Table (10):	Showing r and p values of correlation between 2D strain and age of our study population.....	88
Table (11):	Showing r and p values of correlation between 2D strain and age of our male study population.	91
Table (12):	Showing r and p values of correlation between 2D strain and age of our female study population.	93

List of Tables Cont...

Table No.	Title	Page No.
Table (13):	Showed r and p values of correlation between 3D strain and age of our study population.....	95
Table (14):	Showed r and p values of correlation between 3D strain and age of our male study population.	97
Table (15):	Showed r and p values of correlation between 3D strain and age of our female study population.	99
Table (16):	Shows the r and p values of correlation among our study population 2D and 3D values of strain.	101
Table (17):	Summarize different studies mean \pm SD of 2D strain values of healthy children.	108
Table (18):	Summarize different studies 3D strain values in healthy children.	113

List of Figures

Fig. No.	Title	Page No.
Figure (1):	Shows a 22-day embryo with segments of heart tube.	8
Figure (2):	Showing embryology of cardiac valves.	9
Figure (3):	Showing stages of embryogenesis of heart tube with development of cardiac chambers.	10
Figure (4):	Shows the internal features of the left ventricle.	12
Figure (5):	Shows structure of mitral apparatus.	13
Figure (6):	Shows structure of the aortic valve.	14
Figure (7):	Shows cross section across right and left ventricles.	15
Figure (8):	Showing tracing of the endocardium at the apical four and two chambers view for estimation of EF	18
Figure (9):	Shows the measurements of LV (area-length) at end diastole and peak systole using biplane two-dimensional echocardiographic methods.	20
Figure (10):	Assessment of rotation by two-dimensional speckle tracking at the level of the base.	32
Figure (11):	Shows 3d echo area strain of an athlete.	48
Figure (12):	Parasternal short axis view at level of papillary muscles from study subject NO (25) with M-MODE across the LV measuring IVS, PW, EDD, ESD, EF and FS	64
Figure (13):	Parasternal short axis view in study subject No (9), showing with M-MODE along the aorta and left atrium showing normal left atrial diameter and aortic root diameter	65

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (14):	Apical four chambers view from subject No (43) showing pulsed wave doppler placed over mitral valve to measure mitral inflow with measuring E/A ratio.....	68
Figure (15):	Apical four chambers view from subject No (115) with TDI along the medial mitral annulus showing normal E/E' value.	68
Figure (16):	Apical four chambers view from subject No (35) with M-MODE across the lateral wall of RV measuring TAPSE.	69
Figure (17):	From subject No (50) showing tracing of the endocardium at the apical long axis view as a step for calculating longitudinal strain	71
Figure (18):	From subject No (50) showing tracing of the endocardium at the apical four chambers view as a step for calculating longitudinal strain.	72
Figure (19):	From subject No (50) showing tracing of the endocardium at the apical two chambers view as a step for calculating longitudinal strain.	72
Figure (20):	From subject No (98) showing curves of the longitudinal strain of LV at the apical 4,3 and 2 chambers views with estimation of the global longitudinal strain and bull eye.	73
Figure (21):	From subject No (20) demonstrating LV tracing at level of mitral valve for estimating circumferential strain.....	74

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (22):	From subject No (107) demonstrating LV tracing at level of mitral valve for estimating radial strain.....	74
Figure (23):	From subject No (91) showing tracing of the LV for estimating the longitudinal strain.	76
Figure (24):	From subject No (91) showing tracing of the LV for estimating the circumferential strain.	77
Figure (25):	From subject No (91) showing tracing of the LV for estimating the radial strain.....	77
Figure (26):	Representing gender percentage.	79
Figure (27):	Showing diagram of subjects examined by 3D echocardiography.	84
Figure (28):	Showing our study population 2D GLS speckle tracking in relation to age	89
Figure (29):	Showing our study population 2D GCS speckle tracking in relation to age.	89
Figure (30):	Showing our study population 2D GRS speckle tracking in relation to age	90
Figure (31):	Showing 2D GLS speckle tracking of male subjects of our study in relation to age.....	91
Figure (32):	Showing 2D GCS speckle tracking of male subjects of our study in relation to age.....	92
Figure (33):	Showing 2D GRS speckle tracking of male subjects of our study in relation to age.....	92

List of Figures Cont...

Fig. No.	Title	Page No.
Figure (34):	Showing 2D GLS speckle tracking of female subjects of our study in relation to age.....	93
Figure (35):	Showing 2D GCS speckle tracking of female subjects of our study in relation to age.....	94
Figure (36):	Showing 2D GRS speckle tracking of female subjects of our study in relation to age.....	94
