MONA MAGHRABY

Assessment Of Different Anterior Segment Parameters After Pars Plana Vitrectomy Using Anterior Segment OCT, Specular Microscopy And Pentacam.

Thesis

Submitted for partial fulfillment of M.D degree in Ophthalmology

By

Mahmoud Mohamed Rabie Ahmed
M.B.,B.Ch, M.sc. Ophthalmology Ain Shams University

Supervised by

Professor Dr. Saad Mohamed Rashad
Professor of Ophthalmology
Ain Shams University

Professor Dr. Tamer Mohamed Al-Raggal
Professor of ophthalmology
Ain Shams University

Professor Dr. Mohamed Mustafa Deabis
Professor of ophthalmology
Research institute of ophthalmology

Assistant Prof. Dr. Safaa Saleh Mahmoud
Assistant professor of ophthalmology
Ain Shams University

Faculty of Medicine
Ain Shams University
Cairo, Egypt
2021

DEDICATION

This work is dedicated to my late father who was always there when needed, held my hand when I was small and taught me to be independent.. I will always miss you.

ACKNOWLEDGEMENTS

All praise and glory are due to Allah for granting me the determination to complete this thesis. My sincere thanks go to all people whose guidance, support and participation contributed to the completion of this work.

I would like to express my debts of gratitude to my supervisor, **Professor Dr. Saad Mohamed Rashad**, *Professor of Ophthalmology Ain Shams University*, for his intellectual guidance, constant help and invaluable advice towards my work. I am indebted to him for his invaluable feedback as well as his tremendous positive influence through the many stages of my thesis. Without his sincere efforts and helpful suggestions, the present study would have never come to light. Indeed, words of gratitude are not sufficient for all I owe him.

I am also honored to be supervised by **Professor Dr. Tamer Mohamed Al-Raggal**, *Professor of Ophthalmology Ain Shams University*, whom I owe a great debt of gratitude. Without exaggeration, it is difficult to find words to thank him for his caring attitudes, supportive nature, sparing no effort in helping me and dedicating numerous hours of his time for reading this work. His crucial insights,

careful reading and correction are considered an indispensable basis for the completion of my thesis.

I would like to express my thanks and appreciation to **Professor Dr. Mohamed Mustafa Deabis**, *Professor of Ophthalmology, Research Institute of Ophthalmology*, for his valuable advice and encouragement throughout this work. Really, his meticulous remarks and fruitful suggestions have enriched this dissertation.

I would like to express my thanks and appreciation to **Assistant Prof. Dr. Safaa Saleh Mahmoud**, *Assistant Professor of Ophthalmology, Ain Shams University*, who spared no time and effort to provide me with her valuable instructions.

My thanks extend to all my friends and colleagues for their notable help, support and keeping me in their prayers.

Finally, but far from the least, I would also like to acknowledge my deep sense of gratitude to my family for their unflagging love, understanding, trust, patience and endurance of every single moment during preparing the present thesis. My appreciation, for their strong and unforgettable support, has been more valuable than words can say. Special thanks and prayers are due to my beloved late father, whom I owe more than

I can repay. For my father, I dedicate this work. Really, I cannot find words to express my need to him.
