Efficacy and Safety of Different Modalities for Treatment of Erectile Dysfunction on Chronic Renal Failure Patients

A Thesis

*Submitted for Fulfillment of Master Degree
in Urology*

Presented By

Mina Nageh Zakher

M.B.B.Ch.

Faculty of Medicine, Ain Shams University

Under Supervision of

Prof. Dr. Abd El Fattah Agour

Professor of Urology

Faculty of Medicine, Ain Shams University

Dr. Ahmed Tawfick Hassan

Assistant Professor of Urology

Faculty of Medicine, Ain Shams University

Faculty of Medicine

Ain Shams University

2021

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**, the
Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and
profound gratitude to **Prof. Dr. Abd El Fattah
Agour**, Professor of Urology - Faculty of Medicine-
Ain Shams University for his keen guidance, kind
supervision, valuable advice and continuous
encouragement, which made possible the completion of
this work.*

*I am also delighted to express my deepest
gratitude and thanks to **Dr. Ahmed Tawfik
Hassan**, Assistant Professor of Urology, Faculty of
Medicine, Ain Shams University, for his kind care,
continuous supervision, valuable instructions, constant
help and great assistance throughout this work.*

*I would like to express my hearty thanks to all my
family for their support till this work was completed.*

*Last but not least my sincere thanks and
appreciation to all patients participated in this study.*

Mina Nageh Zakher

List of Contents

Title	Page No.
List of Tables	i
List of Abbreviations	iv
Introduction	1
Aim of the Work	3
Review of Literature	
<i>Anatomy of the Penis</i>	4
<i>Hemodynamics and Mechanism of Erection and Detumescence</i>	14
<i>Pathophysiology of Erectile Dysfunction</i>	17
<i>Prevalence of ED in CKD Patients</i>	30
<i>Causes of Erectile Dysfunction in CKD Patients</i>	32
<i>Medical Treatment modalities for erectile dysfunction in chronic kidney disease patients</i>	38
Patients and Methods	44
Results	47
Discussion	73
Summary	81
References	86
Arabic Summary	--

List of Tables

Table No.	Title	Page No.
Table (1):	Shows classification of causes of ED.	17
Table (2):	Shows Possible Causes of ED in CKD Patients.	37
Table (3):	Descriptive data regarding age, haemodialysis years, DM and serum creatinine.	47
Table (4):	Follow up with IIEF pre and post administration of the drug.	48
Table (5):	Follow up with EHS pre and post administration of the drug.	50
Table (6):	Showed side effects appeared in the used drugs in the study.	52
Table (7):	Distribution of drug used with age and hemodialysis years, DM and serum creatinine.	53
Table (8):	Relation of drug used with IIEF pre and post administration of the drug.	56
Table (9):	Relation of drug used with EHS pre and post administration of the drug.	57
Table (10):	Relation of drug used with difference and percentage change in IIEF.	58
Table (11):	Relation of drug used with difference and percentage change in EHS.	60
Table (12):	Showed the side effects observed with each drug used in the study.	62
Table (13):	Correlation between IIEF score pre and post with age, HD years and serum creatinine of the studied patients.	63
Table (14):	Correlation between EHS score pre and post with age, HD duration and serum creatinine of the studied patients.	67
Table (15):	The percentage change in IIEF and in EHS, with age, haemodialysis years and S.Cr.	70
Table (16):	Relation between DM and the studied scores pre and post administration of drug and their percentage of change.	72

List of Figures

Fig. No.	Title	Page No.
Figure (1):	Shows male reproductive system.....	4
Figure (2):	Shows arterial supply of the penis.	6
Figure (3):	Shows venous drainage of the penis.	8
Figure (4):	Shows microscopic anatomy.	10
Figure (5):	Shows axial cut in the penis.....	11
Figure (6):	Shows percentage of diabetic patients in the sample size.	47
Figure (7):	Shows follow up with IIEF.....	49
Figure (8):	Shows follow up with EHS.....	51
Figure (9):	Shows mean age of every group in the study	55
Figure (10):	Shows the diabetic patients in every group.	55
Figure (11):	Shows relation between drug used with IIEF pre and post.	56
Figure (12):	Shows relation between drug used with EHS pre and post.	57
Figure (13):	Shows the difference in the improvement in IIEF between the drugs used in the study.	59
Figure (14):	Shows the percentage change in the improvement in IIEF between the drugs used in the study.	59
Figure (15):	Shows the difference in the improvement in EHS between the drugs used in the study.	61
Figure (16):	Shows the percentage change in the improvement in EHS between the drugs used in the study.....	61
Figure (17):	Correlation of IIEF pre administration of the drug and age of the studied patients.....	63
Figure (18):	Correlation of IIEF pre administration of the drug and HD years of the studied patients.	64

List of Figures *(Cont...)*

Fig. No.	Title	Page No.
Figure (19):	Correlation of IIEF pre administration of the drug and serum creatinine of the studied patients.	64
Figure (20):	Correlation between age and IIEF score post administration of the treatment.	65
Figure (21):	Correlation between haemodialysis years and IIEF score post administration of the treatment.	65
Figure (22):	Correlation between s.cr. and IIEF score post administration of the treatment.	66
Figure (23):	Correlation between age and EHS score pre administration of the treatment.	67
Figure (24):	Correlation between s.cr. and EHS score pre administration of the treatment.	68
Figure (25):	Shows the negative correlation between age and EHS score post administration of the treatment.	68
Figure (26):	Correlation between haemodialysis years and EHS score post administration of the treatment.....	69
Figure (27):	Correlation between s.cr. and EHS score post administration of the treatment.	69
Figure (28):	Correlation between age and percentage change in IIEF.....	70
Figure (29):	Correlation between haemodialysis years and percentage change in IIEF.	71

List of Abbreviations

Abb.	Full term
CKD	<i>Chronic kidney disease.</i>
CRF	<i>Chronic renal failure.</i>
CVD	<i>Cardiovascular disease.</i>
DM	<i>Diabetes mellitus.</i>
ED	<i>Erectile dysfunction.</i>
EHS	<i>Erection Hardness Scale.</i>
EPCs	<i>Endothelial progenitor cells.</i>
EPO	<i>Erythropoietin.</i>
ESRD	<i>End stage renal disease.</i>
FSH	<i>Follicle stimulating hormone.</i>
HD	<i>Haemodialysis.</i>
HRQOL	<i>Health related quality of life.</i>
HS	<i>Highly significant.</i>
IHD	<i>Ischaemic heart disease.</i>
IIEF	<i>International Index of Erectile Function.</i>
LH	<i>Luteinizing hormone.</i>
MPOA	<i>Medical preoptic area.</i>
NANC	<i>Non adrenergic non cholinergic.</i>
NO	<i>Nitric oxide.</i>
NS	<i>Non significant.</i>
PDE5	<i>Phosphodiesterase type 5.</i>
PG E1	<i>Prostaglandin E1.</i>
PG E2	<i>Prostaglandin E2.</i>
PTH	<i>Parathyroid hormone.</i>
S	<i>Significant.</i>
S.Cr	<i>Serum creatinine.</i>
VECs	<i>Vascular endothelial cells.</i>
