بسم الله الرحمن الرحيم

وقضى ربك ألا تعبدوا إلا إياه و بالوالدين إحساناً  
إما يبلغن عندك الكبر أحدهما أو كلاهما فلا تقل لهما أف  
و لا تنهرهما و قل لهما قولاً كريماً  
و أخفض لهما جناح الذل من الرحمة و قل رب  
ارحمهما كما ربياني صغيراً

صدق الله العظيم (الأنعام ٢٣-٢٤)

بسم الله الرحمن الرحيم

و به نستعين

أهداء

إلى خير من أستحق الأهداء

إلى أحب الناس إلى نفسي

و أقربهم إلى قلبي

إلى من حملاني وهنأ على وهن

و ربياني صغيراً و كبيراً

إلى من أعطاني حب لا يظاهي

إلى من منحاني قوى بدون مقابل

لأسير بها في الحياة

و أكافم بها زمن مشحون بالصعوبات و التحديات

إلى أبي... إلى أمي...

إلى أب عظيم... إلى أم عظيمة...

إلى كل أب و إلى كل أم

ذابوا و فنوا حياتهم من أجل حياة أفضل لمن حولهم قبل أولادهم

أهدي هذا البحث

و لو قلت غير هذا لما كنت أستحق أن أوله

## Acknowledgment

*My Lord, I fall down in adoration to thank you for granting me help to complete this work.*

*First of all, I would like to express my endless gratitude and appreciation to my meritorious momentous teacher Prof. Dr. **Mohamed Kamel Rizk**, Professor of pediatrics, Faculty of Medicine, Zagazig University, for his generous approval to lead and supervise this work.*

*It is my pleasure to give my greatest thanks and appreciation to Prof. Dr. **Ahmed Nabih El-Shazly** Professor of pediatrics, Faculty of Medicine, Zagazig University, for his honorable participation to direct this work and for his constructive direction during accomplishment of this work.*

*I'm also grateful to Prof. Dr. **Moushira Erfan**, Professor of Human Genetics, Department of Human Genetics, National Research Center, who gave me a lot of her time, effort, knowledge and experience. I am very thankful for the facilities she offered me and unlimited effort during the statistical part of this work.*

*This work would not have been possible without the help and encouragement of Prof. Dr. **Azza Orabi**, Professor of Pediatrics, Faculty of Medicine, Cairo University, to whom, I wish particularly to express my deepest gratitude for her endless encouragement and support, her enlightening*

remarks and her friendly guidance. She patiently supervised every bit of detail in all the chapters of this thesis.

I wish to express my deepest gratitude, and greatest respect to Prof. Dr. **Salwa Youssef**, Professor of Human Genetics, Department of Human Genetics, National Research Center. The idea of this thesis was inspired by her and throughout the steps of this work, she was always there for me. Everlasting words of encouragement, generous giving and brilliant science were her major gift during the practical biochemical part of this study. I am very thankful for her keen supervision, sincere advice and continuous guidance to develop this work.

I'm very grateful to all my **Professors, seniors and colleagues** at the Department of Human Genetics, National Research Center who made all the circumstances favorable for me to complete this work specially during accomplishing the practical part. I am also thankful to my patients with whom and for whom this work was done.

Last but not least, I should like to take this opportunity to thanks my family and my daughter **Yasmine** for their loving kindness, encouragement and sincere cooperation throughout the gestation of this work.
