MONA MAGHRABY

Role of Artificial Intelligence in CXR interpretation in Pediatric Intensive Care Unit Ain Shams University

Thesis

*For Partial Fulfillment of Master Degree
in Radiology*

By

Maha Mahmoud Ahmed Arafa

M.B.B.Ch

Under Supervision of

Dr. Shaimaa Abdelsattar Mohammad, MD

*Professor of Radiodiagnosis
Faculty of Medicine, Ain Shams University*

Dr. George Ezzat Elkess Yacoub, MD

*Lecturer of Radiodiagnosis
Faculty of Medicine, Ain Shams University*

*Faculty of Medicine
Ain Shams University*

2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

لَسْبَحَانَكَ لَا يَهْتَمُّ لَنَا
إِلَّا مَا عَلِمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٢٢

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**, the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to **Prof. Dr. Shaimaa Abdelsattar Mohammad**, Professor of Radiodiagnosis, Faculty of Medicine, Ain Shams University for HER keen guidance, kind supervision, valuable advice and continuous encouragement, which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and thanks to **Dr. George Ezzat Elkess Yacoub**, Lecturer of Radiodiagnosis. Faculty of Medicine, Ain Shams University, for his kind care, continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

I would like to express my hearty thanks to all my family for their support till this work was completed.

Last but not least my sincere thanks and appreciation to all patients participated in this study.

Maha Mahmoud Ahmed Arafa

List of Contents

Title	Page No.
List of Tables	i
List of Figures.....	ii
List of Abbreviations	viii
Introduction.....	1
Aim of the Work.....	3
Review of Literature	4
Patients and Methods.....	59
Results.....	65
Illustrative Cases.....	83
Discussion.....	97
Limitations.....	102
Summary and Conclusion.....	103
References.....	104
Arabic Sumamry	

List of Tables

Table No.	Title	Page No.
Table 1.1:	Indication of CXR	5
Table 1.2:	Summary of normal CXR radiological anatomy.....	17
Table 1.3:	Examples of Pediatric lung disorders	35
Table 1.4:	Analysis condition.....	54
Table 1.5:	The ten 9 radiological signs interpreted by the unit insight CXR.....	57
Table 3.1:	Agreement between R and GS,R+AI and GS	71
Table 3.2:	Comparison between ER and the other interpreters regarding time of diagnosis (seconds).....	74
Table 3.3:	The different sensitivities, specificities as well as accuracy of AI per item	76
Table 3.4:	Illustrating the different sensitivities, specificities as well as accuracy of RE per item.....	77
Table 3.5:	Illustrating the different sensitivities, specificities as well as accuracy of RE+AI per item	78
Table 3.6:	Illustrating the percentage of the variable results of the ROC curve in AI predication of consolidation.....	81
Table 3.7:	Illustrating the percentage of the variable results of the ROC curve in AI predication of pneumothorax	82

List of Figures

Fig. No.	Title	Page No.
Figure 1.1:	Frail patient. Departmental radiograph, patient sitting up. AP CXR	8
Figure 1.2:	Bedside (i.e. portable) radiograph, patient supine. AP CXR	8
Figure 1.3:	Bedside (portable) AP CXR the heart is situated well away from the cassette	8
Figure 1.4:	AP supine CXR image demonstrating the structures on the AP view and the effects of AP position on image quality including magnified heart and mediastinum, elevated diaphragms and scapula's overlying the lungs	8
Figure 1.5:	a) PA CXR position: Patient is positioned upright facing the bucky, resting the chin at the center, the arms rotated with the elbows touching the bucky and dorsal hands on the hips, and medial sagittal line lying at the middle. b) PA CXR image showing good quality image, with equidistant clavicles at level of the T4 thoracic vertebra, all the necessary areas of the chest included, the anterior 7 ribs and the posterior 10 ribs are visible above the diaphragm showing good inspiration, and has good penetration with no image blurring. There is subtle abnormal finding RT upper lung ill-defined hazy infiltrates.	11
Figure 1.6:	Left (LT) or right (RT) with the side of interest positioned closest to the detector during exposure).	13
Figure 1.7:	Normal PA CXR	15
Figure 1.8:	Diagram clarify the four tricky hidden areas	16
Figure 1.9:	Showing Primary pulmonary lymphocytic MALT lymphoma of the lung. Poster anterior CXR showing focal consolidation in the right lower lung zone (arrow)	22

List of Figures

Fig. No.	Title	Page No.
Figure 1.10:	Bilateral diffuse lung opacities (consolidations).....	23
Figure 1.11:	Parenchymal middle lobar consolidation and silhouette sign from middle lobe pneumonia.....	23
Figure 1.12:	a,b (A)PA CXR showing ill-defined LT medial upper lung opacity with upward retracted LT hilum and hilum overlay sign suggestive of LT upper lobe collapse. (B)Apical view of the same patient showing LT upper lung opacity with volume loss, lateral border outlined by upward shifted fissure, mediastinal shift to the left, upward retracted LT hilum supporting evidence of LT upper lung collapse consolidation	25
Figure 1.13:	(a,b) PA CXR showing upper right pulmonary nodule.....	26
Figure 1.14:	PA CXR showing RT upper lung cavity with relatively smooth inner wall outline and surrounding hazy infiltration, and blunted RT costophrenic angle.....	28
Figure 1.15:	a) PA CXR showing LT upper lung linear. b) PA CXR of another patient with RT opacity with crowding of adjacent vessels. apical linear opacity underlying the RT first riband medical clavicle.....	29
Figure 1.16:	PA CXR showing bilateral generalized reticulonodular interstitial infiltrations, with bilateral hilar enlargement (lymphadenopathy), minimal thickening of the minor fissure and RT upper lung linear opacity.....	31
