# **Study of Some Factors Affecting the Efficiency of the Flat Plate Solar Collector - (Theoretical Study)**

**Thesis**

**Submitted for the Degree of Master of Teacher's Preparation in  
Science (Theoretical Physics)**

**By**

**Ahmed Mohamed Abdelaziz Ali**

**Supervised by**

**Prof. Dr. Mohamed Abdel-Hady Kamel El-Adawi**

Professor of Theoretical Physics,  
Faculty of Education,  
Ain Shams University

**Dr. Samia Sayed Mustafa**

Teacher of Theoretical Physics,  
Faculty of Education,  
Ain Shams University

Ain Shams University  
Faculty of Education  
Physics Department

**Researcher's Name:** Ahmed Mohamed Abdel Aziz Ali

**Title of the thesis:** Study of Some Factors Affecting the Efficiency of the Flat Plate Solar Collector - (Theoretical Study)

**Submitted to:** Physics Department, Faculty of Education, Ain Shams University

**Supervisors:**

**1. Prof. Dr. Mohamed Abdel-Hady Kamel El-Adawi**

Professor of Theoretical Physics, Faculty of Education, Ain Shams University

**2. Dr. Samia Sayed Mustafa**

Teacher of Theoretical Physics, Faculty of Education, Ain Shams University

Ain Shams University  
Faculty of Education  
Physics Department

### Approval Sheet

**Title:** “Study of Some Factors Affecting the Efficiency Of the Flat Plate Solar Collector - (theoretical study)”

**Candidate:** Ahmed Mohamed Abdelaziz Ali

**Degree:** Master degree of Teacher Preparation in Science (Theoretical Physics)

### Board of Advisors

Approved by	Signature
<b>Prof. Dr. Mohamed Abdel-Hady Kamel El-Adawi</b> Professor of Theoretical Physics, Faculty of Education, Ain Shams University	
<b>Dr. Samia Sayed Mustafa</b> Teacher of Theoretical Physics, Faculty of Education, Ain Shams University	

Cairo, Egypt, Date of presentation: / /2021

Stamp: / /2021

Date of approval: / /2021

Approval of Faculty council: / /2021

Approval of University council: / /2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

}} قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ}}

صَدَقَ اللَّهُ الْعَظِيمُ

# ACKNOWLEDGMENT

## **Acknowledgement**

I Would Like to Thank **Allah Almighty** for Guidance and Help Covering All My Steps to Fulfill This Thesis.

I Would Like to Thank **Prof. Dr. Mohamed Abd El Hady Kamel El-Adawi**, Professor of Theoretical Physics, Faculty of Education, Ain Shams University, For His Fruitful Supervision, Assistance, Discussion and Sincere Help During This Work.

I Would Like to Thank **Dr. Samia Sayed Mostafa**, Teacher of Theoretical Physics, Faculty of Education, Ain Shams University, For Her Supervision, Support, Fruitful Discussions and Help During This Work.

I Would Like to Thank **Prof. Dr. Safaa Abd El Fattah Shalaby**, Professor of Theoretical Physics, Faculty of Education, Ain Shams University for Her Effort, Interest, And Fruitful Discussions Throughout This Thesis.

I Would Like to Thank **Prof. Dr. Radwan Hamoda**, Professor of Physics, Vice Dean, Faculty of Education, Ain Shams University, For His Continuous Support.

I Would Like to Express My Deep Appreciations to **Prof. Dr. Alaa-Alden Mohamed Farag**, Head of Physics Department, Faculty of Education, Ain Shams University, For His Support and Encouragement

I Would Like to Thank the Whole Staff of The Physics Department, Faculty of Education, Ain Shams University for Their Encouragement.

I Would Like to Thank My Parents and My Family for Their Continuous Help, Support and Encouragement.

I Would Like to Thank My Friends for Their Help.

# CONTENTS

## **Contents**

<b>Acknowledgment .....</b>	<b>i</b>
<b>Contents .....</b>	<b>ii</b>
<b>List of tables .....</b>	<b>v</b>
<b>List of figures .....</b>	<b>vi</b>
<b>Nomenclatures .....</b>	<b>viii</b>
<b>Greek Symbols .....</b>	<b>ix</b>
<b>Publications .....</b>	<b>x</b>
<b>Summary .....</b>	<b>xi</b>
<b>Abstract .....</b>	<b>xvii</b>
 <b>Chapter 1</b>	
Introduction .....	1
1.1 Energy problems .....	1
1.2 Energy sources .....	2
1.3 Types of energy .....	2
1.3.1 Non-renewable energy .....	2
1.3.2 Renewable energy .....	3
1.4 Solar energy .....	4
1.5 Solar energy conversions .....	5
1.5.1 Heliochemical processes .....	6
1.5.2 Helioelectrical processes .....	6
1.5.3 Heliothermal processes .....	6
1.6 Solar thermal energy applications .....	7
1.7 Molten salt technology .....	8
1.8 Solar collectors .....	9
1.8.1 Flat plat collectors .....	9
1.8.2 Evacuated tube collectors .....	13
1.8.3 Concentrating collectors .....	15
1.8.3.1 Compound parabolic collectors .....	15

1.8.3.2 Parabolic trough collectors .....	16
1.8.3.3 Linear Fresnel reflectors .....	17
1.8.3.4 Parabolic dish reflectors .....	17
1.9 Aim of the thesis .....	18

## Chapter 2

Survey of literatures .....	19
-----------------------------	----

## Chapter 3

On the solar radiation .....	26
3.1. The sun .....	26
3.2. Solar radiation .....	27
3.3. Air mass .....	28
3.4. Solar angles .....	29
3.5. The solar constant .....	32
3.5. The daily global solar radiation .....	33

## Chapter 4

Performance and efficiency of a flat plate solar collector with <b>thin</b> absorber -theoretical study .....	35
4.1. Introduction .....	35
4.2. Determination of the temperature of the absorber .....	36
4.3. Determination of the working fluid temperature .....	37
4.4. Determination of the efficiency of the flat plate collector .....	39
4.5. Computations .....	40
4.5.1 The temperature $\theta(t)$ of the absorber plate computations .....	41
4.5.2 The average temperature $\bar{\theta}_w(t)$ of the working fluid computations ...	45
4.5.3 The efficiency ( $\eta$ ) computations .....	47

## Chapter 5

Performance and efficiency of a flat plate solar collector with <b>thick</b> absorber -theoretical study .....	49
5.1. Introduction .....	49
5.2. Setting up the problem .....	50
5.3. Solving the heat diffusion equation .....	52
5.4. Determination of the temperature profile through the absorber .....	55
5.5. Determination of $\theta(0, t)$ .....	57

5.6. Determination of $\theta(x, t)$ .....	58
5.7. Determination of the excess temperature at the absorber plate's rear surface $\theta(l, t)$ .....	59
5.8. Determination of the working fluid temperature.....	62
5.9. Determination of the efficiency ( $\eta$ ) of the flat plate collector .....	64
5.10. The Computations .....	65
5.10.1. The effect of the absorber material .....	66
5.10.2. The effect of the absorber thickness .....	71
5.10.3. The effect of the heat transfer coefficient for convection .....	75
5.10.4. The effect of the flow rate of the working fluid .....	79
<b>Conclusions</b> .....	<b>83</b>
<b>References</b> .....	<b>85</b>
<b>Arabic summary</b> .....	<b>i</b>

## LIST OF TABLES

## List of Tables

No.	Table	Page
3-1	Some facts on the sun	27
4-1	The physical parameters of the considered absorber materials.	40
4-2	The variation of the temperature of the absorber $\theta(t)$ , K of different materials subjected to incident solar radiation with the shifted local day time $\acute{t}$ , hr. [eq. (4-5)] for $[h = 3 \text{ W/m}^2\text{K}]$	41
4-3	The variation of the temperature of the absorber $\theta(t)$ , K of different materials subjected to incident solar radiation with the shifted local day time $\acute{t}$ , hr. [eq. (4-5)] for $[h = 10 \text{ W/m}^2\text{K}]$	43
4-4	The variation of the average temperature of the working fluid $\bar{\theta}_w(t)$ , K with the shifted local day time $\acute{t}$ , hr. [eq. (4-11)] for $[h = 3 \text{ W/m}^2\text{K}]$	45
4-5	The variation of the efficiency of the flat plate collector $\eta$ , % with the shifted local day time $\acute{t}$ , hr. [eq. (4-13)] for $[h = 3 \text{ W/m}^2\text{K}]$	47
5-1	The physical parameters of the considered absorber materials	66
5-2	The variation of the average temperature of the working fluid $\bar{\theta}_w(t)$ , K with the shifted local day time $\acute{t}$ , hr. at different materials for the absorber plate [eq. (5-46)]	67
5-3	The variation of the efficiency $\eta$ , % of the flat plate collector with the shifted local day time $\acute{t}$ , hr. at different materials for the absorber plate [eq. (5-49)]	69
5-4	The variation of the average temperature of the working fluid $\bar{\theta}_w(t)$ , K with the shifted local day time $\acute{t}$ , hr. at different thicknesses ( $l$ ) for the absorber plate [eq. (5-46)]	71
5-5	The variation of the efficiency $\eta$ , % of the flat-plate collector with the shifted local day time $\acute{t}$ , hr. at different thicknesses ( $l$ ) for the absorber plate [eq. (5-49)]	73
5-6	The variation of the average temperature of the working fluid $\bar{\theta}_w(t)$ , K with the shifted local day time $\acute{t}$ , hr. at different heat transfer coefficients $h_r$ , $\text{W/m}^2\text{K}$ [eq. (5-46)]	75
5-7	The variation of the efficiency $\eta$ , % of the flat plate collector with the shifted local day time $\acute{t}$ , hr. at different heat transfer coefficients $h_r$ , $\text{W/m}^2\text{K}$ [eq. (5-49)]	77
5-8	The variation of the average temperature of the working fluid $\bar{\theta}_w(t)$ , K with the shifted local day time $\acute{t}$ , hr. at different flow rates of the working fluid [eq. (5-46)]	79
5-9	The variation of the efficiency $\eta$ , % of the flat plate collector with the shifted local day time $\acute{t}$ , hr. at different flow rates of the working fluid [eq. (5-49)].	81
