**CHEMICAL STUDIES ON SOME AZO COMPOUNDS
AND THEIR CHELATING BEHAVIOUR
TOWARDS SOME METAL IONS**

**A Thesis
Submitted to
Chemistry Department, Faculty of Science**

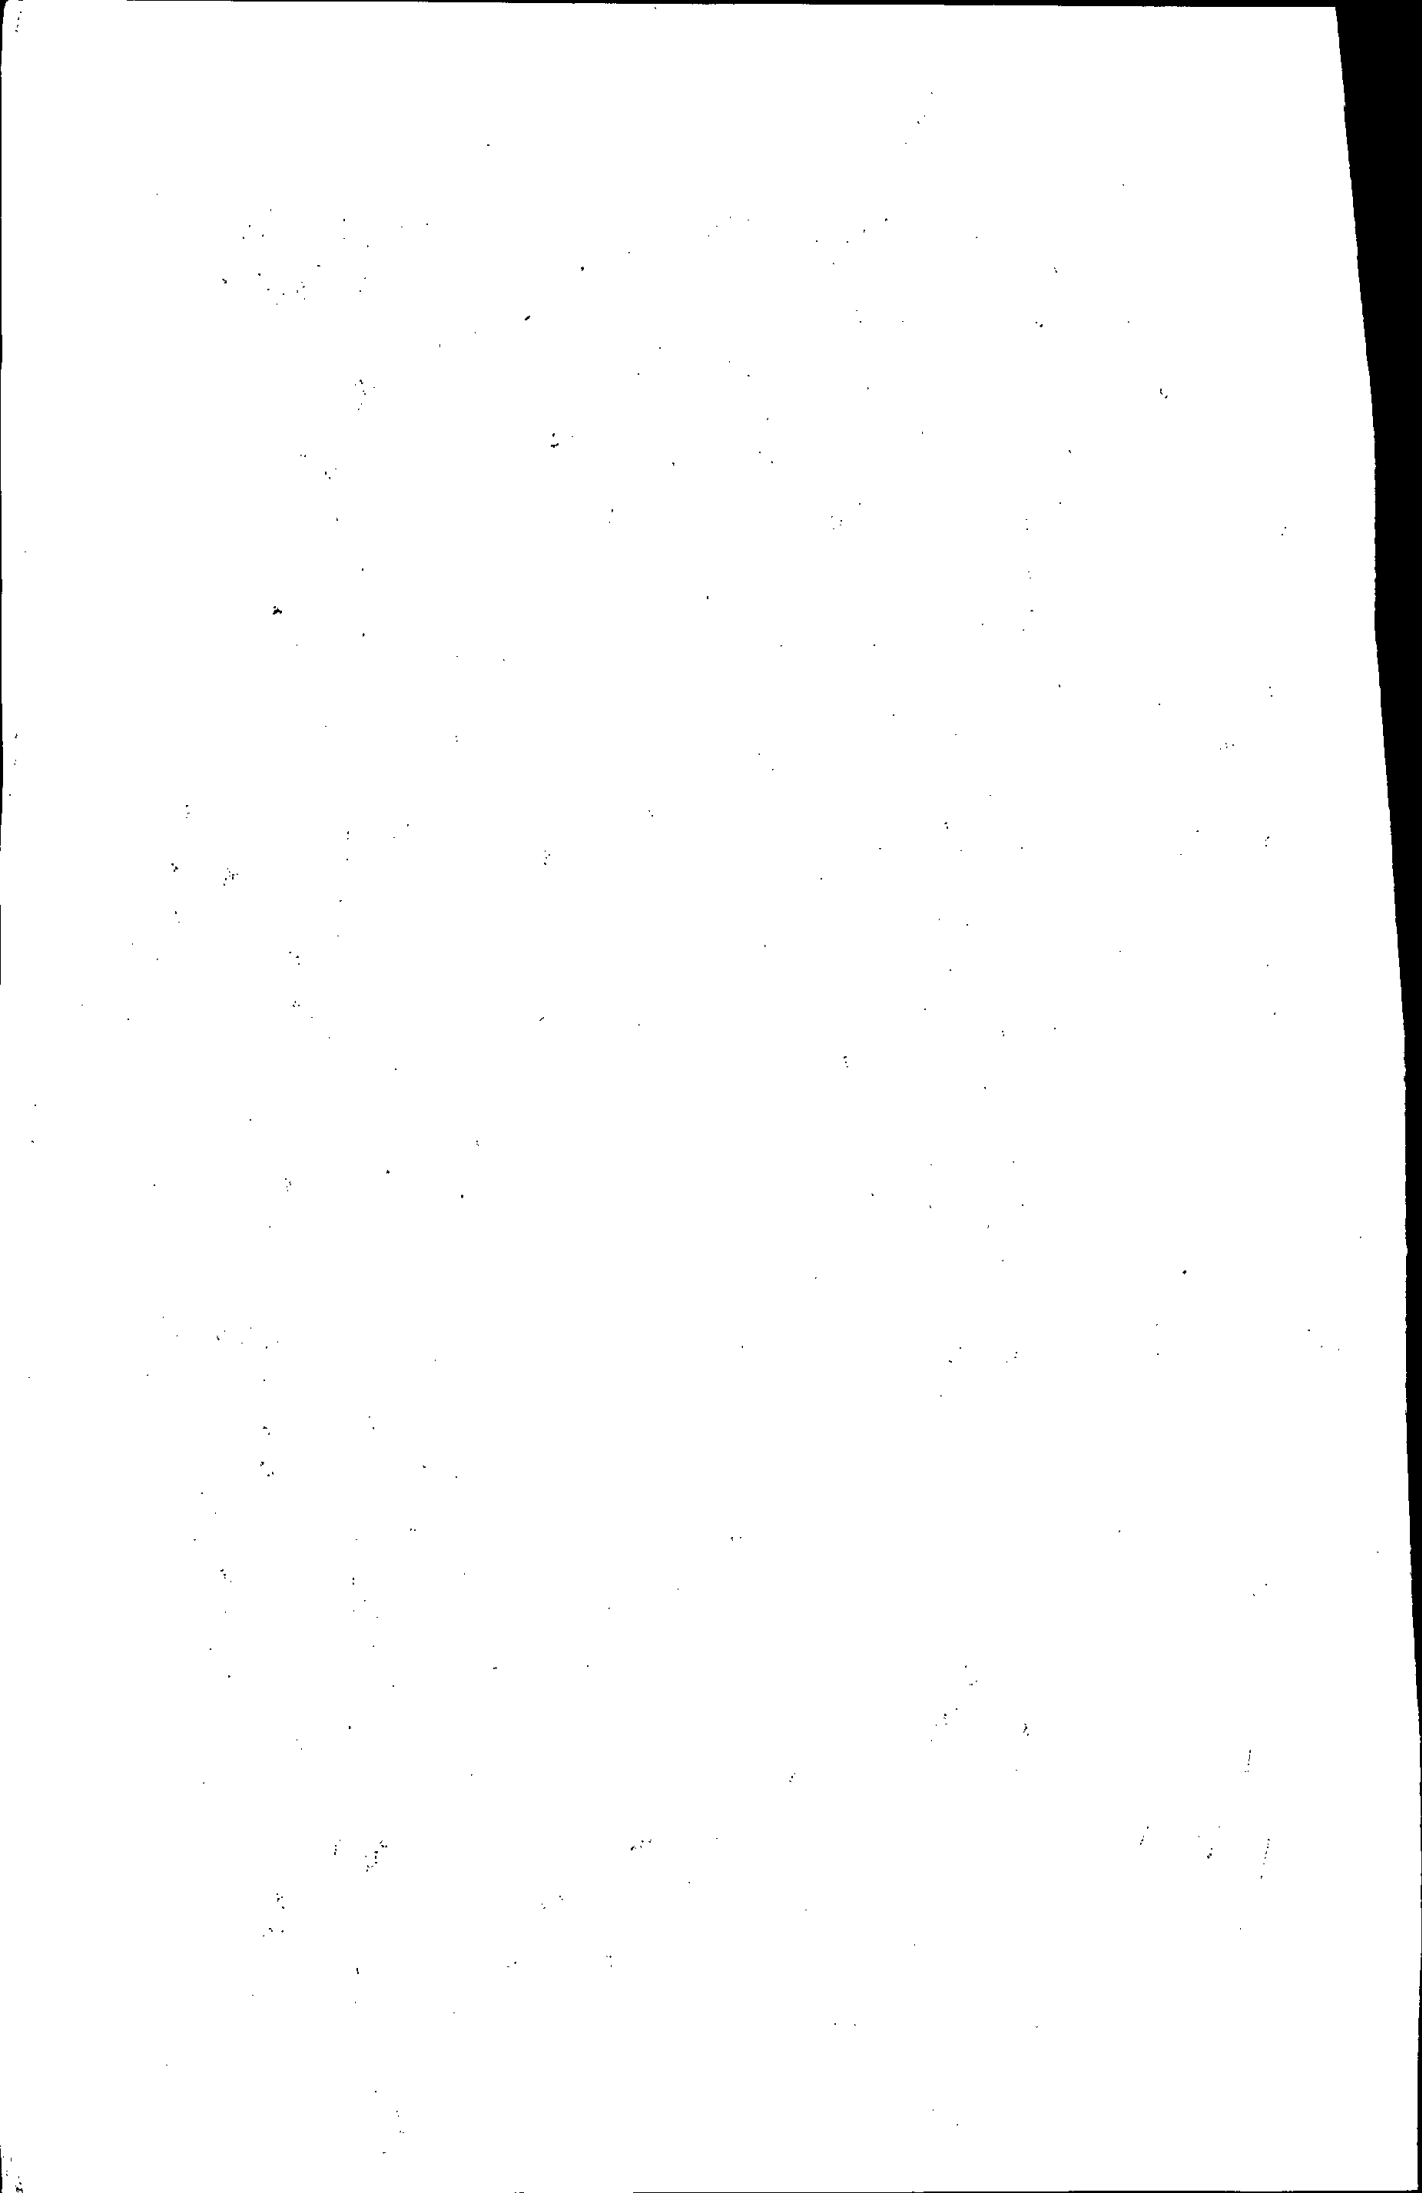

**By
Ashraf Abo El-Fotouh Mahmoud Lotfallah**

**B. Sc. (Chemistry), 1993
Faculty of Science, Tanta University**

*In Partial Fulfillment for The Degree of
Master of Science*

1997

B
17-12

To : My mother and my father's spirit.

and

To : All who have helped me in
this work .

ACKNOWLEDGMENT

I am deeply thankful to God, by the grace of whom the progress and success of this work was possible .

I wish to express my deep thanks to *Dr. Mohamed Gaber Abou El-Azm*, professor of Inorganic Chemistry, *Dr. Amira Mahmoud Hassaanien*, Assistant professor of Physical Chemistry for suggesting the research problem, continuous guidance and valuable advice throughout this work and also for simulating discussions and reviewing critically the manuscript .

I also express my gratitude to Dr. R. M. Issa, professor of Inorganic chemistry and Dr. M. Ghoneim professor of physical and Inorganic chemistry and Dean of the Faculty of Science Tanta University, for their effort and encouragement.

I would like also to thank all members of the Inorganic and Electrochemical research group for their help.

Candidate

Ashraf Abo El-Fotouh Lotfallah

SUPERVISORS

1- prof. Dr. Mohamed Gaber Abou El-Azm .

professor of Inorganic Chemistry, Faculty of
Science Tanta University .

2- Ass. Prof. Amira Mahmoud Hassaanien .

Assistant Professor of physical Chemistry, Faculty
of Science, Tanta University .

A handwritten signature in black ink, appearing to read 'S. H. V.', is written over a long, slightly curved horizontal line.

STATEMENT

Besides the work carried out in the thesis, the candidate had attended post-graduate courses for one year in physical and inorganic chemistry, covering the following topics .

1. Inorganic Chemistry .
2. Photochemistry .
3. Chemical Kinetic .
4. Group theory .
5. Molecular Spectroscopy .
6. Organic polymers and adhesives .
7. Solid state Chemistry .
8. Electrochemistry .
9. German Language .

Prof. Dr. S. Etiwa

Head of Chemistry Department
Faculty of Science
Tanta University

CURRICULUM VITA

Name : Ashraf Abou El-Fotouh Mahmoud Lotfallah .
Date of Birth : 15 / 10 / 1968
Nationality : Egyptian
Qualifications : B. Sc. Degree with general grade “ Good”. May
(1993), Faculty of Science, Tanta Univeristy .

CONTENTS

Chapter I Introduction

I.1	Chemistry of Azo Dyes	1
I.2	Literature Survey on Metal Chelates of Azo Compounds	3
I.3	Literature Survey on Polarographic and Cyclic Voltammetric behaviour of Azo Dye Compounds.	13
I.4	Literature Survey on Antipyrine Azo Dyes	19

Chapter II Experimental

II.1	Materials and Solvents	23
II.2	Preparations	23
II.2.1	Solutions	23
II.2.1.1	Universal Buffer Solutions	23
II.2.1.2	Metal and Dyestuff Solutions	24
II.2.2	Preparation of The Azo Dyes	24
II.2.3	Preparation of The Solid Complexes	26
II.2.4	Preparation of The Nujol mull	26
II.3	Electronic Absorption Spectra of Free Ligands	26
II.3.1	Half - Height Method	27
II.3.2	Limiting Absorbance Method	28
II.3.3	Modified Limiting Absorbance Method	28
II.3.4	Isobestic Point Method	29
II.3.5	Modified Isobestic Point Method	29
II.4	Polarographic Investigation	30
II.4.1	The Electrolysis Cell	30
II.4.2	The Dropping Mercury Electrode	31

II.4.3	Preparation of Solution for Polarographic Measurements ...	31
II.4.4	Polarographic Measurements	32
II.4.5	Cyclic Voltammetry	33
II.5	Spectrophotometric Studies of Metal Complexes	33
II.5.1	Sequence of Addition	33
II.5.2	Effect of Time	34
II.5.3	Optimum pH Value	34
II.5.4	Selection of Wavelength	34
II.5.5	Molecular Structure of The Metal Chelates	35
II.5.5.1	Molar Ratio Method	35
II.5.5.2	Continuous Variation Method	35
II.5.6	Obedience of Beer's Law	36
II.5.7	Stability Constant of Metal Complexes	36
II.5.8	Spectrophotometric Titration of Metal-Ion With EDTA Using The Azo Dyes as Indicator	37
II.6	Conductometric Titration	37
II.7	Working Procedures	38
II.7.1	Analysis of The Solid Complexes	38
II.7.2	Conductance Measurements	39
II.7.3	Thermal Analysis	40
II.7.4	IR - Spectra	40
II.7.5	The Electronic Absorption Spectra	40
II.7.6	Magnetic Measurements	40
II.7.7	Electron Spin Resonance Spectra	41
II.7.8	Electrical Conductivity Measurements	41

Chapter III Results and Discussion

III.1	Study of Ligands	43
-------	------------------------	----

III.1.1	IR - Spectra of Free Ligands	43
III.1.2	Solvent Effect on The Spectra of Organic Molecules	46
III.1.3	Absorption Spectra In Buffer Solutions	53
III.1.4	Voltammetric Studies	55
III.1.4.1	DC Polarographic Measurements	55
III.1.4.1.a	Current - Potential Current	55
III.1.4.1.b	Effect of Pressure at Mercury Head	55
III.1.4.1.c	Analysis of The Polarographic Waves	56
III.1.4.1.d	Half - Wave Potential - pH Curves	58
III.1.4.2	Cyclic Voltammetry Measurements	60
III.1.4.3	Kinetic Parameters of The Electrode Reaction	61
III.1.4.3.a	Calculation of The Rate Constant From Experimental Data.	61
III.1.4.3.b	Calculation of The Activation Energy From The Experimental Data	63
III.2	Study of Complexes in Solution	65
III.2.1	Effect of pH	65
III.2.2	Selection of The Suitable Wavelength	66
III.2.3	Sequence of Addition	67
III.2.4	Effect of Time	67
III.2.5	Molecular Ratio of The Complexes	67
III.2.5.1	The Molar Ratio Method	68
III.2.5.2	The Continuous Variation Method	68
III.2.6	Obeysence of Beer's Law	69
III.2.7	Evaluation of The Stability Constant of Metal Complexes ..	71
III.2.8	Spectrophotometric Titration	72
III.2.9	Conductometric Titration	73
III.3	Study of The Solid Complexes	77
III.3.1	Elemental Analysis	77
