Nursing Strategies for Alleviating Endometriosis Related Symptoms

Thesis

*Submitted for Partial Fulfillment of the Doctorate
Degree In Maternity Nursing & Gynecology*

**Supervised By
Prof. Dr. Shadia Hamido**

*Professor of Maternity Nursing & Gynecology
Faculty of Nursing
Ain Shams University*

Prof. Dr. Randa Mohamed

*Professor of Maternity Nursing & Gynecology
Faculty of Nursing
Ain Shams University*

**Faculty of Nursing
Ain Shams University
2020**

Acknowledgment

First and foremost I express my thanks and gratitude to
Allah The most kind and most merciful

My Special sincere gratitude and appreciation to
Prof. Dr. Shadia Hamido Professor of Maternity Nursing & Gynecology, Faculty of Nursing, Ain Shams University, for her encouragement, cooperation, supervision, and unlimited help to provide all facilities to accomplish this work.

I'm really honored to work under her generous supervision.

Also, I would like to express great thanks to **Prof. Dr. Randa Mohamed** Professor of Maternity Nursing & Gynecology, Faculty of Nursing, Ain Shams University, for her continuing help, great support, encouragement, patience, and her advice were always stimulating actually she was the actual spirit of this work, through her great support, and supervision through conduction of this study.

Also, I would like to thank all endometriosis women who participated in this work.

Asmaa Mahmoud Mohamed

List of Figures	IV
List of Abbreviations	VI
Abstract	VII
Introduction	1
Aim of the Study	6
Review of Literature	
Chapter (1): Endometriosis related symptoms & their management	
• Definition	7
• Incidence	7
• Risk factors for endometriosis	8
• Cause of endometriosis & Pathogenesis	9
• Signs and symptoms of endometriosis	13
• Stages "grades" of endometriosis	15
• Diagnosis	17
• Impact of endometriosis on women's lives	19
• Complications Related to Endometriosis	21
• The recurrence rate of endometriosis	21
• Management of endometriosis related symptoms	23
✓ Medical treatment	24
✓ Surgical Treatment	29
✓ Combined medical and surgical approaches	33

✓ General principle of therapy for recurrent endometriosis	34
--	----

Chapter (2): Nursing strategies for alleviating endometriosis related symptoms:

• The first nursing strategy, concerning with nutrition:	36
✓ Endometriosis nutritional pyramid	39
✓ Elimination Diet and Endometriosis	47
✓ The Basics of a Healthy, Well Balanced Diet for women with endometriosis	48
• The second nursing strategy, concerning with exercises	49
✓ Exercises for alleviating endometriosis related symptoms include	50
1- Relaxation exercises	50
2- Pelvic floor strengthening	54
3- Stretching and flexibility exercises	59
✓ Exercises that elevate endometriosis related symptoms	62
• The third nursing strategy, concerning with stress & pain management	62

Chapter (3): Nursing management for endometriosis based on national action plan:

• Priority 1: Raising awareness	68
• Priority 2: Clinical management and care	70
• Priority 3: Research	76

Subject and Methods	77
Results	90
Discussion.....	113
Conclusion & Recommendations	130

List of Tables

No.	Table	Page
Table in Results		
1	Distribution of the study sample according to their socio-demographic characteristics.	91
2	Distribution of the study sample according to their menstrual history.	93
3	Distribution of the study sample according to their obstetric history.	94
4	Distribution of the study sample according to their endometriosis history.	95
5	Distribution of the study sample according to their knowledge regarding endometriosis before implementation of nursing strategy.	97
6	Distribution of the study sample according to their knowledge regarding endometriosis after implementation of nursing strategy.	99
7	Distribution of the study sample according to their knowledge regarding endometriosis at follow-up.	100
8	Distribution of the study sample according to their self-care practices for alleviating endometriosis related symptoms before implementation of nursing strategy.	102

No.	Table	Page
9	Distribution of the study sample according to their self-care practices for alleviating endometriosis related symptoms after implementation of nursing strategy.	103
10	Distribution of the study sample according to their self-care practices for alleviating endometriosis related symptoms at follow-up.	105
11	Distribution of the study sample according to their EHP-30 before implementation of nursing strategy.	106
12	Distribution of the study sample according to their pains before and after implementation of nursing strategy.	107
13	Distribution of the study sample according to their fatigue before implementation of nursing strategy	108
14	Distribution of the study sample according to their fatigue after implementation of nursing strategy.	109
15	Distribution of the study sample according to their fatigue before and after implementation of nursing strategy.	110

No.	Table	Page
16	Correlation between Endometriosis Health Profile (endometriosis related symptoms), pain, fatigue of the studied sample and women compliance for nursing strategy (diet).	111
17	Correlation between Endometriosis Health Profile (endometriosis related symptoms), pain, fatigue of the studied sample and women compliance for nursing strategy (exercises).	112
