MONA MAGHRABY

**The Glenn Shunt Revisited, A Single Center
Registry in Ain Shams University, Cardiology
Department**

Thesis

*Submitted in Partial Fulfillment of the M.D. Degree in
Cardiology*

By

Mina Aziz Maurice Tewfik

Master Degree in Cardiology
Ain Shams University

Under supervision of

Prof. Dr. Maiy Hamdy Elsayed

Professor of Cardiology
Ain Shams University

Prof. Dr. Alaa Mahmoud Roshdy

Professor of Cardiology
Ain Shams University

Assist. Prof. Dr. Hebatallah Mohamed Attia

Assistant professor of Cardiology
Ain Shams University

Dr. Dina Adel Ezzeldin

Lecturer of Cardiology
Ain Shams University

Dr. Soha Abdel Hamid Romeih

Lecturer of Cardiology, consultant of adult congenital heart
disease and director of the advanced cardiac imaging unit
Tanta University and Aswan heart center

*Faculty of Medicine
Ain Shams University*

2021

Acknowledgment

*First and foremost, I feel always indebted to
GOD, the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to **Prof. Dr. Maiy Hamdy Elsayed**, Professor of Cardiology - Faculty of Medicine- Ain Shams University for her keen guidance, kind supervision, valuable advice and continuous encouragement, which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and thanks to **Prof. Dr. Alaa Mahmoud Roshdy**, Professor of Cardiology Faculty of Medicine, Ain Shams University, for his kind care, continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

*I am deeply thankful to **Prof. Dr. Hebatallah Mohamed Attia**, Assistant Professor of Cardiology, Faculty of Medicine, Ain Shams University, for her great help, active participation and guidance.*

*I am deeply thankful to **Dr. Dina Adel Ezzeldin**, Lecturer of Cardiology, Faculty of Medicine, Ain Shams University, for her great help, active participation and guidance.*

*I am deeply thankful to **Dr. Soha Abdel Hamid Romeih**, Lecturer of Cardiology, Faculty of Medicine, Tanta University, for her great help, active participation and guidance.*

I would like to express my hearty thanks to all my family for their support till this work was completed.

Last but not least my sincere thanks and appreciation to all patients participated in this study.

Mina Aziz Maurice Tewfik

Title	Page No.
List of Tables	i
List of Figures	iii
List of Charts	v
List of Abbreviations.....	ix
Introduction	1
Aim of the Work.....	4
Review of Literature	5
Patients and Methods.....	25
Results	44
Discussion	105
Limitations.....	117
Summary	118
Recommendations	118
References	121
Arabic Summary	—

List of Tables

Table No.	Title	Page No.
Table (1):	Complications of Fontan procedure.	21
Table (2):	Age and gender distribution.	44
Table (3):	Distribution of order of birth, consanguinity and family history	45
Table (4):	Distribution of marital status, number of children, level of education and work situation	47
Table (5):	Bidirectional Glenn shunt age and place.....	52
Table (6):	NYHA classification.....	54
Table (7):	Current medication.....	55
Table (8):	Weight, Height and BSA.....	56
Table (9):	Vital data.....	57
Table (10):	General examination	60
Table (11):	Local examination	63
Table (12):	Hematological indices.....	66
Table (13):	Kidney function tests.....	68
Table (14):	Liver function tests	69
Table (15):	Iron profile and Pro-BNP.....	69
Table (16):	Six-minute-walk test	71
Table (17):	Basic anatomy	72
Table (18):	Basic echocardiographic data	73
Table (19):	Left ventricular volumes and EF.....	74
Table (20):	Right ventricular areas and FAC	75
Table (21):	AV Valvular assessment.....	76
Table (22):	Pulmonary valve assessment.....	77

List of Tables *(Cont...)*

Fig. No.	Title	Page No.
Table (23):	Peripheral pulmonary branches.....	78
Table (24):	Glenn assessment by echo	78
Table (25):	CT aneurysmal dilated Glenn shunt and peripheral pulmonary branches	81
Table (26):	CT assessment of collaterals and AV malformations	83
Table (27):	MRI assessment of collaterals	85
Table (28):	Hemodynamics pressure and oxygen saturation ..	87
Table (29):	Peripheral pulmonary branches.....	88
Table (30):	Cath assessment of collaterals and AV malformations	89
Table (31):	Effect of basic anatomy on daily physical activity	92
Table (32):	Effect of basic anatomy on distance walked during the 6MWT.....	93
Table (33):	Effect of dominant ventricular morphology on degree of limitation of daily physical activity	94

List of Figures

Fig. No.	Title	Page No.

Chart (57):	Effect of basic anatomy on distance walked during the 6MWT.....	93
Chart (58):	Effect of dominant ventricular morphology on degree of limitation of daily physical activity	95
Chart (59):	Effect of peak pressure gradient on bidirectional Glenn shunt flow reversal.....	96
Chart (60):	Effect of bidirectional Glenn shunt flow reversal on mean pulmonary artery pressure	97
Chart (61):	Effect of veno-venous collaterals presence and degree of desaturation during the 6MWT.....	98
Chart (62):	Effect of RDW on oxygen saturation	99
Chart (63):	Effect of hemoglobin level on distance walked during the 6MWT.....	100
Chart (64):	Effect of MCHC on distance walked during the 6MWT.....	101
Chart (65):	ROC curve showing a RDW cutoff value of 21.8% provided the best balanced sensitivity 53.85% and specificity 69.91% to determine oxygen saturation less than 80%	102

List of Charts *(Cont...)*

Fig. No.	Title	Page No.
Chart (66):	ROC curve showing a Hb cutoff value of 19.3 g/dl provided the best balanced sensitivity 94% and specificity 22.6% to determine distance walked during the 6MWT less than 300 m	103
Chart (67):	ROC curve showing a MCHC cutoff value of 30.9 g/dl provided the best balanced sensitivity 47.4% and specificity 74.3% to determine distance walked during the 6MWT less than 300 m.....	104

List of Abbreviations

Abb.	Full term
6MWT.....	<i>Six minutes walk test</i>
ABP.....	<i>Arterial blood pressure</i>
ALT.....	<i>Alanine transaminase</i>
APCs.....	<i>Aortopulmonary collaterals</i>
ASD.....	<i>Atrial septal defect</i>
AST.....	<i>Aspartate transaminase</i>
AV.....	<i>Atrioventricular</i>
AVM.....	<i>Arteriovenous malformation</i>
AVSD.....	<i>Atrioventricular septal defect</i>
BDG.....	<i>Bidirectional Glenn shunt</i>
BNP.....	<i>Brain natriuretic peptide</i>
BSA.....	<i>Body surface area</i>
BT.....	<i>Blalock Taussig</i>
CT.....	<i>Computed tomography</i>
DILV.....	<i>Double inlet left ventricle</i>
DORV.....	<i>Double outlet right ventricle</i>
DTI.....	<i>Doppler tissue imaging</i>
ECG.....	<i>Electrocardiogram</i>
ECMO.....	<i>Extracorporeal membrane oxygenation</i>
EF.....	<i>Ejection fraction</i>
FAC.....	<i>Fractional area change</i>
Hb.....	<i>Hemoglobin</i>
HLHS.....	<i>Hypoplastic left heart syndrome</i>
HR.....	<i>Heart rate</i>
ICU.....	<i>Intensive care unit</i>
INR.....	<i>International normalized ratio</i>
IV.....	<i>Intra venous</i>
IVC.....	<i>Inferior vena cava</i>
LPA.....	<i>Left pulmonary artery</i>
LV.....	<i>Left ventricle</i>
MAPCAs.....	<i>Major aortopulmonary collaterals</i>
