MONA MAGHRABY

Effect Of Different Techniques of CAD/CAM Designed Frameworks on The Supporting Structures of Kennedy Class I Cases

*A thesis submitted to Prosthodontics Department, Faculty of Dentistry, Ain
Shams University, in partial fulfilment of the requirements for the doctoral
degree in Oral and Maxillofacial Prosthodontics*

By:

Heba Refaat Mohammed Elsarraf

B.D.S - 2005

6th of October University

M.D.S - 2011

Cairo University

**Faculty of Dentistry
Ain Shams University
2021**

Supervisors

Dr. Marwa Ezzat Sabet

*Professor,
Oral and Maxillofacial Prosthodontics Department
Faculty of Dentistry
Ain Shams University*

Dr. Shaimaa Lotfy Mohamed Ouda

*Assistant Professor,
Oral and Maxillofacial Prosthodontics Department
Faculty of Dentistry
Ain Shams University*

Acknowledgement

Thanks to Allah the Almighty who enabled me to finish this research. I revere the patronage and moral support by my parents and husband who encouraged me endlessly through the whole process.

I submit my heartiest gratitude to my respected supervisor ***Prof. Dr. Marwa Sabet*** for her valuable insights in the research. She is a role model for me at many aspects.

I am deeply indebted to my respected supervisor ***Dr. Shaimaa Lotfy*** for her continuous encouragement, and meticulous revision to every word written and every step implemented in the practical part of the thesis.

I humbly extend my thanks to all concerned people who co-operated with me in this regard.

Heba Refaat Elsarrif

Dedication

First and foremost, to my *mum* and *dad*, who sacrificed everything for me and my brothers. I dedicate any success to them; not enough words will express my gratitude to you. May Allah bless your lives.

To my modest and supportive husband, *Sherif*, who has and will always be my backbone and source of inspiration.

To my son *Youssef*, I wish I would be a source of pride for you.

To my brothers *Mohammed and Ibrahim*, who always looked at me as their wisdom and trustful voice. Thank you for all the support.

To my in-laws, *Dr. Mohamed Sameeh*, and *Prof. Salwa Elgharib*, for all the encouragement and appreciation in difficult situations. I am lucky to have you by my side.

Finally, this work is submitted to all knowledge seekers, may Allah accept it in our good deeds.

I believe that this thesis is just the beginning of my journey...

List of Contents

Title	Page no.
List of Figures	II
List of Tables	V
Introduction	1
Review of Literature	3
I. Distal extension removable partial denture	3
II. Attachment retained removable partial denture	6
III. Telescopic removable partial denture	6
A. Different designs of telescopic crowns	7
B. Recent materials used with telescopic crowns	10
IV. Removable partial denture frameworks	16
A. Recent materials of partial dentures	16
B. Recent methods in removable partial denture production	20
V. Dental CAD/CAM technology	20
A. Digitalization tool/ scanner	20
B. Digital designing software	22
C. Digital production units	23
VI. Radiographic evaluation	27
A. Conventional imaging modalities	27
B. Digital imaging modalities	29

List of Figures

Figure no.	Page no.
(1) Pre-operative occlusal view	38
(2) Pre-operative side view	38
(3) Crown preparation	43
(4) Final impression after crown preparations	43
(5) Bite registration after crown preparation	43
(6) Scanning of the stone cast and the represented 3D virtual cast.	44
(7) Steps of virtual designing of telescopic primary coping	45
(8) A) CAM software, and B) Dental milling machine	46
(9) A) Zirconia blanks, and B) Sintering machine	46
(10) A) Zirconia primary crowns, B) Primary crowns on the cast, C) Primary crowns intraorally	47
(11) A) Facebow record, and B) Bite registration	47
(12) Pick-up impression for the primary crowns	48
(13) Red circles showing the pattern resin forming the body of the abutments.	48
(14) Scanning each of the A) Upper cast alone, B) The lower cast alone with the primary crowns placed onto the abutments, and C) Both casts mounted on the articulator	48
(15) A) Scan spray, B) Zirconia copings after been sprayed	49
(16) A) Scanned primary copings, and B) The designed secondary copings	49
(17) PMMA castable resin framework for initial experimental trials	50
(18) Labial cutbacks on the secondary crowns.	50
(19) Steps of virtual RPD framework designing	52
